HCI International 2020 - Late Breaking Papers: User Experience Design and Case Studies

22nd HCI International Conference, HCII 2020, Copenhagen, Denmark, July 19–24, 2020, Proceedings

Springer Nature This book constitutes late breaking papers from the 22nd International Conference on Human-Computer Interaction, HCII 2020, which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark, but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as "Late Breaking Work" (papers and posters). These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The 54 late breaking papers presented in this volume were organized in two topical sections named: User Experience Design and Evaluation Methods and Tools; Design Case Studies; User Experience Case Studies.

Polities and Partitions

Human Boundaries and the Growth of Complex Societies

Mobile Platforms, Design, and Apps for Social Commerce

IGI Global While social interactions were once a personal endeavor, more contact is now done virtually. Mobile technologies are an ever-expanding area of research which can benefit users on the organizational level, as well as the personal level. Mobile Platforms, Design, and Apps for Social Commerce is a critical reference source that overviews the current state of personal digital technologies and experiences. Highlighting fascinating topics such as M-learning applications, social networks, mHealth applications and mobile MOOCs, this publication is designed for all academicians, students, professionals, and researchers that are interested in discovering more about how the use of mobile technologies can aid in human interaction.

From Notepad to iPad

Using Apps and Web Tools to Engage a New Generation of Students

Routledge This book is a one-stop-shop for secondary teachers looking to use iPads effectively in the classroom. The author provides a clear and practical overview of how to implement the technology, manage it, and use it successfully. Each chapter is full of tips and engaging classroom activities. Teachers at all levels of experience and comfort with technology will benefit from the ideas and resources in this book. Special Features: Screen shots and other visuals to help you use the recommended apps and websites Strategies for managing technology use in the classroom Lesson plans that effectively teach literacy and content through the use of technology Connections to the Common Core State Standards Samples of student work using iPads Rubrics for a variety of suggested assignments

Information Systems for Crisis Response and Management in Mediterranean Countries

Third International Conference, ISCRAM-med 2016, Madrid, Spain, October 26-28, 2016, Proceedings

Springer This book constitutes the refereed proceedings of the Third International Conference on Information Systems for Crisis Response and Management in Mediterranean Countries, ISCRAM-med 2016, held in Madrid, Spain, in October 2016. Information systems and technologies can play a key role in crisis management in order to support preparation, response, mitigation and recovery processes. Yet technology is not enough to guarantee a better management process, and therefore the conference does not only focus on engineering technologies, but also on their application and practical experiences. The 12 full and 8 short papers presented in this volume were carefully reviewed and selected from 36 submissions. They are organized in topical sections on mobile apps for citizens, modeling and simulation, development of information systems, information and knowledge management, collaboration and coordination, social computing, and issues in humanitarian crisis.

Human-Computer Interaction. Interaction in Context

20th International Conference, HCI International 2018, Las Vegas, NV, USA, July 15–20, 2018, Proceedings, Part II

Springer The 3 volume-set LNCS 10901, 10902 + 10903 constitutes the refereed proceedings of the 20th International Conference on Human-Computer Interaction, HCI 2018, which took place in Las Vegas, Nevada, in July 2018. The total of 1171 papers and 160 posters included in the 30 HCII 2018 proceedings volumes was carefully reviewed and selected from 4346 submissions. HCI 2018 includes a total of 145 papers; they were organized in topical sections named: Part I: HCI theories, methods and tools; perception and psychological issues in HCI; emotion and attention recognition; security, privacy and ethics in HCI. Part II: HCI in medicine; HCI for health and wellbeing; HCI in cultural heritage; HCI in complex environments; mobile and wearable HCI. Part III: input techniques and devices; speech-based interfaces and chatbots; gesture, motion and eye-tracking based interaction; games and gamification.

Understanding What Drives Consumers to Use Gourmet Apps

Applying a Relationship Quality Perspective

Objective - In modern society, technology has become an important part of our daily lives and the growth of the technology sector has grown exponentially. This rapid growth has seen the expansion of several industries, in particular, the mobile app industry. This study explores customer satisfaction toward gourmet mobile applications, based on the quality of the app (download delay, visual, navigability and security) and customer reviews (consumer review, providing image and star rating). Moreover, this study attempts to identify the common characteristics of users of gourmet apps.Methodology/Technique - 325 questionnaires were returned to the researchers following distribution and 276 of those were valid. In total, 164 questionnaires were analysed.Findings - The results reveal that trust, commitment, and satisfaction have a positive influence on the number of purchases from an App.Novelty - This study makes several suggestions for marketing practices of mobile apps and future research.Type of Paper: Empirical.

