ENCYCLOPEDIA OF CHOCOLATE

ESSENTIAL RECIPES AND TECHNIQUES

Rizzoli Publications The Valrhona cooking school presents everything the amateur or professional baker needs to learn about cooking with chocolate. One hundred fundamental techniques and more than a hundred recipes are explained with step-by-step photographs and clear instructions. Home chefs will learn chocolate basics (tempering, ganaches, pralines), baker's secrets (marbling, faultless cake crusts, beating egg whites), and how to make candy fillings, decorations, doughs, cream and mousse bases, ice creams and sorbets, and sauces. Bakers can refer back to these building blocks as they progress with an increasing level of expertise through recipes from icing and cookie dough to macaroons and impressive mounted desserts. Recipes include the great classics (Black Forest cake, profiteroles), tarts and tartlets (chocolate-pear, nut caramel), shared delights, teatime treats (chocolate-vanilla waffles, brownies), iced desserts (chocolate cappuccino parfait, raspberry meringue with hot chocolate sauce), special-occasion splurges (dark chocolate fondue, hazelnut-praline Yule log), candies and confections (truffles, lollipops, chocolate-covered cherries), and savory dishes using chocolate. Visual dictionaries of basic equipment and commonly used ingredients, tips for conserving chocolate, a guide to cocoa content, a glossary, and detailed indexes complete the volume.

ANCIENT KNOWLEDGE NETWORKS

A SOCIAL GEOGRAPHY OF CUNEIFORM SCHOLARSHIP IN FIRST-MILLENNIUM ASSYRIA AND BABYLONIA

UCL Press Ancient Knowledge Networks is a book about how knowledge travels, in minds and bodies as well as in writings. It explores the forms knowledge takes and the meanings it accrues, and how these meanings are shaped by the peoples who use it. Addressing the relationships between political power, family ties, religious commitments and literate scholarship in the ancient Middle East of the first millennium BC, Eleanor Robson focuses on two regions where cuneiform script was the predominant writing medium: Assyria in the north of modern-day Syria and Iraq, and Babylonia to the south of modern-day Baghdad. She investigates how networks of knowledge enabled cuneiform intellectual culture to endure and adapt over the course of five world empires until its eventual demise in the mid-first century BC. In doing so, she also studies Assyriological and historical method, both now and over the past two centuries, asking how the field has shaped and been shaped by the academic concerns and fashions of the day. Above all, Ancient Knowledge Networks is an experiment in writing about 'Mesopotamian science', as it has often been known, using geographical and social approaches to bring new insights into the intellectual history of the world's first empires.

RE-CENTRING THE CITY

Saint Philip Street Press What is the role of monumentality, verticality and centrality in the twenty-first century? Are palaces, skyscrapers and grand urban ensembles obsolete relics of twentieth-century modernity, inexorably giving way to a more humble and sustainable de-centred urban age? Or do the aesthetics and politics of pomp and grandiosity rather linger and even prosper in the cities of today and tomorrow? Re-Centring the City zooms in on these questions, taking as its point of departure the experience of Eurasian socialist cities, where twentieth-century high modernity arguably saw its most radical and furthest-reaching realisation. It frames the experience of global high modernity (and its unravelling) through the eyes of the socialist city, rather than the other way around: instead of explaining Warsaw or Moscow through the prism of Paris or New York, it refracts London, Mexico City and Chennai through the lens of Kyiv, Simferopol and the former Polish shtetls. This transdisciplinary volume re-centres the experiences of the 'Global East', and thereby our understanding of world urbanism, by shedding light on some of the still-extant (and often disavowed) forms of 'zombie' centrality, hierarchy and violence that pervade and shape our contemporary urban experience. POWER IN MOVEMENT

SOCIAL MOVEMENTS AND CONTENTIOUS POLITICS

Cambridge University Press Unlike political or economic institutions, social movements have an elusive power, but one that is no less real. From the French and American revolutions through the democratic and workers' movements of the nineteenth century to the totalitarian movements of today, movements exercise a fleeting but powerful influence on politics and society. This study surveys the history of the social movement, puts forward a theory of collective action to explain its surges and declines, and offers an interpretation of the power of movement that emphasises its effects on personal lives, policy reforms and political culture. While covering cultural, organisational and personal sources of movements' power, the book emphasises the rise and fall of social movements as part of political struggle and as the outcome of changes in political opportunity structure.

