SOCIAL AND CULTURAL ANTHROPOLOGY: A VERY SHORT INTRODUCTION

Oxford Paperbacks "If you want to know what anthropology is, look at what anthropologists do," write the authors of Social and Cultural Anthropology: A Very Short Introduction. This engaging overview of the field combines an accessible account of some of the discipline's guiding principles and methodology with abundant examples and illustrations of anthropologists at work. Peter Just and John Monaghan begin by discussing anthropology's most important contributions to modern thought: its investigation of culture as a distinctively human characteristic, its doctrine of cultural relativism, and its methodology of fieldwork and ethnography. Drawing on examples from their own fieldwork in Indonesia and Mesoamerica, they examine specific ways in which social and cultural anthropology have advanced our understanding of human society and culture. Including an assessment of anthropology's present position, and a look forward to its likely future, Social and Cultural Anthropology will make fascinating reading for anyone curious about this social science. About the Series: Combining authority with wit, accessibility, and style, Very Short Introductions offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.

CHRISTOPHER DAWSON

A CULTURAL MIND IN THE AGE OF THE GREAT WAR

CUA Press Establishes how English historian Christopher Dawson's simple definition of culture as a 'common way of life' reconciles intellectualist and behavioural approaches to culture. In addition, Dawson's cultural mind provides a synthesis helpful for recognising the importance of Christian culture in education.

REFUGEES

A VERY SHORT INTRODUCTION

Oxford University Press Refugees are one of the great contemporary challenges the world is confronting, and the international community struggles to provide adequate responses to refugee needs. Gil Loescher explores the causes and consequences of the contemporary refugee crisis for both sending and receiving states, for global order, and for refugees themselves.

BONNEY'S GYNAECOLOGICAL SURGERY

John Wiley & Sons Surgery is a core element of the clinical practice of gynaecology. Bonney's Gynaecological Surgery has been a firm favourite for gynaecological surgical practice since 1911. Specifically tailored for trainees in obstetrics and gynaecology, the text focuses on the most commonly performed procedures. The 12th edition will include a colour photo section. With greater emphasis on fundamental clinical skills and major updates on laparoscopic and robotic surgery, this classic text will be brought right up to date for the current trainee or junior consultant physician. Each chapter follows a consistent plan, guiding the reader through each procedure from anatomy and indications to post-op considerations and complications. The text is also accompanied by surgical illustrations of unparalleled quality, ensuring that this volume will remain a valuable resource for all clinicians specializing in gynaecological surgery.

RELATIVITY: A VERY SHORT INTRODUCTION

OUP Oxford 100 years ago, Einstein's theory of relativity shattered the world of physics. Our comforting Newtonian ideas of space and time were replaced by bizarre and counterintuitive conclusions: if you move at high speed, time slows down, space squashes up and you get heavier; travel fast enough and you could weigh as much as a jumbo jet, be squashed thinner than a CD without feeling a thing - and live for ever. And that was just the Special Theory. With the General Theory came even stranger ideas of curved space-time, and changed our understanding of gravity and the cosmos. This authoritative and entertaining Very Short Introduction makes the theory of relativity accessible and understandable. Using very little mathematics, Russell Stannard explains the important concepts of relativity, from $E=mc^2$ to black holes, and explores the theory's impact on science and on our understanding of the universe. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. Oxford University Press A timely overview of populism, one of the most contested concepts in political journalism and the social sciences.

TOOLS AND MATHEMATICS

Springer This book is an exploration of tools and mathematics and issues in mathematics education related to tool use. The book has five parts. The first part reflects on doing a mathematical task with different tools, followed by a mathematician's account of tool use in his work. The second considers prehistory and history: tools in the development from ape to human; tools and mathematics in the ancient world; tools for calculating; and tools in mathematics instruction. The third part opens with a broad review of technology and intellectual trends, circa 1970, and continues with three case studies of approaches in mathematics education and the place of tools in these approaches. The fourth part considers issues related to mathematics instructions: curriculum, assessment and policy; the calculator debate; mathematics in the real world; and teachers' use of technology. The final part looks to the future: task and tool design and new forms of activity via connectivity and computer games.

AMONGST WOMEN

Faber & Faber AS HEARD ON BBC RADIO 4 BOOK AT BEDTIME 'A book that can be read in two hours, but will linger in the mind for decades.' Sunday Telegraph Once an officer in the Irish War for Independence, Moran is now a widower, eking out a living on a small farm where he raises his two sons and three daughters. Adrift from the structure and security of the military, he keeps control by binding his family close to him. But as his children grow older and seek independence, and as the passing years bring with them bewildering change, Moran struggles to find a balance between love and tyranny. 'One of the greatest writers of our era.' Hilary Mantel 'John McGahern is the Irish novelist everyone should read.' Colm Tóibín 'A masterpiece.' John Banville 'McGahern brings us that tonic gift of the best fiction, the sense of truth - the sense of transparency that permits us to see imaginary lives more clearly than we see our

