The Deadly Life of Logistics Mapping Violence in Global Trade U of Minnesota Press In a world in which global trade is at risk, where warehouses and airports, shipping lanes and seaports try to guard against the likes of Al Qaeda and Somali pirates, and natural disaster can disrupt the flow of goods, even our “stuff” has a political life. The high stakes of logistics are not surprising, Deborah Cowen reveals, if we understand its genesis in war. In *The Deadly Life of Logistics*, Cowen traces the art and science of logistics over the last sixty years, from the battlefield to the boardroom and back again. Focusing on choke points such as national borders, zones of piracy, blockades, and cities, she tracks contemporary efforts to keep goods circulating and brings to light the collective violence these efforts produce. She investigates how the old military art of logistics played a critical role in the making of the global economic order—not simply the globalization of production, but the invention of the supply chain and the reorganization of national economies into transnational systems. While reshaping the world of production and distribution, logistics is also actively reconfiguring global maps of security and citizenship, a phenomenon Cowen charts through the rise of supply chain security, with its challenge to long-standing notions of state sovereignty and border management. Though the object of corporate and governmental logistical efforts is commodity supply, *The Deadly Life of Logistics* demonstrates that they are deeply political—and, considered in the context of the long history of logistics, deeply indebted to the practice of war. **Policing, Port Security and Crime Control An Ethnography of the Port Securityscape Routledge** Ports are the vital hubs of the maritime transport industry, and crucial to the flow of global trade. The protection of this global supply chain from crime and terrorism is a fundamental objective of port security, and is a landscape beset by new challenges and changes post 9/11. Building on multi-sited ethnographic fieldwork in two major European ports, Yarin Eski discusses how operational policing and security realities and identities are established, and examines how industrial commercialization has aggravated security issues. **Policing, Port Security and Crime Control** offers a compelling empirically balanced account of the attitudes and practices of port police officers and security officers, exploring the everyday realities and ambitions of these street-level professionals as they seek to (re)establish a meaningful occupational identity. In doing so, this book presents a criminological understanding of the way that security questions and procedures are integrated into the daily lives of those that protect the industrial port sites, where they themselves must interrupt the global supply chain in order to defend it. Exploring topics such as port security management, multi-agency policing, port theft, drug trafficking, human smuggling and terrorism, this book offers a major contribution to the growing literature on transnational crime and security and is one of the first to offer an ethnographic approach to port security. This book is interdisciplinary and will appeal to criminologists, sociologists, ethnographers and those engaged with policing and security studies, as well as professionals in the field of multi-agency policing, border control, security and governance of the port and wider maritime industry. **Warehousing and Storage A Guide to Health and Safety The Rule of Logistics Walmart and the Architecture of Fulfillment U of Minnesota Press** Every time you wheel a shopping cart through one of Walmart’s more than 10,000 stores worldwide, or swipe your credit card or purchase something online, you enter a mind-boggling logistical regime. Even if you’ve never shopped at Walmart, its logistics have probably affected your life. The Rule of Logistics makes sense of its spatial and architectural ramifications by analyzing the stores, distribution centers, databases, and inventory practices of the world’s largest corporation. The Rule of Logistics tells the story of Walmart’s buildings in the context of the corporation’s entire operation, itself characterized by an obsession with logistics. Beginning with the company’s founding in 1962, Jesse LeCavalier reveals how logistics—as a branch of knowledge, an area of work, and a collection of processes—takes shape and changes our built environment. Weaving together archival material with original drawings, LeCavalier shows how a diverse array of ideas, people, and things—military theory and chewing gum, Howard Dean and satellite networks, Hudson River School painters and real estate software, to name a few—are all connected through Walmart’s logistical operations and in turn are transforming how its buildings are conceptualized, located, built, and inhabited. A major new contribution to architectural history and theory, *The Rule of Logistics* helps us understand how retailing today is changing our bodies, brains, buildings, and