THE BOOK OF THE LAMBORGHINI MURCIÉLAGO

Veloce Publishing Ltd **The wedge-shaped V12 Lamborghini flagships were always spectacular - in shape, sound and performance. The Murciélago was an evolution of the Countach and the Diablo, and was as iconic in its time as its illustrious predecessors were in theirs. This book examines the Murcielago in detail, while casting a look back through Lamborghini's troubled history, to understand how the Murciélago came into being. Ferruccio Lamborghini, Patrick Minram, Megatech, Chrysler, and finally VW-Audi, all played their part in the birth of this modern classic. The book touches on the people and organisations involved in the production of this iconic car, before examining each of the model variants, and discusses the joys and tribulations of ownership.**

Finally, important characteristic features of driver assistance systems for particular vehicles are presented: Systems for commercial vehicles and motorcycles.

UNIVERSAL EMPIRE

A COMPARATIVE APPROACH TO IMPERIAL CULTURE AND REPRESENTATION IN EURASIAN HISTORY

Cambridge University Press The claim by certain rulers to universal empire has a long history stretching as far back as the Assyrian and Achaemenid Empires. This book traces its various manifestations in classical antiquity, the Islamic world, Asia and Central America as well as considering seventeenth- and eighteenth-century European discussions of international order. As such it is an exercise in comparative world history combining a multiplicity of approaches, from ancient history, to literary and philosophical studies, to the history of art and international relations and

historical sociology. The notion of universal, imperial rule is presented as an elusive and much coveted prize among monarchs in history, around which developed forms of kingship and political culture. Different facets of the phenomenon are explored under three, broadly conceived, headings: symbolism, ceremony and diplomatic relations; universal or cosmopolitan literary high-cultures; and, finally, the inclination to present universal imperial rule as an expression of cosmic order.

COPPER ALLOYS

EARLY APPLICATIONS AND CURRENT PERFORMANCE - ENHANCING PROCESSES

BoD - Books on Demand Copper has been used for thousands of years. In the centuries, both handicraft and industry have taken advantage of its easy castability and remarkable ductility combined with good mechanical and corrosion resistance. Although its mechanical properties are now well known, the simple f.c.c. structure still makes copper a model material for basic studies of deformation and damage mechanism in metals. On the other hand, its increasing use in many industrial sectors stimulates the development of high-performance and high-efficiency copper-based alloys. After an introduction to classification and casting, this book presents modern techniques and trends in processing copper alloys, such as the developing of lead-free alloys and the role of severe plastic deformation in improving its tensile and fatigue strength. Finally, in a specific section, archaeometallurgy techniques are applied to ancient copper alloys. The book is addressed to engineering professionals, manufacturers and materials scientists.

ENVIRONMENTAL CHANGE AND AGRICULTURAL SUSTAINABILITY IN THE MEKONG DELTA

Springer Science & Business Media **The Mekong Delta of Vietnam is one of the most productive agricultural areas in the world. The Mekong River fans out over an area of about 40,000 sq kilometers and over the course of many millennia has produced a region of fertile alluvial soils and constant flows of energy. Today about a fourth of the Delta is under rice cultivation, making this area one of the premier rice granaries in the world. The Delta has always proven a difficult environment to manipulate, however, and because of population pressures, increasing acidification of soils, and changes in the Mekong's flow, environmental problems have intensified. The changing way in which the region has been linked to larger flows of**

commodities and capital over time has also had an impact on the region: For example, its re-emergence in recent decades as a major rice-exporting area has linked it inextricably to global markets and their vicissitudes. And most recently, the potential for sea level increases because of global warming has added a new threat. Because most of the region is on average only a few meters above sea level and because any increase of sea level will change the complex relationship between tides and down-river water flow, the Mekong Delta is one of the areas in the world most vulnerable to the effects of climate change. How governmental policy and resident populations have in the past and will in coming decades adapt to climate change as well as several other emerging or ongoing environmental and economic problems is the focus of this collection.

HEARING VOICES, DEMONIC AND DIVINE

SCIENTIFIC AND THEOLOGICAL PERSPECTIVES

Routledge The Open Access version of this book, available at www.taylorfrancis.com/books/9781472453983, has been made available under a Creative Commons Attribution-Non Commercial-No Derivative 4.0 license. Experiences of hearing the voice of God (or angels, demons, or other spiritual beings) have generally been understood either as religious experiences or else as a feature of mental illness. Some critics of traditional religious faith have dismissed the visions and voices attributed to biblical characters and saints as evidence of mental disorder. However, it is now known that many ordinary people, with no other evidence of mental disorder, also hear voices and that these voices not infrequently include spiritual or religious content. Psychological and interdisciplinary research has shed a revealing light on these experiences in recent years, so that we now know much more about the phenomenon of "hearing voices" than ever before. The present work considers biblical, historical, and scientific accounts of spiritual and mystical experiences of voice hearing in the Christian tradition in order to explore how some voices may be understood theologically as revelatory. It is proposed that in the incarnation, Christian faith finds both an understanding of what it is to be fully human (a theological anthropology), and God's perfect self-disclosure (revelation). Within such an understanding, revelatory voices represent a key point of interpersonal encounter between human beings and God.