MAGNIFICENT DESOLATION

THE LONG JOURNEY HOME FROM THE MOON

A&C Black Forty years ago, Buzz Aldrin became the second human - minutes after Neil Armstrong - to set foot on a celestial body other than the Earth. The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history. In the years since, millions more have had their earth-centric perspective changed forever by gazing at the iconic photograph of Aldrin standing on the surface of the Moon with the blackness of space behind him. He described what he saw as 'magnificent desolation'. The flight of Apollo 11 made Aldrin one of the most famous people on the planet, yet few people know the rest of the story. In *Magnificent Desolation*, Aldrin not only gives us a harrowing first-person account of the lunar landing that came within seconds of failure, as well as the ultimate insider's view of life as one of the superstars of America's space program, he also opens up with remarkable candor about his more personal trials - and eventual triumphs - back on Earth. From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the Moon before the decade was out, Aldrin returned home to an Air Force career stripped of purpose or direction, other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour. The twin demons of depression and alcoholism emerged - the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him. As an adventure story, a searing memoir of self-destruction and self-renewal, and as a visionary rallying cry to once again set our course for Mars and beyond, *Magnificent Desolation* is the thoroughly human story of a genuine hero.

THE FORMATIONS OF MODERNITY

UNDERSTANDING MODERN SOCIETIES AN INTRODUCTION

Polity *Formations of Modernity* is a major introductory textbook offering an account of the important historical processes, institutions and ideas that have shaped the development of modern societies. This challenging and innovative book 'maps' the evolution of those distinctive forms of political, economic, social and cultural life which characterize modern societies, from their origins in early modern Europe to the nineteenth century. It examines the roots of modern knowledge and the birth of the social sciences in the Enlightenment, and analyses the impact on the emerging identity of 'the West' of its encounters through exploration, trade, conquest and colonization, with 'other civilizations'. Designed as an introduction to modern societies and modern sociological analyses, this book is of value to students on a wide variety of social science courses in universities and colleges and also to readers with no prior knowledge of sociology. Selected readings from a broad range of classical writers (Weber, Durkheim, Marx, Freud, Adam Smith, Montesquieu, Hobbes, Locke, Rousseau) and contemporary thinkers (Michael Mann, E.P. Thompson, Edward Said) are integrated in each chapter, together with student questions and exercises.

THE MANAGED HEART

COMMERCIALIZATION OF HUMAN FEELING

Univ of California Press In private life, we try to induce or suppress love, envy, and anger through deep acting or "emotion work," just as we manage our outer expressions of feeling through surface acting. In trying to bridge a gap between what we feel and what we "ought" to feel, we take guidance from "feeling rules" about what is owing to others in a given situation. Based on our private mutual understandings of feeling rules, we make a "gift exchange" of acts of emotion management. We bow to each other not simply from the waist, but from the heart. But what occurs when emotion work, feeling rules, and the gift of exchange are introduced into the public world of work? In search of the answer, Arlie Russell Hochschild closely examines two groups of public-contact workers: flight attendants and bill collectors. The flight attendant's job is to deliver a service and create further demand for it, to enhance the status of the customer and be "nicer than natural." The bill collector's job is to collect on the service, and if necessary, to deflate the status of the customer by being "nastier than natural." Between these extremes, roughly one-third of American men and one-half of American women hold jobs that call for substantial emotional labor. In many of these jobs, they are trained to accept feeling rules and techniques of emotion management that serve the company's commercial purpose. Just as we have seldom recognized or understood emotional labor, we have not appreciated its cost to those who do it for a living. Like a physical laborer who becomes estranged from what he or she makes, an emotional laborer, such as a flight attendant, can become estranged not only from her own expressions of feeling (her smile is not "her" smile), but also from what she actually feels (her managed friendliness). This estrangement, though a valuable defense against stress, is also an important occupational hazard, because it is through our feelings that we are connected with those around us. On the basis of this book, Hochschild was featured in *Key Sociological Thinkers*, edited by Rob Stones. This book was also the winner of the Charles Cooley Award in 1983, awarded by the American Sociological Association and received an honorable mention for the C. Wright Mills Award.

