PRE-INCIDENT INDICATORS OF TERRORIST INCIDENTS

THE IDENTIFICATION OF BEHAVIORAL, GEOGRAPHIC AND TEMPORAL PATTERNS OF PREPARATORY CONDUCT

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

ECONOMIC SCIENCE FICTIONS

MIT Press An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In *Economic Science Fictions*, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses, merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha-Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists. Contributors AUDINT, Khairani Barokka, Carina Brand, Ha-Joon Chang, Miriam Cherry, William Davies, Mark Fisher, Dan Gavshon-Brady and James Pockson, Owen Hatherley, Laura Horn, Tim Jackson, Mark Johnson, Bastien Kerspern, Nora O Murchú, Tobias Revell et al., Judy Thorne, Sherryl Vint, Joseph Walton, Brian Willems

CAPITALISM'S ACHILLES HEEL

DIRTY MONEY AND HOW TO RENEW THE FREE-MARKET SYSTEM

John Wiley & Sons For over forty years in more than sixty countries, Raymond Baker has witnessed the free-market system operating illicitly and corruptly, with devastating consequences. In *Capitalism's Achilles Heel*, Baker takes readers on a fascinating journey through the global free-market system and reveals how dirty money, poverty, and inequality are inextricably intertwined. Readers will discover how small illicit transactions lead to massive illegalities and how staggering global income disparities are worsened by the illegalities that permeate international capitalism. Drawing on his experiences, Baker shows how Western banks and businesses use secret transactions and ignore laws while handling some \$1 trillion in illicit proceeds each year. He also illustrates how businesspeople, criminals, and kleptocrats perfect the same techniques to shift funds and how these tactics negatively affect individuals, institutions, and countries.

RAF WINGS OVER FLORIDA

MEMORIES OF WORLD WAR II BRITISH AIR CADETS

Purdue University Press They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

INDIA'S NEW CAPITALISTS

CASTE, BUSINESS, AND INDUSTRY IN A MODERN NATION

Hachette UK It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book - acclaimed for being the first social history to document and understand India's new entrepreneurial groups - Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

THE AUTOBIOGRAPHY OF SYED BABAR ALI

MASSEY-FERGUSON 35 & 65 MODELS IN DETAIL

Herridge & Sons Limited Launched in 1958, as the successor to the ubiquitous Ferguson TE20, the Masey-Ferguson 35 was a product of the merger of Massey-Harris and Ferguson. It incorporated numerous improvements and new features and became massively popular worldwide. Its companion, the 65 model, was introduced shortly afterwards and was a larger tractor, offered with the revolutionary Multi Power system that gave 12 forward and four reverse gears. Durable and versatile, these tractors are still a practical proposition today, and even unrestored examples command high prices. Michael Thorne, author of Ferguson TE20 in Detail, continues the story as he describes the development of these models, the production versions and their capabilities, options and extras, conversions, implements and their use today. Outstanding surviving examples are featured in some 80 photographs specially taken for this book, and there are approximately 120 accompanying archive illustrations.

This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head.

FORD FIRE TRUCKS

Enthusiast Books While fully custom rigs have traditionally been the pin-ups of fire apparatus, the backbone of the American fire service has always been trucks built on commercially available chassis. Although there have been many commercial chassis providers throughout history, there is arguably no more recognizable name in the American automotive industry than Ford. This book serves as a pictorial history of the role Ford chassis have played in the evolution of fire apparatus. Fire trucks of all types built on the famous Model T, the long standing F-Series, the venerable C-Series, the honorary Louisville-Line, and other miscellaneous Ford models have prolifically and efficiently served towns small and big alike since the advent of motorization. This chronicle pays homage to the contributions this automotive legend has made to the fire service with a brilliant display of classic rigs and modern machines, with representatives from over 150 fire apparatus manufacturers - from the glamour queens themselves to smaller builders with characteristics just as neat as their big name peers.

A HISTORY OF THE NATAL MIDLANDS REGION OF THE BLACK SASH

Nelson Mandela called the Black Sash, founded in May 1955 to contest legislation that removed coloured South Africans from the common voters' roll in the Cape, the 'conscience of white South Africa'. Adopting a radical critique of the national condition, Sash maintained high-profile protest against iniquitous apartheid legislation through the darkest hours of recent South African history. It also ran advice offices that assisted those disempowered by racist legislation and used the information gathered to support its political campaigns. This book chronicles the history of the Natal Midlands branch based in Pietermaritzburg. What was the relevance and legacy of the Black Sash, the women's anti-apartheid organisation, and what did this mean to its members? This book looks specifically at the Natal Midlands (Pietermaritzburg) region and the distinctiveness of its contribution. Like other regions it supported the liberation struggle through public protest and educational campaigns aimed at exposing iniquitous apartheid legislation. In a police state this required considerable determination and courage. During the darkest hours Natal Midlands Sash kept alive hope for universal civil rights in a democratic South Africa. The Pietermaritzburg Advice Office became one of the country's busiest, specialising in old age pension and disability grant issues. Knowledge painstakingly gathered about life for black South Africans was fed back into Sash's political and information campaigns while Natal Midlands produced several significant publications. One of the smaller branches, it punched above its weight. Whether Sash was a political pressure group of women, or a women's organisation challenging patriarchy, it generated lively debate. Environmental issues were also accorded a high priority. Fifteen interviews show that involvement in Sash was a life-enhancing experience for many members who have looked back with pride and honour at their part in the anti-apartheid movement from 1955 to 1994.