Web Information Systems and Technologies

9th International Conference, WEBIST 2013, Aachen, Germany, May 8-10, 2013, Revised Selected Papers

Springer **This book contains the thoroughly refereed and revised best papers from the 9th International Conference on Web Information Systems and Technologies, WEBIST 2013, held in Aachen, Germany, in May 2013, organized by the Institute for Systems and Technologies of Information, Control and Communication (INSTICC), and co-organized by the RWTH Aachen University. The 15 papers presented in this book were carefully reviewed and selected from 143 submissions. The papers were selected from those with the best reviews also taking into account the quality of their presentation at the conference. The papers are grouped into parts on Internet technology, Web interfaces and applications, society, e-business and e-government, Web intelligence, and mobile information systems.**

Uses of Technology in Primary and Secondary Mathematics Education

Tools, Topics and Trends

Springer **This book provides international perspectives on the use of digital technologies in primary, lower secondary and upper secondary school mathematics. It gathers contributions by the members of three topic study groups from the 13th International Congress on Mathematical Education and covers a range of themes that will appeal to researchers and practitioners alike. The chapters include studies on technologies such as virtual manipulatives, apps, custom-built assessment tools, dynamic geometry, computer algebra systems and communication tools. Chiefly focusing on teaching and learning mathematics, the book also includes two chapters that address the evidence for technologies' effects on school mathematics. The diverse technologies considered provide a broad overview of the potential that digital solutions hold in connection with teaching and learning. The chapters provide both a snapshot of the status quo of technologies in school mathematics, and outline how they might impact school mathematics ten to twenty years from now.**

CALL communities and culture – short papers from EUROCALL 2016

Research-publishing.net **The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was "CALL communities and Culture". Between the 24th and 27th August 2016, over 135 presentations were delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers.**

Handbook of Research on Mobile Devices and Smart Gadgets in K-12 Education

IGI Global **The use of technology can significantly enhance educational environments for students. It is imperative to study new software, hardware, and gadgets for the improvement of teaching and learning practices. The Handbook of Research on Mobile Devices and Smart Gadgets in K-12 Education is a pivotal reference source featuring the latest scholarly research on the opportunities and challenges of using handheld technology devices in primary and secondary education. Including coverage on a wide variety of topics and perspectives such as blended learning, game-based curriculum, and software applications, this publication is ideally designed for educators, researchers, students, and technology experts seeking current research on new trends in the use of technology in education.**

Handbook of Research on Mobile Devices and Applications in Higher Education Settings

IGI Global **Mobile phones have become an integral part of society, as their convenience has helped democratize and revolutionize communication and the marketplace of ideas. Because of their ubiquity in higher education, undergraduate classrooms have begun to utilize smartphones and tablets as tools for learning. The Handbook of Research on Mobile Devices and Applications in Higher Education Settings explores and fosters new perspectives on the use of mobile applications in a classroom context. This timely publication will demonstrate the challenges that universities face when introducing new technologies to students and instructors, as well as the rewards of doing so in a thoughtful manner. This book is meant to present the latest research and become a source of inspiration for educators, administrators, researchers, app developers, and students of education and technology.**

Mobile Security and Privacy

Advances, Challenges and Future Research Directions

Syngress **Mobile Security and Privacy: Advances, Challenges and Future Research Directions provides the first truly holistic view of leading edge mobile security research from Dr. Man Ho Au and Dr. Raymond Choo—leading researchers in mobile security. Mobile devices and apps have become part of everyday life in both developed and developing countries. As with most evolving technologies, mobile devices and mobile apps can be used for criminal exploitation. Along with the increased use of mobile devices and apps to access and store sensitive, personally identifiable information (PII) has come an increasing need for the community to have a better understanding of the associated security and privacy risks. Drawing upon the expertise of world-renowned researchers and experts, this volume comprehensively discusses a range of mobile security and privacy topics from research, applied, and international perspectives, while aligning technical security implementations with the most recent developments in government, legal, and international environments. The book does not focus on vendor-specific solutions, instead providing a complete presentation of forward-looking research in all areas of mobile security. The book will enable practitioners to learn about upcoming trends, scientists to share new directions in research, and government and industry decision-makers to prepare for major strategic decisions regarding implementation of mobile technology security and privacy. In addition to the state-of-the-art research advances, this book also discusses prospective future research topics and open challenges. Presents the most current and leading edge research on mobile security and privacy, featuring a panel of top experts in the field Provides a strategic and international overview of the security issues surrounding mobile**

technologies Covers key technical topics and provides readers with a complete understanding of the most current research findings along with future research directions and challenges Enables practitioners to learn about upcoming trends, scientists to share new directions in research, and government and industry decision-makers to prepare for major strategic decisions regarding the implementation of mobile technology security and privacy initiatives

