Crimes of the Powerful

An Introduction

Routledge **As politicians and the media perpetuate the stereotype of the "common criminal," crimes committed by the powerful remain for the most part invisible, or are reframed as a "bad decision" or a "rare mistake." This is a topic that remains marginalized within the field of criminology and criminal justice, yet crimes of the powerful cause more harm, perpetuate more inequalities, and result in more victimization than street crimes. Crimes of the Powerful: An introduction is the first textbook to bring together and show the symbiotic relationships between the related fields of state crime, white-collar crime, corporate crime, financial crime, organized crime, and environmental crime. Dawn L. Rothe and David Kauzlarich introduce the many types of crimes, methodological issues associated with research, theoretical relevance, and issues surrounding regulations and social controls for crimes of the powerful. Themes covered include: media, culture, and the Hollywoodization of crimes of the powerful; theoretical understanding and the study of the crimes of the powerful; a typology of crimes of the powerful with examples and case studies; victims of the crimes of the powerful; the regulation and resistance of elite crime. An ideal introductory text for both undergraduate and postgraduate students taking modules on the crimes of the powerful, white-collar crime, state crime, and green criminology, this text includes**

chapter summaries, activities and discussion questions, and lists of additional resources including films, websites, and additional readings.

Kasher in the Rye

The True Tale of a White Boy from Oakland Who Became a Drug Addict, Criminal, Mental Patient, and Then Turned 16

Hachette UK A hopeful and inspiring "act of comedic magic" from comedian—and now memoirist!—Moshe Kasher (Artie Lange, #1 New York Times bestselling author of *Too Fat to Fish*). Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *Kasher in the Rye* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control—his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carroll...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Crimes of Globalization

Routledge This book addresses immensely consequential crimes in the world today that, to date, have been almost wholly neglected by students of crime and criminal justice: crimes of globalization. This term refers to the hugely harmful consequences of the policies and practices of international financial institutions - principally in the global South. A case is made for characterizing these policies and practices specifically as crime. Although there is now a substantial criminological literature on transnational crimes, crimes of states and state-corporate crimes, crimes of globalization intersect with, but are not synonymous with, these crimes. Identifying specific reasons why students of crime and criminal justice should have an interest in this topic, this text also identifies underlying assumptions, defines key terms, and situates crimes of globalization within the criminological enterprise. The authors also define crimes of globalization and review the literature to date on the topic; review the current forms of crimes of globalization; outline an integrated theory of crimes of globalization; and identify the challenges of controlling the international financial institutions that perpetrate crimes of globalization, including the role of an emerging Global Justice Movement. The authors of this book have published widely on white collar crime, crimes of states, state-corporate crime and related topics. This book will be essential reading for academics and students of crime and criminal justice who, the authors argue, need to attend to emerging forms of crime that arise specifically out of the conditions of globalization in our increasingly globalized, rapidly changing world.

The Red Arrow

Hachette UK 'It was a strange time. He felt like he was happy. It was strange because it wasn't so long ago that he was convinced the only way out of the depression that had crippled him since he was a child, was death.' But now, he is on a high-speed train travelling from Rome to Modena, a failed novelist on the tail of a famous physicist whose memoir he is ghostwriting. The more of another man's life he writes, the more his debt to his publisher is paid off. But nothing would be possible, not the journey, not the writing, not his beautiful wife who is waiting for him at the hotel, had he not experienced the life-altering, life-saving treatment for the darkness which had been hovering since the chemical spill in West Virginia. As the narrator untangles the past in his bid to rewrite the future, he spirals across time, exploring memory, our sense of self and the ways we are connected. A devastating insight into depression, it's also a mind-expanding, exhilarating experience of the power of psychedelic therapy to transform a life.

Stereotyping of U.S. Business Leaders Exposed

Day

Geoffrey Young Poetry. "I am spending my 39th year practicing uncreativity. On Friday, September 1, 2000, I began retyping the day's NEW YORK TIMES word for word, letter for letter, from the upper left hand corner to the lower right hand corner, page by page." With these words, Kenneth Goldsmith embarked upon a project which he termed "uncreative writing", that is: uncreativity as a constraint-based process; uncreativity as a creative practice. By typing page upon page, making no distinction between article, editorial and advertisement, disregarding all typographic and graphical treatments, Goldsmith levels the daily newspaper. DAY is a monument to the ephemeral, comprised of yesterday's news, a fleeting moment concretized, captured, then reframed into the discourse of literature. "When I reach 40, I hope to have cleansed myself of all creativity"-Kenneth Goldsmith.

Janey the Vet

Saving Sri Lanka's Street Dogs

Michael O'Mara Books 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless

work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

Medical Anthropology

A Biocultural Approach

Oxford University Press, USA Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Odes

Random House 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, Observer Book of the Year Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her - the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here - Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.
