It means that one is FOR Christ, that one not only accepts Him, but that one lives in Him. Living in Christ has little relationship to the more commonly accepted situation of living as a Christian, or living a Christian life. Living AS a Christian means that one has accepted the tokens of Christianity, that one agrees in the divinity of Christ, that one is a member of a Christian congregation, in a largely Christian community, in a Christian nation. Thus, one can lead a Christian life without knowing Christ and without changing one's existence in the slightest degree. If a person leads a Christian life, and it does not transform one's existence, then one can be sure that he does not KNOW Christ. Knowing Christ is the only manner in which one can go beyond oneself, and the only manner in which one can go beyond one's world. In knowing Christ, one is immediately lifted out of the mechanical life of the human existence, one transcends the common existence. One is no longer a human machine, leading a hopeless, mechanical life, repeating the same meaningless motions like a robot throughout the years of one's earthly existence. What was Christ's ad-monition? "Take up the Cross, and follow Me." But, in explication of this admonition, the New Testament contains many significant references to the condition of sleep, and Christ's exhortations to mankind to awaken. Now, what does this mean? It means that Christ did not wish to be followed by robots and sleepwalkers, He desired man to awaken, and to attain the full use of his earthly powers. Not only are mechanical men of no use to Christ, but they are quite dangerous, they present endless difficulties in the establishment of Christ's Kingdom on earth. Body Piercing and Tattooing Making Smart Choices The Rosen Publishing Group, Inc With body piercing and tattooing becoming more popular and mainstream, many teens may think about engaging in these forms of body modification. An excellent resource for young people pondering a piercing or tattoo, this title presents some of the pros and cons they should consider. In an honest and engaging manner, the author presents important information teens need to protect their health, including how to identify a reputable studio, what to expect from the procedures, and how to do proper aftercare. Legal, social, and familial issues are explored, too, including the importance of discussing the decision with their parents and choosing tattoos or piercings they can live with throughout adulthood. Discourses on Tantra In Indian Mexico (1908) Library of Alexandria The reading public may well ask, Why another travel book on Mexico? Few countries have been so frequently written up by the traveler. Many books, good, bad, and indifferent, but chiefly bad, have been perpetrated. Most of these books, however, cover the same ground, and ground which has been traversed by many people. Indian Mexico is practically unknown. The only travel-book regarding it, in English, is Lumholtz's "Unknown Mexico." The indians among whom Lumholtz worked lived in northwestern Mexico; those among whom I have studied are in southern Mexico. The only district where his work and mine overlap is the Tarascan area. In fact, then, I write upon an almost unknown and untouched subject. Lumholtz studied life and customs; my study has been the physical type of south Mexican indians. Within the area covered by Lumholtz, the physical characteristics of the tribes have been studied by Hrdlicka. His studies and my own are practically the only investigations within the field. There are two Mexicos. Northern Mexico to the latitude of the capital city is a mestizo country; the indians of pure blood within that area occupy limited and circumscribed regions. Southern Mexico is indian country; there are large regions, where the mestizos, not the indians, are the exception. From the time of my first contact with Mexican indians, I was impressed with the notable differences between tribes,

and desired to make a serious study of their types. In 1895, the accidental meeting with a priest from Guatemala led to my making a journey to Central America. It was on that journey that I saw how the work in question might be done. While the government of Mexico is modeled upon the same pattern as our own, it is far more paternal in its nature. The Republic is a confederation of sovereign states, each of which has its elected governor. The states are subdivided into districts somewhat corresponding to our counties, over each of which is a jefe politico appointed by the governor; he has no responsibility to those below him, but is directly responsible to the man who names him, and who can at will remove him; he is not expected to trouble the state government unnecessarily, and as long as he turns over the taxes which are due the state he is given a free hand. Within the districts are the cities and towns, each with its local, independent, elected town government.

 Wanted: Company Daughters. Virtuous young ladies to become the

brides of industrious settlers in a foreign land. The Company will pay the cost of the lady's dowry and travel. Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana's future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. Integrating Information Technology Into the Teacher Education Curriculum Process and Products of Change Routledge As teaching evolves, teacher education must keep up. This book examines systemic reforms that incorporate new technology to improve any teacher education program. While there are books that address the integration of technology into teaching curricula, very few address the process for teacher education faculty and the systemic reform of a teacher education program. Integrating Information Technology into the Teacher Education Curriculum: Process and Products of Change provides practical examples and suggestions for teacher education departments striving to integrate new technologies into their curriculum. It will help in the effort to motivate faculty to make utilizing new technology a natural strategy for the teachers they are educating. It describes the creation of Design Teams at Brigham Young University's McKay School of Education (funded by a PT3 grant) and how these teams worked to successfully reconfigure the school's teacher preparation curricula. Integrating Information Technology into the Teacher Education Curriculum examines: how to compose and create a curriculum design team—including both teacher education and content-specific methods instructors training and collaboration opportunities that focus on the infusion of technology how to facilitate alignment among a university, cooperating school districts, the State Office of Education, and other available teacher preparation programs specific case examples of the redevelopment of teacher education courses by the instructors who teach them the process of changing a technology course required by the teacher education program the process of extending grant activities to the university's partner school districts and the State Office of Education From the editors: Preparing tomorrow's teachers to use technology in schools is a complex endeavor requiring the infusion of technology into curriculum and instructional practices at all levels of the pre-service program. In many early teacher education programs, prospective teachers took a computer literacy class separate from content methods classes and rarely engaged in real collaboration on how schoolteachers could integrate technology into authentic learning experiences. By focusing merely on how to use computers, technology training failed by not addressing how to teach students more effectively using a variety of technological tools. What teachers need to know most is how to teach content more effectively. Technology integration should cause teachers to develop different perspectives through rethinking teaching and learning. Teaching with technology causes teachers to confront their established beliefs about instruction and their traditional roles as classroom teachers.