cities and predicts what future forms architecture might take when shaped by systems that exceed its current capacities. **The Handbook of Logistics and Distribution Management Kogan Page Publishers** Designed for students, young managers and seasoned practitioners alike, this handbook explains the nuts and bolts of the modern logistics and distribution world in plain language. Illustrated throughout, this second edition includes new chapters on areas previously not covered, such as: intermodal transport; benchmarking; environmental matters; and vehicle and depot security. **Coronavirus: A Book for Children Nosy Crow** What is the coronavirus, and why is everyone talking about it? Engagingly illustrated by Axel Scheffler, this approachable and timely book helps answer these questions and many more, providing children aged 5-10 and their parents with clear and accessible explanations about the coronavirus and its effects - both from a health perspective and the impact it has on a family’s day-to-day life. With input from expert consultant Professor Graham Medley of the London School of Hygiene & Tropical Medicine, as well as advice from teachers and child psychologists, this is a practical and informative resource to help explain the changes we are currently all experiencing. The book is free to read and download, but Nosy Crow would like to encourage readers, should they feel in a position to, to make a donation to: <https://www.nhscharitiestogether.co.uk/> **Logistics and Supply Chain Management eBook Pearson UK** Effective development and management of a supply chain network is an invaluable source of sustainable advantage in today’s turbulent global marketplace, where demand is difficult to predict and supply chains need to be more flexible as a result. This updated 4th edition of the bestselling *Logistics and Supply Chain Management* is a clear-headed guide to all the key topics in an integrated approach to supply chains, including: • The link between logistics and customer value. • Logistics and the bottom line measuring costs and performance. • Creating a responsive supply chain. • Managing the global pipeline. • Managing supply chain relationships. • Managing risk in the supply chain. • Matching supply and demand. • Creating a sustainable supply chain. • Product design in the supply chain. **Review of Maritime Transport 2020** This series contains the decisions of the Court in both the English and French texts. **Recommendations on the Transport of Dangerous Goods: Model ... Transport of Dangerous Goods Methods and Tools for Reducing the Risks of Accidents and Terrorist Attack Springer Science & Business Media** This book addresses the various risks associated with the transport of dangerous goods within a territory. The emphasis of the contributions is on methods and tools to reduce the vulnerability of both the environment and human society to accidents or malicious acts involving such transport. With topics ranging from game theory to governance principles, the authors together cover technical, legal, financial, and logistic aspects of this problem. The intended audience includes responsible persons in territorial organizations, managers of transport infrastructures, as well as students, teachers and researchers wishing to deepen their knowledge in this area. **Emergency and Trauma Care for Nurses and Paramedics - eBook Elsevier Health Sciences** Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of *Emergency and Trauma Care for Nurses and Paramedics* continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. **Additional resources on evolve eBook on VitalSource** Instructor resources: PowerPoint slides Test bank Paramedic test bank Case study questions and answers Image collection Additional case studies with answers and rationales Additional paramedic case studies with answers and rationales Student and Instructor resources: Additional case studies Additional paramedic case studies Videos Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHS 2e, NMBA and PBA Standards An eBook included in all print purchases Issue 1 - Premiere Issue of *Atlantis Rising Magazine* *Atlantis Rising magazine* In this 88-page Premiere Issue #1: Top 10 Ancient Civilizations with Advanced Technology BY David Hatcher Childress John Anthony West An candid conversation *Tropical Disease Threat Electro-Magnetic Pollution* James Redfield *The Atlantis Dimension* Graphic Novel part One ANCIENT MYSTERIES Critical Globalization Studies Psychology Press First Published in 2005. Routledge is an imprint of Taylor & Francis, an informa company. **The Solid Facts Social Determinants of Health Sustainable Textiles Life Cycle and Environmental Impact Elsevier** Environmental issues are playing an increasingly important role in the textile industry, both from the point of view of government regulation and consumer expectations. *Sustainable textiles* reviews ways of achieving more sustainable materials and technologies as well as improving recycling in the industry. The first part of the book discusses ways