The Psychosocial Implications of Disney Movies

[MDPI](#) In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Transfeminist Perspectives in and beyond Transgender and Gender Studies

[Temple University Press](#) Lambda Literary Award for Best Book in Transgender Nonfiction, 2013 If feminist studies and transgender studies are so intimately connected, why are they not more deeply integrated? Offering multidisciplinary models for this assimilation, the vibrant essays in Transfeminist Perspectives in and beyond Transgender and Gender Studies suggest timely and necessary changes for institutions of higher learning. Responding to the more visible presence of transgender persons as well as gender theories, the contributing essayists focus on how gender is practiced in academia, health care, social services, and even national border patrols. Working from the premise that transgender is both material and cultural, the contributors address such aspects of the university as administration, sports, curriculum, pedagogy, and the appropriate location for transgender studies. Combining feminist theory, transgender studies, and activism centered on social diversity and justice, these essays examine how institutions as lived contexts shape everyday life.

It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Translating Nature

Cross-Cultural Histories of Early Modern Science

[University of Pennsylvania Press](#) Translating Nature recasts the era of early modern science as an age not of discovery but of translation. As Iberian and Protestant empires expanded across the Americas, colonial travelers encountered, translated, and reinterpreted Amerindian traditions of knowledge—knowledge that was later translated by the British, reading from Spanish and Portuguese texts. Translations of natural and ethnographic knowledge therefore took place across multiple boundaries—linguistic, cultural, and geographical—and produced, through their transmissions, the discoveries that characterize the early modern era. In the process, however, the identities of many of the original bearers of knowledge were lost or hidden in translation. The essays in Translating Nature explore the crucial role that the translation of philosophical and epistemological ideas played in European scientific exchanges with American Indians; the ethnographic practices and methods that facilitated appropriation of Amerindian knowledge; the ideas and practices used to record, organize, translate, and conceptualize Amerindian naturalist knowledge; and the persistent presence and influence of Amerindian and Iberian naturalist and medical knowledge in the development of early modern natural history. Contributors highlight the global nature of the history of science, the mobility of knowledge in the early modern era, and the foundational roles that Native Americans, Africans, and European Catholics played in this age of translation. Contributors: Ralph Bauer, Daniela Bleichmar, William Eamon, Ruth Hill, Jaime Marroquín Arredondo, Sara Miglietti, Luis Millones Figueroa, Marcy Norton, Christopher Parsons, Juan Pimentel, Sarah Rivett, John Slater.

Head to Head

The Economic Battle Among Japan, Europe, and America

[Harper Collins](#) The classic text on the post-Cold War economic battle. Starting with the fall of communism, influential economist and former dean of MIT's Sloan School of Management Lester Thurow deftly explores how head-to-head competition -- not military might -- among Japan, the United States, and the newly united European countries would produce the next world leader. As Thurow explains, in the 1990s the race for economic supremacy was only just beginning. In a world no longer governed by two military superpowers, the stage was set for a dramatic shoot-out among the world's most powerful national economies. Using analytical data, key insights, and common sense, Thurow presents a solid economic game plan for the United States to follow in order to win this battle and attain dominance in the global economy.

Pediatric Gender Identity

Gender-affirming Care for Transgender & Gender Diverse Youth

[Springer Nature](#) This book serves as a guide to key topics regarding pediatric gender identity to help clinicians better care for transgender and gender diverse youth. The text begins by overviewing terminology, epidemiology, gender identity development, and relevant neurobiology. Next, the text focuses on the emergence of affirmative treatment paradigms using a patient-centered, consent based framework. Topics include psychotherapeutic support, gender-affirming medical and surgical care, management of co-existing psychiatric conditions, sexual health and fertility, legal considerations, international considerations, and more. Pediatric Gender Identity can be used as a framework to address core clinical issues and offers practical considerations for gender-affirming care. Using the growing science and understanding of gender development, this book is an excellent resource for all professionals working with gender diverse youth, including child and adolescent psychiatrists, pediatricians, pediatric surgeons, psychologists, therapists, researchers, school and educational leaders, and students.

Urban Literacy

Communication, Identity, and Learning in Development Contexts

[UNESCO](#) Over 800 million adults worldwide, two thirds of them women, are unable to reap the benefits of literate expression. In this publication, the author aims to dispel the notion that illiteracy is principally confined to rural areas, which has for many years been the main focus of development programs. Through a series of case studies and analysis this book provides a valuable insight into what literacy can mean in an urban setting and explores the many ways it is used to enhance the lives of individuals. It highlights the need for greater understanding of the diversity of literacy learning and explores the practical issues in providing assistance to those who aspire to improve their literacy skills.--Publisher's description.

Review of the Draft Fourth National Climate Assessment

[National Academies Press](#) Climate change poses many challenges that affect society and the natural world. With these challenges, however, come opportunities to respond. By taking steps to adapt to and mitigate climate change, the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment, coordinated by the U.S. Global Change Research Program, is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending

from human health and community well-being, to the built environment, to businesses and economies, to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively communicates climate science, impacts, and responses for general audiences including the public, decision makers, and other stakeholders.