Distributed, Ambient and Pervasive Interactions

9th International Conference, DAPI 2021, Held as Part of the 23rd HCI International Conference, HCII 2021, Virtual Event, July 24–29, 2021, Proceedings

Springer Nature **This conference proceedings LNCS 12782 constitutes the refereed proceedings of the 9 th International Conference on Distributed, Ambient and Pervasive Interactions, DAPI 2021, held as part of the 23rd International Conference, HCI International 2021, which took place in July 2021. The conference was held virtually due to the COVID-19 pandemic. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of DAPI 2021, Distributed, Ambient and Pervasive Interactions, are organized in topical sections named: Smart Cities; IoT, Sensors and Smart Environments; Learning and Culture in Intelligent Environments; Designing Intelligent Environments.**

Software Technologies

14th International Conference, ICSOFT 2019, Prague, Czech Republic, July 26–28, 2019, Revised Selected Papers

Springer Nature **This book constitutes the thoroughly refereed post-conference proceedings of the 14th International Conference on Software Technologies, ICSOFT 2019, held in Prague, Czech Republic, in July 2019. The 10 revised full papers were carefully reviewed and selected from 116 submissions. The topics covered in the papers include: business process modelling, IT service management, interoperability and service-oriented architecture, project management software, scheduling and estimating, software metrics, requirements elicitation and specification, software and systems integration, etc.**

Altmetrics for Research Outputs Measurement and Scholarly Information Management

International Altmetrics Workshop, AROSIM 2018, Singapore, Singapore, January 26, 2018, Revised Selected Papers

Springer **This book constitutes the refereed proceedings of the International Workshop on Altmetrics for Research Outputs Measurements and Scholarly Information Management, AROSIM 2018, held in Singapore, in January 2018. The 7 revised full papers presented together with two keynote papers and one introduction paper were carefully reviewed and selected from 20 submissions. The workshop will investigate how social media based metrics along with traditional and non-traditional metrics can advance the state-of-the-art in measuring research outputs.**

Software Studies

A Lexicon

MIT Press **This collection of short expository, critical and speculative texts offers a field guide to the cultural, political, social and aesthetic impact of software. Experts from a range of disciplines each take a key topic in software and the understanding of software, such as algorithms and logical structures.**

Apps Management and E-Commerce Transactions in Real-Time

IGI Global **Technology is continuously advancing and changing the way aspects of business are performed. The implementation of mobile business transactions to acquire various types of goods has changed the landscape of consumerism. Apps Management and E-Commerce Transactions in Real-Time is a timely research publication that features the latest scholarly trends, issues, and implications of the use of a new technological forum in electronic buying and selling. Including extensive coverage on a number of topics and perspectives such as social networks, customer satisfaction, and cloud computing, this book is ideally designed for researchers, academicians, and students seeking current research on mobile solutions in business deals.**

Advanced Information Systems Engineering

30th International Conference, CAiSE 2018, Tallinn, Estonia, June 11-15, 2018, Proceedings

Springer **This book constitutes the refereed proceedings of the 30th International Conference on Advanced Information Systems Engineering, CAiSE 2018, held in Talinn, Estonia, in June 2018. The 37 papers presented in this volume were carefully reviewed and selected from 175 submissions. The papers are organized in topical sections on Process Execution, User-Oriented IS Development, Social Computing and Personalization, the Cloud and Data Services, Process Discovery, Decisions and the Blockchain, Process and Multi-level Modelling, Data Management and Visualization, Big Data and Intelligence, Data Modelling and Mining, Quality Requirements and Software, and Tutorials.**

Worldwide Commonalities and Challenges in Information Literacy Research and Practice

European Conference, ECIL 2013, Istanbul, Turkey, October 22-25, 2013. Revised Selected Papers

