Global Soundtracks Worlds of Film Music *Wesleyan University Press* **The first volume focusing on film music as a worldwide phenomenon** **The Struggle Behind the Soundtrack Inside the Discordant New World of Film Scoring** *McFarland* **Do you want to pick up a light saber whenever you hear John Williams' Star Wars theme? Get the urge to ride into the desert and face down steely-eyed desperados to the refrain of Ennio Morricone's The Good, the Bad and the Ugly? Does Hans Zimmer's Pirates of the Caribbean score have you talking like Jack Sparrow? From the Westerns of the 1960s to current blockbusters, composers for both film and television have faced new challenges—evermore elaborate sound design, temp tracks, test audiences and working with companies that invest in film score recordings all have led to creative sparks, as well as frustrations. Drawing on interviews with more than 40 notable composers, this book gives an in-depth analysis of the industry and reveals the creative process behind such artists as Klaus Badelt, Mychael Danna, Abel Korzeniowski, Walter Murch, Rachel Portman, Alan Silvestri, Randy Thom and others. The Concise Garland Encyclopedia of World Music** *Routledge* **This book is about the gender dimensions of natural resource exploitation and management, with a focus on Asia. It explores the uneasy negotiations between theory, policy and practice that are often evident within the realm of gender, environment and natural resource management, especially where gender is understood as a political, negotiated and contested element of social relationships. It offers a critical**

feminist perspective on gender relations and natural resource management in the context of contemporary policy concerns: decentralized governance, the elimination of poverty and the mainstreaming of gender. Through a combination of strong conceptual argument and empirical material from a variety of political economic and ecological contexts (including Cambodia, China, Indonesia, Malaysia, Nepal, Thailand and Vietnam), the book examines gender-environment linkages within shifting configurations of resource access and control. The book will serve as a core resource for students of gender studies and natural resource management, and as supplementary reading for a wide range of disciplines including geography, environmental studies, sociology and development. It also provides a stimulating collection of ideas for professionals looking to incorporate gender issues within their practice in sustainable development. Music in World War II Coping with Wartime in Europe and the United States "How can music withstand the death and destruction brought on by war? Global conflicts of the 20th century fundamentally transformed not only national boundaries, power relations, and global economies, but also the arts and culture of every nation involved. An important, unacknowledged aspect of these conflicts is that they have unique musical soundtracks. Music in World War II explores how music and sound took on radically different dimensions in the United States and Europe before, during, and after World War II. Additionally, the collection examines the impact of radio and film as the disseminators of the war's musical soundtrack. Contributors contend that the European and American soundtrack of World War II was largely one of escapism rather than the lofty, solemn, heroic, and celebratory mode of "war music" in the past. Furthermore, they explore the variety of experiences of populations forced from their homes and interned in civilian and POW camps in Europe and the United States, examining how music in these environments played a crucial role in maintaining ties to an idealized "home" and constructing politicized notions of national and ethnic identity. This fascinating and well-constructed volume of essays builds understanding of the role and importance of music during periods of conflict and highlights the unique aspects of music during World War II"-- Beyond the Soundtrack Representing Music in Cinema *Univ of California Press* "Put briefly, this is a superb collection of essays. They are lucidly and eloquently written, and make their points with wit and clarity. They are full of perceptive, highly stimulating, and occasionally provocative illustrations of how practice connects to theory (and vice versa) without getting bogged down in academic language. The contributors include a combination of exceptionally admired film music scholars, and of musicologists renowned for their keen insights into the cultural contexts of music production and reception. This book is an excellent resource and compelling read."—Derek B. Scott, author of *From the Erotic to the Demonic: On Critical Musicology* *Directory of World Cinema: Finland* *Intellect Books* An important addition to Intellect's popular series, *Directory of World Cinema: Finland* provides historical and cultural overviews of the country's cinema. Over the course of their contributions to this volume, scholars from a variety of disciplines construct a collective argument that complicates the dominant international view of Finnish cinema as a small-scale industry dominated by realist art-house films. The contributors approach the topic from a variety of angles, covering genre, art, and commercial films; independent productions; blockbuster cinema; and Finnish cinema's industrial and historical contexts. By paying heed to Finland's cultural industries within the broader context of international political, economic, artistic, and industrial developments, they skillfully depict an ever-changing national

