PROBLEM-ORIENTED POLICING

CreateSpace The classic book on problem-oriented policing (POP), is now back in print. Written by Professor Herman Goldstein, one of the most highly regarded scholars in the field of policing who originated the POP concept, this monograph presents a new model for developing police services that corrects for the inadequacies and conflicts inherent in the traditional model. While originally published in 1990, the concept is even more relevant today as a response to meeting current concerns regarding the complex role of the police in a society that seeks to increase police effectiveness while placing the highest value on operating in accord with democratic principles. It calls for reorienting police agencies so that they place highest emphasis on: (1) analyzing each of the specific behavioral problems that the public expects them to handle; (2) developing new, creative, tailor-made responses to each such problem, giving top priority to preventive measures and trying to avoid over dependence on the criminal justice system, and engaging the community more fully; (3) realigning their organization, leadership, recruitment and training to support this orientation.

ENCYCLOPEDIA OF COMMUNITY POLICING AND PROBLEM SOLVING

SAGE Publications Community policing, as a philosophy, supports the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues, including crime, social disorder, and fear of crime—as opposed to responding to crime after it occurs. Community policing expands the traditional police mandate. It broadens the focus of fighting crime to include solving community problems and forming partnerships with people in the community so average citizens can contribute to the policing process. Originating during police reform efforts of the 1970s, the philosophy of community policing is currently widespread and embraced by many citizens, police administrators, scholars, and local and federal politicians. What sorts of collaborative partnerships have evolved between policing agencies and the individuals and communities they serve? How do police departments engage in systematic examination of identified problems to develop effective responses? How have police departments aligned their organizational structures to best support community partnerships and proactive problem solving? Just how effective have efforts at community policing been? These questions and more are explored within the pages of this new reference work.

THE FUNCTIONS OF THE POLICE IN MODERN SOCIETY

A REVIEW OF BACKGROUND FACTORS, CURRENT PRACTICES, AND POSSIBLE ROLE MODELS

INJURY EPIDEMIOLOGY: FOURTH EDITION

Lulu.com Research on injuries is a high priority to inform public policy that reduces deaths, hospitalizations and associated costs. Principles for research design and analysis of injury incidence and severity are emphasized. Review of extant surveillance data reveals numerous flaws that must be changed to increase usefulness of the data. Research designs of studies of injury causation and evaluation of countermeasures are often inappropriate and mislead analytic and injury control efforts. Appendices to chapters illustrate research projects that influenced public policy affecting the reduction of motor vehicle fatalities per population by half in the U.S. The principles illustrated by these studies can be applied to other types of injury.

Initiative. The book also discusses pre-incident indicators, the radicalization process, and behavioral traits associated with terrorism. AN INTRODUCTION TO CRIME AND CRIMINOLOGY

Pearson Australia *An Introduction to Crime & Criminology 4e, continues to bring together some of Australia's most widely respected authorities on criminology. The text explores popular knowledge and understanding about crime, contrasting it with what we know about crime from official sources as well as from crime victims. The authors present and analyse the various ways that crime is defined and measured, the many and varied dimensions of crime, the broad range of theories offered to explain crime as well as some of the main ways governments and other agencies respond to and attempt to prevent crime.*

ENCYCLOPEDIA OF LAW ENFORCEMENT

SAGE *This three-volume Encyclopedia of Law Enforcement provides a comprehensive, critical, and descriptive examination of all facets of law enforcement on the state and local, federal and national, and international stages. This work is a unique reference source that provides readers with informed discussions on the practice and theory of policing in an historical and contemporary framework. The volumes treat subjects that are particular to the area of state and local, federal and national, and international policing. Many of the themes and issues of policing cut across disciplinary borders, however, and several entries provide comparative information that places the subject in context.*

POLICING AND MEDIA

PUBLIC RELATIONS, SIMULATIONS AND COMMUNICATIONS

Routledge *This book examines the relationship between police, media and the public and analyses the shifting techniques and technologies through which they communicate. In a critical discussion of contemporary and emerging modes of mediatized police work, Lee and McGovern demonstrate how the police engage with the public through a fluid and quickly expanding assemblage of communications and information technologies. Policing and Media explores the rationalities that are driving police/media relations and asks; how these relationships differ (or not) from the ways they have operated historically; what new technologies are influencing and being deployed by policing organizations and police public relations professionals and why; how operational policing is shaping and being shaped by new technologies of communication; and what forms of resistance are evident to the manufacture of preferred images of police. The authors suggest that new forms of simulated and hyper real policing using platforms such as social media and reality television are increasingly positioning police organisations as media organisations, and in some cases enabling police to bypass the traditional media altogether. The book is informed by empirical research spanning ten years in this field and includes chapters on journalism and police, policing and social media, policing and reality television, and policing resistances. It will be of interest to those researching and teaching in the fields of Criminology, Policing and Media, as well as police and media professionals.*

THE END OF POLICING

Verso Books **LOS ANGELES TIMES BESTSELLER** *The problem is not overpolicing, it is policing itself. Why we need to defund the police and how we get there. Recent weeks have seen an explosion of protest against police brutality and repression. Among activists, journalists and politicians, the conversation about how to respond and improve policing has focused on accountability, diversity, training, and community relations. Unfortunately, these reforms will not produce results, either alone or in combination. The core of the problem must be addressed: the nature of modern policing itself. This book attempts to spark public discussion by revealing the tainted origins of modern policing as a tool of social control. It shows how the expansion of police authority is inconsistent with community empowerment, social justice— even public safety. Drawing on groundbreaking research from across the world, and covering virtually every area in the increasingly broad range of police work, Alex Vitale demonstrates how law enforcement has come to exacerbate the very problems it is supposed to solve. In contrast, there are places where the robust implementation of policing alternatives—such as*

legalization, restorative justice, and harm reduction—has led to a decrease in crime, spending, and injustice. The best solution to bad policing may be an end to policing.