of improving sustainability at various points in the supply chain. Chapters discuss how sustainability can be integrated into textile design, ensuring more sustainable production of both natural and synthetic fibres, improving sustainability in processes such as dyeing as well as more environmentally-friendly technologies including enzyme and plasma technologies. The second part of the book reviews consumer perceptions of recycled textiles, eco-labelling, organic textiles and the use of recycled materials in textile products. With a distinguished editor and an impressive range of international contributors, *Sustainable textiles* is an important reference for the textile industry and those researching this important topic. **Reviews** government regulations and consumer expectations about environmental impact on the textiles industry **Discusses** ways of achieving more sustainable materials and technologies as well as textiles recycling **Examines** how sustainability can be integrated into textile design, production and processes **Darwin’s Dangerous Idea Evolution and the Meanings of Life** Offers a wider perspective on Darwin’s scientific theory of natural selection, explaining how it extends beyond biology, analyzing current controversies over the origins of life and inherent biases, and challenging popular philosophies. 35,000 first printing. **Tour. UK In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ...Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness. The Enthusiasts Paj Publication Global Trends 2030 Alternative Worlds Createspace Independent Publishing Platform This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Keywords: Global Trends 2030 Alternative Worlds, global trends 2030, Global Trends series, National Intelligence Council, global trajectories, global megatrends, geopolitics, geopolitical changes Pricing Lives Guideposts for a Safer Society Princeton University Press How society's undervaluing of life puts all of us at risk--and the groundbreaking economic measure that can fix it Like it or not, sometimes we need to put a monetary value on people's lives. In the past, government agencies used the financial "cost of death" to monetize the mortality risks of regulatory policies, but this method vastly undervalued life. Pricing Lives tells the story of how the government came to adopt an altogether different approach--the value of a statistical life, or VSL--and persuasively shows how its more widespread use could create a safer and more equitable society for everyone. In the 1980s, W. Kip Viscusi used the method to demonstrate that the benefits of requiring businesses to label hazardous chemicals immensely outweighed the costs. VSL is the risk-reward trade-off that people make about their health when considering risky job choices. With it, Viscusi calculated how much more money workers would demand to take on hazardous jobs, boosting calculated benefits by an order of magnitude. His current estimate of the value of a statistical life is \$10 million. In this book, Viscusi provides a comprehensive look at all aspects of economic and policy efforts to price lives, including controversial topics such as whether older people's lives are worth less and richer people's lives are worth more. He explains why corporations need to abandon the misguided cost-of-death approach, how the courts can profit from increased application of VSL in assessing liability and setting damages, and how other countries consistently undervalue risks to life. Pricing Lives proposes sensible economic guideposts to foster more protective policies and greater levels of safety in the United States and throughout the world. Women's Reading in Britain, 1750-1835 A Dangerous Recreation Cambridge University Press The first broad overview and detailed analysis of female reading audiences in this period. Emergency and Trauma Care for Nurses and Paramedics Elsevier Health Sciences The second edition of Emergency and Trauma Care for Nurses and Paramedics provides the most up-to-date and comprehensive coverage of clinical procedures and issues encountered in contemporary emergency care in Australia and New Zealand. Written by leading academics and clinicians, this fully revised and updated edition follows the patient's journey from pre-hospital retrieval to definitive care. With a strong focus on multidisciplinary care, this evidence-based emergency and trauma resource will appeal to pre-hospital care providers, rural, remote and urban emergency nurses and allied health professionals, as well as disaster management and interfacility transport staff. Essential concepts are covered in a logical order, commencing with: An introduction to emergency professions and professional issues Clinical and health systems Patient presentations ordered by body system as well as toxicology, envenomation, ocular, environmental emergencies and unique population groups Major trauma assessment and management and end-of-life care information and considerations. Emergency and Trauma Care for Nurses and Paramedics 2e continues