FIFTY KEY THINKERS IN PSYCHOLOGY

Taylor & Francis The new edition of Fifty Key Thinkers in Psychology introduces the life, thought, work and impact of some of the most influential figures who have shaped and developed modern psychology, considering a more diverse history of the discipline. The revised text includes new biographies, histories, and overviews of the work from scientists and scholars such as Alfred Alder, Isabel Briggs Myers, Katherine Cook Briggs and Karen Horney, as well as major re-writes of the works of Freud, Binet and Jung, and some of the more controversial characters such as Charles Galton and Hans Eysenck. Exploring the often overlooked but significant contributions of black, Jewish, and Eastern scholars to the discipline, this new edition looks to address the historically imbalanced focus of particular key thinkers and begin unpicking the impact that race and gender had on the direction and advancement of the field. The book covers the black psychology movement from George Herman Candy to Mamie Phipps Clark, and Kenneth Bancroft Clark, the enormous contribution of Chinese psychologist Jing Qicheng, and some of the many great psychologists whose families were part of the waves of Jewish emigration to the United States escaping oppression, persecution and economic hardship, including Walter Mischel, Cary Cooper and Daniel Kahneman. This fascinating and informative guide is an invaluable resource for those studying, working in, or who simply want to find out more about psychology, suitable for both students and the lay reader alike.

SHOE-OLGY

FROM THE SHAMELESSLY SENSIBLE TO THE WICKEDLY POINTED

Conari Press What do your shoes say about you? Karn Knutson knows. In this beautifully illustrated and devilishly satirical book, a bona fide shoe-ologist—a girl who's studied footwear since grammar school—reveals just how much your shoes are saying. Thought your four-inch heel said "tall?" Think twice. Thought you were the only one aware of your man-made uppers? Guess again. Chances are your shoes have been clueing your friends and co-workers into much more than you thought. Here's what Karn has to say about just a few of your footwear choices: Do you prefer the Strappy Red Satin? "In the office this is a dead giveaway. You want to be anywhere else but where you are. Preferably with some tall, dark, and handsome man or with friends that make you laugh so hard you snort." Or perhaps you're more of a Skin It and Make It Beg type. "There's something sensibly terrifying about you. You're impeccable in your power couture. Cynicism is your native tongue." Neither of these ring a bell for you? Maybe it's because you're more of a Woven Wanderlust girl. "You live in the suburbs and have a pair of these to match every twin set you own. The most excitement you see is when a PTA meeting gets rowdy over whether brownies are acceptable for the annual Cookies-a-Yum-Yum bake sale." Still nothing? Don't worry—with tons of styles grouped into fun categories like Heels: The Holy Grail, Scandals of Sandals, The Sporty Sorts, and Bad Shoes Happen, it'll be hard not to find the perfect fit. With so many options, Shoe-ology is a veritable department store of choices. A perfect gift for yourself and girlfriends, buy it by the pair!

RHYMING POETRY-OLGY

This book is an authentic collection of creative rhyming poems. While this specific genre offers the reader an extensive array of interesting and provocative titles, it also connects the poetry to real-life. In this collection, the seventy-seven poems are organized into seven diverse and distinct categories. They include, African American history, pets, holidays, education, retirement, family reunion as well as thirty extraordinary poems about real-life experience as characterized in the miscellaneous category. Listed below

