**Financial Ecosystem and Strategy in the Digital Era Global Approaches and New Opportunities** Springer Nature This book analyses and discusses current issues and trends in finance with a special focus on technological developments and innovations. The book presents an overview of the classical and traditional approaches of financial management in companies and discusses its key strategic role in corporate performance. Furthermore, the volume illustrates how the emerging technological innovations will shape the theory and practice of financial management, focusing especially on the decentralized financial ecosystems that blockchain and its related technologies allow. **The Changing Role of Geological Surveys** Geological Society of London Senior managers and Heads of Geological Survey Organizations (GSOs) from around the world have contributed a collection of papers to provide a benchmark on how GSOs are responding to national and international needs in a rapidly changing world. GSOs continue to provide key scientific information about Earth systems, natural hazards and climate change. As countries adopt sustainable development principles and the public increasingly turns to social media to find information about resource and environmental issues, the generation and communication of Earth science knowledge become increasingly important. This volume provides a snapshot of how GSOs are adapting their activities to this changing world. The different national perspectives presented converge around several common themes related to resources, environment and big data. Climate change and the UN's Sustainable Development Goals provide an increased incentive for GSOs of the world to work in harmony, to generate knowledge of Earth systems and to provide solutions for sustainable management of the planet. **Digital Solutions for Contemporary Democracy and Government** IGI Global The dot-com revolution has brought many advances before unimagined. Of them all, it may be said that none have surpassed e-government in attracting a significant number of researchers and practitioners from around the world. However, the question remains whether everyone is ready to join the e-government movement, or if some are just blindly following the latest trend. Digital Solutions for Contemporary Democracy and Government touches on several key issues and challenges surrounding the recent e-government boom and offers practical solutions from those who have been a part of implementing e-government programs internationally. Due to its breadth of discussion on a variety of topics relating to the intersection of technology with politics, democracy, and government, this authoritative book is a valuable reference source for professionals, researchers, and students in the field of e-government, information management, or knowledge management. **OECD Economic Surveys: Iceland 2013** OECD Publishing OECD's 2013 Economic Survey of Iceland examines recent economic developments, policies and prospects. It includes a special feature on reinforcing the public debt reduction strategy. **Humanism and Resilience in Residency Training A Guide to Physician Wellness** Springer Nature This book aims to help identify pre-existing adaptive traits and positive perspectives in resident trainees, while challenging those that are less adaptive by building a formal curriculum for medical education that focuses on the humanistic aspects of medicine. Humanism in medicine is threatened by the false narrative that good physicians are superhumans who do not have their own needs. Written by experts in the field, this book is designed to be a concise, integrated guide to resilience during residency training. Through this guide, trainees learn (i) the usefulness of psychotherapeutic strategies for their own stress management and well-being; (ii) techniques and strategies that are useful in the practice of medicine; and (iii) to consider lifestyle modifications to improve physical and psychological health and well-being, through identification of positive and negative lifestyle factors influencing physicians' response to stress. Since it is designed for busy trainees and physicians, this volume meticulously provides easy-to-use, evidence-based learning tools and therapeutic techniques, including case studies, skill-building exercises, self-test questionnaires, illustrations, useful practice-reminder tips, and other features. Humanism and Resilience in Residency Training is an excellent resource for all medical trainees and professionals who need to incorporate humanism and resilience in their practice, both for accreditation requirements and for personal well-being. This includes medical students and residents, psychiatrists, addiction medicine specialists, family physicians, medical education professionals, hospitalists, nurses, and all healthcare providers **Contemporary Issues in Management, Second Edition A Critical Management Approach** Edward Elgar Publishing The new second edition of Contemporary Issues in Management is a must have for anyone teaching or wishing to better understand the field of critical management studies. The book combines a range of theoretical essays with insights into the present-day world of work, business and organizing, gathering together cases from banking and financial services, voluntary and charity work, factory and food production among others. This second edition evaluates some of the recent impacts of policy and economic change on business and management, as well as introducing and exploring a range of international examples. Together, the authors lend a critical perspective to organizational enquiries with relevance to a number of debates which will be invaluable to those seeking practical as well as philosophical insights into the nature of business and work in a current climate of uncertainty, austerity and change. **Teaching in the Post COVID-19 Era**