film culture that plays a dynamic role in the global cinematic landscape. The **Directory of World Cinema: Finland** will therefore expand not only global interest in Finnish cinema but also the parameters within which it is discussed. **Film World Popular Musics of the Non-Western World An Introductory Survey** *Oxford University Press on Demand* Reflecting the growing interest in popular music from the developing world, this book examines all major non-Western musical styles, from increasingly familiar genres like reggae and salsa, to the lesser-known regional styles of Africa, the Middle East, Latin America and Asia. **WORLD FILM LOCATIONS** Washington D.C. *Intellect Books* Freedom and democracy. With no shortage of iconic American landscapes, such as the vast National Mall, buildings, from the White House and the Capitol to the Watergate Hotel and the Kennedy Center for the Performing Arts, and monuments including the Washington Monument and the Vietnam Veterans Memorial, it is at once synonymous with the country it governs and totally a world apart. **World Film Locations: Washington, D. Foreign Review Hindi Film Songs and the Cinema *Routledge* Since their beginnings in the 1930s, Hindi films and film songs have dominated Indian public culture in India, and have also made their presence felt strongly in many global contexts. Hindi film songs have been described on the one hand as highly standardized and on the other as highly eclectic. Anna Morcom addresses many of the paradoxes eccentricities and myths of not just Hindi film songs but also of Hindi cinema by analysing film songs in cinematic context. While the presence of songs in Hindi films is commonly dismissed as purely commercial this book demonstrates that in terms of the production process, musical style, and commercial life, it is most powerfully the parent film that shapes and defines the film songs and their success rather than the other way round. While they constitute India's still foremost genre of popular music, film songs are also situational, dramatic sequences, inherently multi-media in style and conception. This book is uniquely grounded in detailed musical and visual analysis of Hindi film songs, song sequences and films as well as a wealth of ethnographic material from the Hindi film and music industries. Its findings lead to highly novel ways of viewing Hindi film songs, their key role in Hindi cinema, and how this affects their wider life in India and across the globe. It will be indispensable to scholars seeking to understand both Hindi film songs and Hindi cinema. It also forms a major contribution to popular music, popular culture, film music studies and ethnomusicology, tackling pertinent issues of cultural production, (multi-)media, and the cross-cultural use of music in Hindi cinema. The book caters for both music specialists as well as a wider audience. **Songs from the Edge of Japan: Music-making in Yaeyama and Okinawa *Routledge*** Since the early 1990s, Okinawan music has experienced an extraordinary boom in popularity throughout Japan. Musicians from this island prefecture in the very south of Japan have found success as performers and recording artists, and have been featured in a number of hit films and television dramas. In particular, the Yaeyama region in the south of Okinawa has long been known as a region rich in performing arts, and Yaeyaman musicians such as BEGIN, Daiku Tetsuhiro, and Natsukawa Rimi have been at the forefront of the recent Okinawan music boom. This popularity of Okinawan music represents only the surface of a diverse and thriving musical culture within modern-day Yaeyama. Traditional music continues to be an important component of traditional ritual and social life in the islands, while Yaeyama's unique geographical and cultural position at the very edge of Japan have produced varied discourses surrounding issues such as tradition versus modernity, preservation, and cultural identity. **Songs from the Edge of Japan** explores some of the reasons for the high profile of Yaeyaman music in recent years, both inside and outside Yaeyama. Drawing on extensive ethnographic fieldwork carried out since 2000, the book uses interviews, articles from the popular media, musical and lyrical analysis of field and commercial recordings, as well as the author's experiences as a performer of Yaeyaman and Okinawan music, to paint a picture of what it means to perform Yaeyaman music in