BOOKDOWN

AUTHORING BOOKS AND TECHNICAL DOCUMENTS WITH R MARKDOWN

CRC Press bookdown: *Authoring Books and Technical Documents with R Markdown* presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

PRINCIPES DE L'ÉCONOMIE

De Boeck Supérieur Complet, efficace, richement illustré, un excellent outil d'apprentissage de l'économie destiné aux étudiants de 1er cycle et à tous ceux qui s'intéressent au fonctionnement de l'économie moderne. Le "Mankiw-Taylor" est un manuel de référence dans l'enseignement des principes de l'économie. Régulièrement actualisé et enrichi, il conserve dans cette 5e édition la clarté, la progressivité et la grande qualité pédagogique qui incitent les étudiants à s'initier par eux-mêmes au raisonnement économique et qui ont fait le succès de l'édition originale. L'ouvrage passe en revue tous les grands thèmes et les problématiques de la microéconomie, puis de la macroéconomie. Les 37 chapitres traitent des questions au cœur de l'analyse économique standard et abordent les principes et les pratiques de l'économie comportementale. Forts de ces bases solides, les étudiants sont prêts à aborder une approche plus formalisée des concepts économiques. Ils sont aussi appelés à développer leur esprit critique. Cette 5e édition européenne suit la structure d'un enseignement universitaire d'économie en Europe. Elle présente les idées, les concepts et les variables clés de l'analyse économique. Les éléments essentiels de la formalisation mathématique sont présentés, de manière accessible et efficace. En marge de l'exposition de la "théorie économique standard", l'ouvrage réalise des incursions dans le domaine de l'économie comportementale, de la théorie du choix public et des sciences politiques. Ainsi, il reste à ce jour un ouvrage sans égal. Les études de cas et les articles issus de la presse économique ont été renouvelés en quasi-totalité et les statistiques conjoncturelles ont été mises à jour. La crise financière est analysée avec tout le recul qu'il se doit et de nombreuses études de cas font référence aux économies émergentes. La progression du raisonnement économique est ponctuée de questions qui permettent aux étudiants de faire le point sur ce qu'ils ont compris et sur ce qu'ils doivent encore travailler. Principes de l'économie réussit le tour de force de sensibiliser le lecteur novice en économie à l'importance des hypothèses sous-jacentes aux mécanismes économiques, telles que celles portant sur l'information préalable aux décisions individuelles, ou bien la référence aux situations d'équilibre. En cela, cet ouvrage complète et approfondit les développements de la version originale. Cet ouvrage constitue donc la version révisée, enrichie et mise à jour d'un best-seller mondial. Il s'adresse aux étudiants de premier cycle universitaire, d'écoles de commerce ou de MBA qui souhaitent comprendre comment il est possible d'analyser de manière objective le fonctionnement de l'économie mondiale contemporaine.

THE CAMBRIDGE HISTORY OF MEDIEVAL MONASTICISM IN THE LATIN WEST

Cambridge University Press Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

TERRORISM, CRIMINAL LAW AND POLITICS

THE DECLINE OF THE POLITICAL OFFENCE EXCEPTION TO EXTRADITION

Routledge Recent atrocities have ensured that terrorism and how to deal with terrorists legally and politically has been the subject of much discussion and debate on the international stage. This book presents a study of changes in the legal treatment of those perpetrating crimes of a political character over several decades. It most centrally deals with the political offence exception and how it has changed. The book looks at this change from an international perspective with a particular focus on the United States. Interdisciplinary in approach, it examines the fields of terrorism and political crime from legal, political science and criminological perspectives. It will be of interest to a broad range of academics and researchers, as well as to policymakers involved in creating new anti-terrorist policies.

REGIONAL AND LOCAL DEVELOPMENT IN TIMES OF POLARISATION

Despite the emphasis of the European Regional Policy on territorial cohesion, regional disparities have been increasing within Europe in the past years. The metropolitan areas in almost all countries are considerably growing while regions outside of agglomerations are stagnating or even declining. Against this background this book aims to provide an understanding of the underlying processes of polarisation and related regional and local policies. This open access volume contributes to the debates about polarisation and regional development by focussing on questions of spatial justice, power distribution and policy transfer. Theoretical and empirically grounded contributions show that European policies are indeed reproducing socio-spatial inequalities instead of challenging them. The book

shows further the existing potentials and limits of individuals, economic, political and civil society actors to respond to polarisation on the regional and local level. In this book conceptual thoughts on polarisation, regional policy and regional development are combined with empirical research and resulting implications for policymaking. As such, it is a valuable source for early career students and researchers as well as professionals in the field of regional and economic development, policy consultants, and policy makers.