BIOLOGICAL POTENTIAL AND MEDICAL USE OF SECONDARY METABOLITES

MDPI Many macro and micro species, from terrestrial and aquatic environments, produce structurally unique compounds and, in many countries, still are the primary sources of medicines. In fact, secondary metabolites are an important source of chemotherapeutic agents but are also lead compounds for synthetic modification and the optimization of biological activity. Therefore, the exploitation of secondary metabolites, or their inspired synthetic compounds, offers excellent opportunities for the pharmaceutical industry. This Medicines Special Issue focuses on the great potential of secondary metabolites for therapeutic application. The Special Issue contains 16 articles reporting relevant experimental results, and an overview of bioactive secondary metabolites, their biological effects, and new methodologies that improve and accelerate the process of obtained lead compounds with regard to new drug development. We would like to thank all 83 authors, from all over the world, for their valuable contributions to this Special Issue.

TRANSREGIONAL AND REGIONAL ELITES - CONNECTING THE EARLY ISLAMIC EMPIRE

Walter de Gruyter GmbH & Co KG **Transregional and regional elites of various backgrounds were essential for the integration of diverse regions into the early Islamic Empire, from Central Asia to North Africa. This volume is an important contribution to the conceptualization of the largest empire of Late Antiquity. While previous studies used Iraq as the paradigm for the entire empire, this volume looks at diverse regions instead. After a theoretical introduction to the concept of 'elites' in an early Islamic context, the papers focus on elite structures and networks within selected regions of the Empire (Transoxiana, Khurāsān, Armenia, Fārs, Iraq, al-Jazīra, Syria, Egypt, and Ifrīqiya). The papers analyze elite groups across social, religious, geographical, and professional boundaries. Although each region appears unique at first glance, based on their heterogeneous surviving sources, its physical geography, and its indigenous population and elites, the studies show that they shared certain patterns of governance and interaction, and that this was an important factor for the success of the largest empire of Late Antiquity.**

MODERN MUSIC AND AFTER

Oxford University Press **Over three decades, Paul Griffiths's survey has remained the definitive study of music since the Second World War; this fully revised and updated edition re-establishes Modern Music and After as the preeminent introduction to the music of our time. The disruptions of the war, and the struggles of the ensuing peace, were reflected in the music of the time: in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music; in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies; in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human, in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it as language. The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding. This constant expansion of musical thinking since 1945 has left us with no singular history of music; Griffiths's study accordingly follows several different paths, showing how and why they converge and diverge. This new**

edition of *Modern Music and After* discusses not only the music of the fifteen years that have passed since the previous edition, but also the recent explosion of scholarly interest in the latter half of the twentieth century. In particular, the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s. Griffiths then moves the book into the twenty-first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino. For its breadth, wealth of detail, and characteristic wit and clarity, the third edition of *Modern Music and After* is required reading for the student and the enquiring listener.

ORGANIZATION THEORY & DESIGN

AN INTERNATIONAL PERSPECTIVE

VIETNAM AT A CROSSROADS

ENGAGING IN THE NEXT GENERATION OF GLOBAL VALUE CHAINS

World Bank Publications Vietnam is at a crossroads. It can grow as an export platform for GVCs, specializing in low value-added assembly functions with

industrialization occurring in enclaves with little connection to the broader economy or society; or it can leverage the current wave of growth, enabled and accelerated by its successful participation in GVCs, to diversify and move up the chain into higher value-added functions. Success will require Vietnam’s policymakers to view the processes of development differently, and to take new realities of the global economy more fully into account. The purpose of this volume is to support Vietnam’s path to economic prosperity by identifying policies and targeted interventions that will drive development through leveraging GVC participation that take major shifts in trade policy and rapid technological advances in ICT into account. The volume is based on a compilation of studies completed by World Bank staff and external consultants in 2015 supporting the “Enabling Economic Modernization and Private Sector Development” chapter of the Vietnam 2035 report. The objective of these studies was to diagnose Vietnam’s current participation in GVCs, visualize where Vietnam could be by 2035 in the context of a changing global environment, and identify the policy actions needed to get there. The studies also supported topics related more broadly to export competitiveness, including firm-level productivity, services, and connectivity. It then identifies targeted strategies and policy interventions that will help overcome challenges, minimize risks, and maximize opportunities. Readers will gain a strong understanding of Vietnam’s current and potential engagement with GVCs—and will learn about strategic GVC policy tools that can help developing countries achieve economic prosperity in the context of compressed development.

SLAVS AND TATARS

MIRRORS FOR PRINCES

Jrp Ringier This form of political writing often called 'advice literature', shared by Christian and Muslim cultures alike, 'mirrors for princes' attempted to elevate statecraft ('dawla') to the same level as faith/religion ('din') during the Middle Ages. These guides for future rulers - Machiavelli's The Prince being a widely known example - addressed the delicate balance between seclusion and society, spirit and state, echoes of which we continue to find in the US, Europe, and the Middle East several centuries later. Today we suffer from the very opposite: there is no shortage of

political commentary, but a notable lack of intelligent, eloquent discourse on the role of faith and the immaterial as a valuable agent in society or public life. This publication brings together the writing of preeminent scholars and commentators using the genre of medieval advice literature as a starting point to discuss fate and fortune versus governance, advice for female nobility, and an Indian television drama as a form of translation of statecraft. The illustrated essays are accompanied by an interview with Slavs and Tatars. *Mirrors for Princes* is edited by Anthony Downey, Editor-in-Chief of Ibraaz, and is published with NYU Abu Dhabi Art Gallery.