the 21st century. Billboard In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Culture, Music Education, and the Chinese Dream in Mainland China *Springer* This book focuses on the rapidly changing sociology of music as manifested in Chinese society and Chinese education. The combination of cultural politics, transformed authority relations, and officially approved songs can provide us with an understanding of the official content on the Chinese dream that is conveyed in today's Chinese society, and how these factors have influenced the renewal of values-based education and practices in school music education in China. Covering titles as diverse as Car Wash and Apocalypse Now, Le Samourai and Stalker, Shaft and Citizen Kane each entry outlines the film's distinctive contribution to the hitherto underexplored world of sound in cinema. The author guides the reader through an alternative cinema canon of the 'ear' of sonically exciting and remarkable films from all across the world and their amazing diversity of purpose and effect. This guide shows how most critics completely underestimate the significance of sound and how it is caught between the two irreconcilable forces of the 'sound track' and sound design. In his introduction and analysis (or more accurately 'hearing') of 100 films, the author compels the reader to 'listen not look' and to 'think with their ears'. **100 Film Scores and Sound Design** is a provocative and absorbing guide to some of the most exciting uses of sound in popular and international cinema. **The World of Shaft A Complete Guide to the Novels, Comic Strip, Films and Television Series** *McFarland* Mention Shaft and most people think of Gordon Parks' seminal 1971 film starring Richard Roundtree in a leather coat, walking the streets of Manhattan to Isaac Hayes' iconic theme music. But the black private dick who inspired the blaxploitation film genre actually made his debut on the printed page as the creation of a white novelist. Ernest Tidyman was a seasoned journalist down on his luck when he decided to try his hand at fiction. Shaft was the result, giving Tidyman the break he was looking for. He went on to become an Academy Award winning screenwriter and respected film producer. Based on extensive research of Tidyman's personal papers, this book tells the story of Shaft from the perspective of his creator. The author provides new insight and analysis of the writing of the Shaft novels, as well as the production of the films and TV series. First-ever coverage of the forgotten Shaft newspaper comic strip includes previously unseen artwork. Also included is Shaft's recent reappearance on the printed page, in both comic book and prose form. **Brainard's Musical World The Musical World Popular Song Soundtrack of the Century** *Watson-Guptill Publications* A lavishly illustrated, in-depth look at 100 of the most influential popular songs of the 20th century, with information on the singers, songwriters and sessions. 160 illustrations. **CMJ New Music Report** CMJ New Music Report is the primary source for exclusive charts of non-commercial and college radio airplay and independent and trend-forward retail sales. It discusses the rich history of soundtracks, from composed film scores to movie musicals and song compilations. Divided into three parts, the book begins with an essay tailing the

history of the field from its beginnings to the complex international business it has become, then offers an overview of many of the composers who have written music for movies over the years, each with a brief biographical sketch and a discussion of their best work as made available on long-playing records or compact discs, and finally looks at movie musicals and song compilation scores that have been issued over the years. A comprehensive bibliography is also included. *International Film Guide Sounding Off: Theorizing Disability in Music* (Routledge) Disability, understood as culturally stigmatized bodily difference (including physical and mental impairments of all kinds), is a pervasive and permanent aspect of the human condition. While the biology of bodily difference is the proper study for science and medicine, the meaning that we attach to bodily difference is the proper study of humanists. The interdisciplinary field of Disability Studies has recently emerged to theorize social and cultural constructions of the meaning of disability. Although there has been an astonishing outpouring of humanistic work in Disability Studies in the past ten years, there has been virtually no echo in musicology or music theory. *Sounding Off: Theorizing Disability in Music* is the first book-length work to focus on the historical and theoretical issues of music as it relates to disability. It shows that music, like literature and the other arts, simultaneously reflects and constructs cultural attitudes toward disability. *Sounding Off: Theorizing Disability in Music* promises to be a landmark study for scholars and students of music, disability, and culture. *World Art The Magazine of Contemporary Visual Arts*