to be the pre-eminent resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary care from retrieval through to rehabilitation. A cultural safety approach is included throughout - addressing cultural diversity, beliefs and values and focusing on Aboriginal and Torres Strait Islander health and Māori health Essentials outline the main points addressed in each chapter Practice tips throughout assist with communication skills, procedures and assessment Case studies are supported by questions and answers to encourage active learning New online resources available on Evolve, including over 30 new case studies with paramedic-specific questions. Highlighted skills - cross references to the Clinical Skills chapter throughout text Over 30 new case studies Patient journey from pre-hospital and emergency-specific case studies Critical thinking questions at the end of chapters Chapter 35 Obstetric emergencies now includes 'Supporting a normal birth'. (Re)Constructing Memory: School Textbooks and the Imagination of the Nation Springer This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political, social, and economic change. Drawing on a range of analytic strategies, the authors examine history and civics textbooks, and the teaching of such texts, along with other prominent curricular materials--children's readers, a required text penned by the head of state, a holocaust curriculum, etc.. The authors analyze the uses of history and pedagogy in building, reinforcing and/or redefining the nation and state especially in the light of challenges to its legitimacy. The primary focus is on countries in developing or transitional contexts. Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance; shifts in teaching about the Khmer Rouge in post-conflict Cambodia; children's readers used to define national space in former republics of the Soviet Union; the development of Holocaust education in a context where citizens were both victims and perpetrators of violence; the creation of a national past in Turkmenistan; and so forth. The case studies are supplemented by commentary, an introduction and conclusion. Life of Pi Vintage Canada Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe. Megatrends and Air Transport Legal, Ethical and Economic Issues Springer This book discusses megatrends and subsequently applies them to the air transport industry from a legal, ethical and economic perspective. Starting with a detailed discussion on what these megatrends are, the book provides an essential overview of megatrends and air transport, including analytical discussions on how megatrends could affect basic issues such as nationalism and sovereignty, market access in air transport, and commercial space transport. It also delves into the rights of the airline passenger as affected by megatrends. Further, the book analyses a broad range of topics, including: the digital transformation of air transport; technology and air transport; robotic pilots and their legal ramifications; the human-robot interface and the law with focus on the pilot; cognitive computing; and issues of empowerment and connectivity. It discusses in detail United Nations initiatives and initiatives of the International Civil Aviation Organization, considering aspects such as: the new world order; e-trends and air transport; apps that make air travel easier; and apps designed to help the aviation authorities. Further topics include artificial intelligence and air transport and related technical, ethical and economic issues, as well as a legal inquiry into manufacturer's defects; design defects; and liability for failure to warn of defects. Questions are posed and answers provided on the effects of artificial intelligence and legal issues stemming from its use in air transport. Two major discussions follow on millennials and air transport, and on the Internet of everything as related to air transport. The conclusion ties in megatrends with air transport and offers the industry a way forward for adapting to these trends. Manual of Tests and Criteria The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria". The Advocate The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States. Kensuke's Kingdom Scholastic Inc. When Michael is swept off his family's yacht, he washes up on a desert island, where he struggles to survive--until he finds he is not alone. Bulletin of the Atomic Scientists The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world. Ebersole & Hess' Toward Healthy Aging E-Book Human Needs and Nursing Response Elsevier Health Sciences Ensure you thoroughly understand the intricate details of providing effective care for adults as they age. Ebersole & Hess' Toward Healthy Aging, 10th Edition is the only comprehensive gerontological nursing text that effectively communicates how to provide holistic care, promote healthy lives, and address end-of-life issues and concerns. Grounded in the core competencies recommended by the AACN in collaboration with the Hartford Institute for Geriatric Nursing, the tenth edition has been extensively revised