Springer **This book constitutes the refereed proceedings of the European Conference on Information Literacy, ECIL 2013, held in Istanbul Turkey, in October 2013. The 73 revised full papers presented together with two keynotes, 9 invited papers and four doctoral papers were carefully reviewed and selected from 236 submissions. The papers are organized in topical sections on overview and research; policies and strategies; theoretical framework; related concepts; citizenship and digital divide; disadvantaged groups; information literacy for the workplace and daily life; information literacy in Europe; different approaches to information literacy; teaching and learning information literacy; information literacy instruction; assessment of information literacy; information literacy and K-12; information literacy and higher education; information literacy skills of LIS students; librarians, libraries and ethics.**

Applied Operational Research

1st International Conference, ICAOR 2008, Yerevan, Armenia, September 15-17, 2008, Proceedings

ORLAB Analytics **These proceedings gather contributions presented at the 1st International Conference on Applied Operational Research (ICAOR 2008) in Yerevan, Armenia, September 15-17, 2008, published in the series Lecture Notes in Management Science (LNMS). The conference covers all aspects of Operational Research and Management Science (OR/MS) with a particular emphasis on applications.**

Mobile Search Behaviors

An In-depth Analysis Based on Contexts, APPs, and Devices

Morgan & Claypool Publishers **With the rapid development of mobile Internet and smart personal devices in recent years, mobile search has gradually emerged as a key method with which users seek online information. In addition, cross-device search also has been regarded recently as an important research topic. As more mobile applications (APPs) integrate search functions, a user's mobile search behavior on different APPs becomes more significant. This book provides a systematic review of current mobile search analysis and studies user mobile search behavior from several perspectives, including mobile search context, APP usage, and different devices. Two different user experiments to collect user behavior data were conducted. Then, through the data from user mobile phone usage logs in natural settings, we analyze the mobile search strategies employed and offer a context-based mobile search task collection, which then can be used to evaluate the mobile search engine. In addition, we combine mobile search with APP usage to give more in-depth analysis, such as APP transition in mobile search and follow-up actions triggered by mobile search. The study, combining the mobile search with APP usage, can contribute to the interaction design of APPs, such as the search recommendation and APP recommendation. Addressing the phenomenon of users owning more smart devices today than ever before, we focus on user cross device search behavior. We model the information preparation behavior and information resumption behavior in cross-device search and evaluate the search performance in cross-device search. Research on mobile search behaviors across different devices can help to understand online user information behavior comprehensively and help users resume their search tasks on different devices.**

Mobile Apps to Support and Assess Foreign Language Learning

In the last two decades there have been many attempts to integrate all kinds of mobile devices and apps to support formal as well as informal learning processes. However, most of the available apps still support mainly individual learning, using mobile devices to deliver content rather than providing learners with the opportunity to interact with each other. To address this we have designed an app based on a highly interactive, ubiquitous and constructive learning approach. The app is called "Guess it! Language Trainer" and allows learners to share, assess and co-construct their foreign language knowledge. Learning contents are no longer delivered but integrated into versatile tasks. Even though these tasks are being performed individually by each player, the players' interaction with the app performed affects the whole community of learners. The current research paper presents the first results of an ongoing research project using mobile apps to enhance the Foreign Language Learning in a compulsory German language course at a Spanish University. In our paper we will firstly describe a specific app (Guess it! Language Trainer) which has been used to support students' independent language learning outside the classroom. Secondly, we will describe how the app encouraged students to get actively involved in their own learning processes and thirdly, how the teacher can use the information stored in the system to retrace and assess students' language learning. [For full proceedings, see ED564162.].

Health Gadgets and Apps

Sankalp Publication **In India, the combination of an aging population and adverse behaviors such as obesity and smoking will create epidemics of diseases like diabetes, heart problems, and other chronic diseases that last a lifetime and are difficult to treat. As per the World Health Organization (WHO), the spread of chronic disease will increase 2.5 times with numbering 84 million in 1995 to 228 million in 2025. In developing countries like India, chronic disease will spread with a rate of 60%. Also with emergence of COVID -19 pandemic since Dec 2019 the existing problems of chronic diseases in aged population has caused global mortality and morbidity. To manage such a fast occurring and fast spreading respiratory infection many health gadgets and apps have contributed significantly to control its impact like thermal scanners, pulse oximeters , health apps like arogya setu , online pharmacy apps etc. Apart from it India has more than 1.3 billion population and has constraints of health care personnel and facilities. The primary care health care provider must become more organized and automated. The internet and digital medical information will have a major disruptive effect on the practice of medicine. The solution to such health care challenges is real time, team-based and multi-disciplinary care which can only be attained by advanced health gadgets and health apps. Through health gadgets and apps the user can process the health information and manage body statistics in real time manner. Earlier authors have focussed over commercial or technological side of health gadgets and apps. This book and research work is an academic contribution for linking the user intention with benefits of health gadgets ad apps. The authors have tried to provide a insight about health gadget and apps in India, considering it promising solution and basis of proactive health care delivery model in India.**

