Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s -

show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future. **Billy's Sunflower Cambridge International Certificate in Financial English (Icfe)** BPP Publishing BPP Learning Media's ICFE Workbook is the ideal companion to assist students with technical English learning and to gain certification of their abilities which are recognised by thousands of educational organisations and employers worldwide. **The GMO Deception What You Need to Know about the Food, Corporations, and Government Agencies Putting Our Families and Our Environment at Risk** Simon and Schuster Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it. **Sociology in Focus for AQA A2 SB (Second Edition)** Longman This new edition provides a perfect match to AQA's new GCE specification. Men and Movements in the Primitive Church Paternoster Publishing It is plain even from Paul's own writings that other presentations of the Christian message than his own were current during his apostolic career. With some of these other presentations he is quite happy; against others he found it necessary to put his readers on their guard. In these four studies originally presented as the inaugural series of Didsbury Lectures at the British Isles Nazarene College, Manchester, F.F. Bruce discusses what we know about the history of non-Pauline Christianity in the first century. Judiciously drawing upon material from the whole of the New Testament, he relates it to other early Christian literature in order to provide a highly readable outline of an important area. But, as he warns, this book does not study the literature for its own sake. Instead, it focuses on the leaders of early non-Pauline Christianity, with their associates, from whom the literature provides indispensable evidence. The topics covered are: Chapter 1: Peter and the Eleven Chapter 2: Stephen and Other Hellenists Chapter 3: James and the Church of Jerusalem Chapter 4: John and his Circle