is graphic compendium of the seven major categories: Life is no Bed of Roses, When it rains, it pours, and Living from Paycheck to Paycheck, are not only poems in the miscellaneous category, but describe some of life's challenges that give true meaning to another old saying, When life gives you lemons, make lemonade. The poem, 365 Days a Year, is a reminder that one day in the calendar year is someone's birthday as noted in B-Day, Your Day. "Live everyday as if it's your last, plan for the future and learn from the past," is a quote and good advice from the Age is nothing but a Number, poem. African American history is another fascinating category. It features eleven very unique and informative poems and short stories. While the month of February is designated as Black History month, the poem, From Africa they came, gives a very descriptive and meaningful picture of how the history actually began. Two other poems, Marin Luther King: the Dreamer, and Obama, the First Black President, both from two different eras, made important contributions to African American history. However, there were many others who paved the way and made significant sacrifices for a better life in, We Stand on the Shoulders. Jumping the Broom, and Living on the wrong side of the Railroad Tracks, are two interesting short rhyming stories that occurred during and after slavery. Education is paramount to a productive life and features fifteen poems. The important characters in this section are the students and teachers. Poems titled, Advice for Millennials, and What Good Teachers Do, tell about the importance of a good education. The poem, Grandparents Memory Page, describes the important role they played in the family reunion category. A holiday quote from My Valentine, poem describes how, "Both candy hearts and human hearts are symbols of love." One pumps money in the economy and the other pumps blood in the heart. Candy money can create a healthy economy and a romantic heart can create a healthy relationship. Dogs are the boys' best friends. Three poems in this category describe the love he had for his German shepherd, Doberman, and Maltese poodle. Retirement is just a special time in a person's life and definitely initiated a new chapter for those portrayed in the six retirement poems. There are just a few examples of the seventy-seven fantastic rhyming poems. I sincerely hope that everyone who reads this book will find one or more poems that might ring a bell for them, bring back fond memories, have an "aha" moment, put smiles on faces and just plain enjoy reading the carefully crafted words in this amazing rhyming poetry-ology book.

MODELS OF ACTION

MECHANISMS FOR ADAPTIVE BEHAVIOR

Psychology Press This volume presents an international group of researchers who model animal and human behavior--both simple and complex. The models presented focus on such subjects as the pattern of eating in meals and bouts, the energizing and shaping impact of reinforcers on behavior, transitive inferential reasoning, responding to a compound stimulus, avoidance and escape learning, recognition memory, category formation, generalization, the timing of adaptive responses, and chromosomes exchanging information. The chapters are united by a common interest in adaptive behavior--whether of human, animal, or artificial system--and clearly demonstrate the rich variety of ways in which this fascinating area of research can be approached. In so doing, the book demonstrates the range of thought that qualifies as theorizing in the contemporary study of the mechanisms of adaptive behavior. It has two purposes: to bring together a very wide range of approaches in one place and to give authors space to explain how their ideas developed. Journal literature often presents fully-formed theories with no explanation of how an idea came to have the shape in which it is presented. In this volume, however, leaders in different fields provide background on the development of their ideas. Where once psychologists and a few zoologists had this field to themselves, now various types of computer scientists have added great energy to the mix.

COUPON CRAZY

THE SCIENCE, THE SAVINGS, & THE STORIES BEHIND AMERICA'S EXTREME OBSESSION

Workman Publishing A fascinating history of this marketing tactic, and why some shoppers take it to extremes—from a longtime expert couponer. Coupon Crazy examines the phenomenon of avid coupon use and the socio-cultural and socioeconomic factors that construct it. By delving into the history of couponing, refunding, the science of shopping, and the dark underbelly of a coupon world the average American doesn't even know about, Mary Potter Kenyon manages to both fascinate and educate. Readers will meet today's "Coupon Queens" (and Kings) and learn about an era when trash really was cash. Not just an observer of this ethnographic research, Mary lived it for over thirty years. "My favorite aspect of the entire book was the candid tone Kenyon takes in sharing her story and others. As someone that both uses coupons and teaches couponing practices, I found the book triggering self-reflection at many points: Do I purchase products just because they are on sale? Do I devalue products I've gotten for free? Do I allow coupons to inform my purchases or the other way around? If you are a couponer, it's quite possible you'll find yourself reflecting on your own shopping habits as you read this book, too." —Angela Russell, The Coupon Project

THE PSYCHOLOGY OF MONEY

TIMELESS LESSONS ON WEALTH, GREED, AND HAPPINESS

Harriman House Limited Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.