Smart Education and Smart e-Learning

Springer **This book contains the contributions presented at the 2nd international KES conference on Smart Education and Smart e-Learning, which took place in Sorrento, Italy, June 17-19, 2015. It contains a total of 45 peer-reviewed book chapters that are grouped into several parts: Part 1 - Smart Education, Part 2 – Smart Educational Technology, Part 3 – Smart e-Learning, Part 4 – Smart Professional Training and Teachers' Education, and Part 5 – Smart Teaching and Training related Topics. This book can be a useful source of research data and valuable information for faculty, scholars, Ph.D. students, administrators, and practitioners - those who are interested in innovative areas of smart education and smart e-learning.**

Walters & Karram Urogynecology and Reconstructive Pelvic Surgery - E-Book

Elsevier Health Sciences **Uniquely designed to reflect the physician's decision-making process, Walters & Karram Urogynecology and Reconstructive Pelvic Surgery presents definitive, state-of-the-art guidance on every aspect of female pelvic medicine and reconstructive surgery. This practical, atlas-style resource covers everything from basic concepts through to clinical and urodynamic evaluation, management, and treatment, equipping you to make the best clinical decisions and optimize outcomes. Edited and authored by renowned experts in the field, this updated 5th Edition is an ideal resource for urogynecology fellows and practitioners, urologists, and OB/GYNs who need a step-by-step, comprehensive reference on the latest procedures and research to evaluate and treat female pelvic floor disorders. Offers a comprehensive approach to all urogynecologic disorders, including genuine stress incontinence, pelvic organ prolapse, defecation disorders, painful and irritative voiding disorders, and specific conditions such as urinary tract infection. Provides algorithmic approaches to common complaints, evidence-based assessments of appropriate therapies, and hundreds of clear surgical illustrations, photographs, and radiographs. Features an all-new video collection to clearly demonstrate key procedures. Contains new chapters on Urology for the Urogynecologist and Interstitial Cystitis/Bladder Pain Syndrome. Contains timely discussions of surgical complications, the psychosocial issues associated with treating patients with female pelvic floor disorders, and female sexual function and dysfunction. Includes case presentations from leading experts in urogynecology and urology that allow you to apply the information presented to everyday clinical situations.**

Microsoft Word 2013: Complete

Cengage Learning **Introduce your students to the latest that Microsoft Office has to offer with the new generation of Shelly Cashman Series books! For the past three decades, the Shelly Cashman Series has effectively introduced computer skills to millions of students. With MICROSOFT WORD 2013, we're continuing our history of innovation by enhancing our proven pedagogy to reflect the learning styles of today's students. In this text you'll find features that are specifically designed to engage students, improve retention, and prepare them for future success. Our trademark step-by-step, screen-by-screen approach now encourages students to expand their understanding of MICROSOFT WORD 2013 through experimentation, critical thought, and personalization. With these enhancements and more, the Shelly Cashman Series continues to deliver the most effective educational materials for you and your students. Digital Personalized Health and Medicine

Proceedings of MIE 2020

IOS Press **Digital health and medical informatics have grown in importance in recent years, and have now become central to the provision of effective healthcare around the world. This book presents the proceedings of the 30th Medical Informatics Europe conference (MIE). This edition of the conference, hosted by the European Federation for Medical Informatics (EFMI) since the 1970s, was due to be held in Geneva, Switzerland in April 2020, but as a result of measures to prevent the spread of the Covid19 pandemic, the conference itself had to be cancelled. Nevertheless, because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine, it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication, and these are published here as planned. The 232 papers are themed under 6 section headings: biomedical data, tools and methods; supporting care delivery; health and prevention; precision medicine and public health; human factors and citizen centered digital health; and ethics, legal and societal aspects. A 7th section deals with the Swiss personalized health network, and section 8 includes the 125 posters accepted for the conference. Offering an overview of current trends and developments in digital health and medical informatics, the book provides a valuable information resource for researchers and health practitioners alike.**