and updated with shorter, more streamlined chapters and pedagogical features to facilitate learning. It covers the areas of safety and ethical considerations, genetics, communication with the patient and caregiver, promoting health in persons with conditions commonly occurring in later-life world-wide addressing loss and palliative care and much more. Special sections provide an honest look at the universal experience of aging and the nurse's role in the reduction of health disparities and inequities as a member of the global community. Plus, it contains a variety of new learning features that focus on applying research and thinking critically in when providing care to aging adults across the care continuum. PISA Take the Test Sample Questions from OECD's PISA Assessments Sample Questions from OECD's PISA Assessments OECD Publishing This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment. Carbon Dioxide Capture and Storage Special Report of the Intergovernmental Panel on Climate Change Cambridge University Press IPCC Report on sources, capture, transport, and storage of CO2, for researchers, policy-makers and engineers. Global Trends 2030 Alternative Worlds : a Publication of the National Intelligence Council U.S. Government Printing Office This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which

would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report. Caffeine for the Sustainment of Mental Task Performance Formulations for Military Operations National Academies Press This report from the Committee on Military Nutrition Research reviews the history of caffeine usage, the metabolism of caffeine, and its physiological effects. The effects of caffeine on physical performance, cognitive function and alertness, and alleviation of sleep deprivation impairments are discussed in light of recent scientific literature. The impact of caffeine consumption on various aspects of health, including cardiovascular disease, reproduction, bone mineral density, and fluid homeostasis are reviewed. The behavioral effects of caffeine are also discussed, including the effect of caffeine on reaction to stress, withdrawal effects, and detrimental effects of high intakes. The amounts of caffeine found to enhance vigilance and reaction time consistently are reviewed and recommendations are made with respect to amounts of caffeine appropriate for maintaining alertness of military personnel during field operations. Recommendations are also provided on the need for appropriate labeling of caffeine-containing supplements, and education of military personnel on the use of these supplements. A brief review of some alternatives to caffeine is also provided. Murray & Nadel's Textbook of Respiratory Medicine E-Book Elsevier Health Sciences Known for its clear readability, thorough coverage, and expert authorship, Murray & Nadel's Textbook of Respiratory Medicine has long been the gold standard text in the fast-changing field of pulmonary medicine. The new 7th Edition brings you fully up to date with newly expanded content, numerous new chapters, a new editorial team, and extensive updates throughout. It covers the entire spectrum of pulmonology in one authoritative point-of-care reference, making it an ideal resource for pulmonary physicians, fellows, and other pulmonary practitioners. Offers definitive, full-color coverage of basic science, diagnosis, evaluation, and treatment of the full range of respiratory diseases. Provides detailed explanations of each disease entity and differential diagnoses with state-of-the-art, evidence-based content by global leaders in the field. Contains a newly expanded section on common presentations of respiratory disease, plus new chapters on COVID-19, asthma and obesity, airplane travel, lung cancer screening, noninvasive support of oxygenation, lung microbiome, thoracic surgery, inhaled substances, treatment of lung cancer, and more. Covers hot topics such as vaping; advanced ultrasound applications and procedures; interventional pulmonology; immunotherapy; lung cancer targeted therapy; outbreaks, pandemics and bioterrorism; point-of-care ultrasound; use of high-flow oxygen, and more. Includes extensively reorganized sections on basic science, pleural disease, and sleep, with new chapters and approaches to the topics. Features more than 1,450 anatomic, algorithmic, and radiologic images (400 are new!) including CT, PET, MR, and HRCT, plus extensive online-only content: 200 procedural and conceptual videos plus audio clips of lung sounds. Brings you up to date with the latest respiratory drugs, mechanisms of action, indications, precautions, adverse effects, and recommendations, with increased emphasis on algorithms to illustrate decision making. Safety Signs and Signals The Health and Safety (Safety Signs and Signals) Regulations 1996: Guidance on Regulations Safety Signs and Signals : The Health and Safety (Safety Signs and Signals) Regulations 1996: Guidance on Regulations The Fourth Industrial Revolution Penguin UK The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.