**World Education Dilemmas, Teaching Innovations and Solutions in the Age of Crisis** Springer Nature This handbook showcases extraordinary educational responses in exceptional times. The scholarly text discusses valuable innovations for teaching and learning in times of COVID-19 and beyond. It examines effective teaching models and methods, technology innovations and enhancements, strategies for engagement of learners, unique approaches to teacher education and leadership, and important mental health and counseling models and supports. The unique solutions here implement and adapt effective digital technologies to support learners and teachers in critical times – for example, to name but a few: Florida State University’s Innovation Hub and interdisciplinary project-based approach; remote synchronous delivery (RSD) and blended learning approaches used in Yorkville University’s Bachelor of Interior Design, General Studies, and Business programs; University of California’s strategies for making resources affordable to students; resilient online assessment measures recommended from Qatar University; strategies in teacher education from the University of Toronto/OISE to develop equity in the classroom; simulation use in health care education; gamification strategies; innovations in online second language learning and software for new Canadian immigrants and refugees; effective RSD and online delivery of directing and acting courses by the Toronto Film School, Canada; academic literacy teaching in Colombia; inventive international programs between Japan and Taiwan, Japan and the USA, and Italy and the USA; and, imaginative teaching and assessment methods developed for online Kindergarten – Post-Secondary learners and teachers. Authors share unique global perspectives from a network of educators and researchers from more than thirty locations, schools, and post-secondary institutions worldwide. Educators, administrators, policymakers, and instructional designers will draw insights and guidelines from this text to sustain education during and beyond the COVID-19 era. **Advances in Manufacturing II Volume 1 - Solutions for Industry 4.0** Springer This book covers a variety of topics related to the Industry 4.0 concept, with a special emphasis on the efficiency of production processes and innovative solutions for smart factories. It describes tools supporting this concept in both the mechanical engineering and biomedical engineering field. The content is based on papers presented at the 6th International Scientific-Technical Conference MANUFACTURING 2019, held on 19-22 May 2019, in Poznan, Poland. Virtual reality, simulation of manufacturing systems, additive manufacturing, big data analysis, automation and application of artificial intelligence, as well as economic and social issues related to the integration of those technologies are just some of the topics discussed here. All in all, the book offers a timely and practice-oriented reference guide for researchers and practitioners, and is expected to foster better communication and closer cooperation between universities and their business and industrial partners. **Technological Solutions for Sustainable Business Practice in Asia** IGI Global Central Asian countries play a geostrategic role in world economy and politics. **Handbook of**

**Research on Agricultural Policy, Rural Development, and Entrepreneurship in Contemporary Economies** IGI Global Promoting rural entrepreneurship is a necessary step to limit the negative effects of classical agricultural policy based on a linear process and attracting secondary resources to the economic process. The analysis of agricultural policy and rural development in conjunction to entrepreneurship in terms of production may represent a further step in understanding the role and importance of diversifying the rural potentials in contemporary economies. The Handbook of Research on Agricultural Policy, Rural Development, and Entrepreneurship in Contemporary Economies is an essential publication of academic research that examines agricultural policy and its impact on shaping future resilient economy in rural areas and identifies green business models and new business patterns in rural communities. Covering a range of topics such as entrepreneurship, product management, and marketing, this book is ideal for researchers, policymakers, academicians, economists, agriculture professionals, rural developers, business investors, and students.

**Traditions and Innovations in Contemporary Tourism** Cambridge Scholars Publishing This book presents significant theoretical and empirical studies of various aspects of hospitality and tourism from the perspectives of both tradition and innovation. With thirty-nine contributors from Bulgaria, Croatia, Indonesia, Italy, Portugal, Slovenia, Switzerland, Turkey, and the USA, it offers a collection of recent regional and marketing studies. The first part is dedicated to traditional tourism and hospitality issues ranging from tourism policy and planning and management practices, through cultural event marketing to the need for more intercultural communication. Special attention is paid to new developments in specialised types of tourism and specific tourist destinations. The second part of the book deals with new developments in the tourism industry offering a range of chapters on new technologies and techniques, the modern concept of urban and city tourism development and specific new and innovative tourism types and products.

**Posthuman Capital and Biotechnology in Contemporary Novels** Springer Nature This book examines several distinctive literary figurations of posthuman embodiment as they proliferate across a range of internationally acclaimed contemporary novels: clones in Kazuo Ishiguro's *Never Let Me Go*, animal-human hybrids in Margaret Atwood's *Oryx and Crake*, toxic bodies in Indra Sinha's *Animal's People*, and cyborgs in Jeanette Winterson's *The Stone Gods*. While these works explore the transformational power of the "biotech century," they also foreground the key role human capital theory has played in framing human belonging as an aspirational category that is always and structurally just out of reach, making contemporary subjects never-human-enough. In these novels, the dystopian character of human capital theory is linked to fantasies of apocalyptic release. As such, these novels help expose how two interconnected genres of futurity (the dystopian and the apocalyptic) work in tandem to propel each other forward so that fears of global disaster become alibis for dystopian control, which, in turn, becomes the predicate for intensifying catastrophes. In analyzing these novels, Justin Omar Johnston draws attention to the entanglement of bodies in technological environments, economic networks, and deteriorating ecological settings.

**Juries in the Japanese Legal System The Continuing Struggle for Citizen Participation and Democracy** Routledge Trial by jury is not a fundamental part of the Japanese legal system, but there has been a recent important move towards this with the introduction in 2009 of the lay assessor system whereby lay people sit with judges in criminal trials. This book considers the debates in Japan which surround this development. It examines the political and socio-legal contexts, contrasting the view that the participation of ordinary citizens in criminal trials is an important manifestation of democracy, with the view that Japan as a society where authority is highly venerated is not natural territory for a system where lay people are likely to express views at odds with expert judges. It discusses Japan's earlier experiments with jury trials in the late 19th Century, the period 1923-43, and up to 1970 in US-controlled Okinawa, compares developing views in Japan on this issue with views in other countries, where dissatisfaction with the jury system is often evident, and concludes by assessing how the new system in Japan is working out and how it is likely to develop.