LEARNING WITH WOMEN IN JAIL

CREATING COMMUNITY-BASED PARTICIPATORY RESEARCH

[Springer Nature](#) In this monograph, the ethical implications of engaging in research with vulnerable populations is explored and demonstrates how Community Based Participatory Research (CBPR) both enhances the research while addressing these ethical complexities. Although CBPR encompasses different levels of community engagement, in general, the participants, or co-researchers, are involved in the formulation of the research questions and methodologies because they are central to the conversation about what should be researched and how. Participants are directly involved in formulating the study problems and finding solutions, and usually the goal is to create social change that can be applied to and potentially transform the community. Learning with Women in Jail: Creating Community Based Participatory Research documents the research process to better understand the causes for incarceration and recidivism. The study used a (CBPR) framework so that the people who had directly experienced incarceration would lead the research as much as possible, from framing the research questions and methodologies to data capture and analysis.

LOVES ME NOT

HOW TO KEEP RELATIONSHIPS SAFE

[Penguin Random House New Zealand Limited](#) An essential guide for keeping relationships safe. In 2008, the horrific murder of Sophie Elliott by her former boyfriend and university lecturer, Clayton Weatherston, shocked New Zealand. During the police investigation it became clear Sophie's murderer was a typical abuser who had a track record of treating partners badly. Sophie's mother, Lesley Elliott, driven to research domestic and partner abuse, was astonished to find the very characteristics evident in abusive relationships were right there in Sophie's. Lesley quickly realised that if she and Sophie, 'through ignorance and naivety' missed the signs, then so could many others. It became obvious that education was the key; Lesley set up the Sophie Elliott Foundation to raise awareness among all young women, their friends and families to the signs of partner abuse. The Loves Me Not programme was developed by the Sophie Elliott Foundation along with the New Zealand Police and members of the Ministry of Social Development. Its primary aim is to help young people help themselves to keep safe. Loves Me Not includes advice and suggestions on how to identify problems, how to deal with them and where to seek help. Also included is 'One for the Boys', a chapter written by well-known clinical psychologist and commentator, Nigel Latta, as well as a chapter written by school guidance counsellor,

Gayna McConnell.

CRIMINOLOGICAL SKILLS AND RESEARCH FOR BEGINNERS

A STUDENT'S GUIDE

Routledge Criminological Skills and Research for Beginners is a comprehensive and engaging guide to research methods in Criminology, and the skills required for academic success. Written specifically for undergraduate students and novice researchers, this book has been designed as a lively and accessible guide to planning, conducting and reporting research in the subject. It emphasises practical skills required in studying Criminology, the importance of criminological research, and places related methodology firmly in the context of students' broader study of the discipline, before moving on to provide a detailed guide to the actual processes of research. It is common for Criminology undergraduates to feel intimidated at the prospect of conducting their own research, and these students typically struggle to see the relevance of research methods to their own studies. This book speaks directly to the needs of such students, and includes contemporary examples and case studies that bring a topic that is often thought of as dry to life, providing a thorough and accessible practical guide that students can return to at each stage of their research, all the way through to their dissertation. This book covers: an examination of the theoretical, political and ethical debates in criminological research; a complete guide to planning criminological research, assisting student researchers in identifying their research questions, choosing their research methods and critiquing the available literature; guidance on the practicalities and processes of collecting data; a discussion of the process of analysing data and writing up research. New to the second edition is a brand new section on research skills in Criminology, including detailed coverage of writing skills, referencing, dissertations and research reports, presentation skills and revision. The book also offers additional coverage of the politics of criminological research and the presentation of official crime statistics. Including an extensive glossary and an integrated companion website with extra examples, exercises and videos to further develop students' understanding, this book is essential reading for any undergraduate on a Criminological Research Methods or Research Skills course, or for anyone in need of practical guidance on any or all of the various stages involved in conducting thorough and effective criminological research.

HANDBOOK ON CRIME

Routledge The Handbook on Crime is a comprehensive edited volume that contains analysis and explanation of the nature, extent, patterns and causes of over 40 different forms of crime, in each case drawing attention to key contemporary debates and social and criminal justice responses to them. It also challenges many popular and official conceptions of crime. This book is one of the few criminological texts that takes as its starting point a range of specific types of criminal activity. It addresses not only 'conventional' offences such as shoplifting, burglary, robbery, and vehicle crime, but many other forms of criminal behaviour - often an amalgamation of different legal offences - which attract contemporary media, public and policy concern. These include crimes committed not only by individuals, but by organised criminal groups, corporations and governments. There are chapters on, for example, gang violence, hate crime, elder abuse, animal abuse, cyber crime, identity theft, money-laundering, eco crimes, drug trafficking, human trafficking, genocide, and global terrorism. Many of these topics receive surprisingly little attention in the criminological literature. The Handbook on Crime will be a unique text of lasting value to students, researchers, academics, practitioners, policy makers, journalists and all others involved in understanding and preventing criminal behaviour.