VIOLENCE: A VERY SHORT INTRODUCTION

Oxford University Press Very Short Introductions: Brilliant, Sharp, Inspiring Violence is part and parcel of human history and of human nature. It is one of our most distinctive traits, the one thing that all cultures and societies, across time, share in common. It has defined not only the ways in which individuals relate to each other, but also how collective entities and states have interacted with each other over the millennia. All societies are violent and all individuals have the capacity for violence. However, not all societies and not all individuals are equally violent, and nor does violence exist with the same intensity across cultures. This Very Short Introduction examines the more visible, physical acts of violence - interpersonal, gendered, collective, religious, sexual, criminal, and political - in the modern world. It explores how violence in the pre-modern world was different from the modern world, and what is significant about those differences. It also discusses what violence is by examining understandings of the ideas, values, and cultural practices embedded in an act of violence, and considering acts of violence as the outcome of a process dependent on the cultural context in which they take place. Along the way Dwyer considers some core questions, asking whether violence is always 'bad', and if there are any limits to human violence? Why is it that what was once considered acceptable - wife beating, duelling, slavery - at some point becomes unacceptable in some societies and cultures, and yet continues in others? And finally, are we becoming more or less violent? ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. WORKING WITH THE ANTHROPOLOGICAL THEORY OF THE DIDACTIC IN MATHEMATICS EDUCATION

A COMPREHENSIVE CASEBOOK

Routledge This book presents the main research veins developed within the framework of the Anthropological Theory of the Didactic (ATD), a paradigm that originated in French didactics of mathematics. While a great number of publications on ATD are available in French and Spanish, Working with the Anthropological Theory of the Didactic in Mathematics Education is the first directed at English-

speaking international audiences. Written and edited by leading researchers in ATD, the book covers all aspects of ATD theory and practice, including teaching applications. The chapters feature the most relevant and recent investigations presented at the 6th international conference on the ATD, offering a unique opportunity for an international audience interested in the study of mathematics teaching and learning to keep in touch with advances in educational research. The book is divided into four sections and the contributions explore key topics such as: The core concept of 'praxeology', including its development and functionalities The need for new teaching praxeologies in the paradigm of questioning the world The impact of ATD on the teaching profession and the education of teachers This is the second volume in the New Perspectives on Research in Mathematics Education. This comprehensive casebook is an indispensable resource for researchers, teachers and graduate students around the world.

GLOBALIZATION: A VERY SHORT INTRODUCTION

Oxford University Press, USA We live today in an interconnected world in which ordinary people can become instant online celebrities to fans thousands of miles away, in which religious leaders can influence millions globally, in which humans are altering the climate and environment, and in which complex social forces intersect across continents. This is globalization. In the fifth edition of his bestselling Very Short Introduction Manfred B. Steger considers the major dimensions of globalization: economic, political, cultural, ideological, and ecological. He looks at its causes and effects, and engages with the hotly contested question of whether globalization is, ultimately, a good or a bad thing. From climate change to the Ebola virus, Donald Trump to Twitter, trade wars to China's growing global profile, Steger explores today's unprecedented levels of planetary integration as well as the recent challenges posed by resurgent national populism. MODERN JAPAN: A VERY SHORT INTRODUCTION

OUP Oxford Japan is arguably today's most successful industrial economy, combining almost unprecedented affluence with social stability and apparent harmony. Japanese goods and cultural products are consumed all over the world, ranging from animated movies and computer games all the way through to cars, semiconductors, and management techniques. In many ways, Japan is an icon of the modern world, and yet it remains something of an enigma to many, who see it as a confusing montage of the alien and the familiar, the ancient and modern. The aim of this Very Short Introduction is to explode the myths and explore the reality of modern Japan - by taking a concise look at its history, economy, politics, and culture. RIVERS: A VERY SHORT INTRODUCTION

Oxford University Press Rivers have played an extraordinarily important role in creating the world in which we live. They create landscapes and provide water to people, plants and animals, nourishing both town and country. The flow of rivers has enthused poets and painters, explorers and pilgrims. Rivers have acted as cradles for civilization and agents of disaster; a river may be a barrier or a highway, it can bear trade and sediment, culture and conflict. A river may inspire or it may terrify. This Very Short Introduction is a celebration of rivers in all their diversity. Nick Middleton covers a wide and eclectic range of river-based themes, from physical geography to mythology, to industrial history and literary criticism. Worshipped and revered, respected and feared, rivers reflect both the natural and social history of our planet. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. HUMAN EVOLUTION

Oxford University Press, USA The study of human evolution is advancing rapidly. Newly discovered fossil evidence is adding ever more pieces to the puzzle of our

past, whilst revolutionary technological advances in the study of ancient DNA are completely reshaping theories of early human populations and migrations. In this Very Short Introduction Bernard Wood traces the history of paleoanthropology from its beginnings in the eighteenth century to the very latest fossil finds. In this new edition he discusses how Ancient DNA studies have revolutionized how we view the recent (post-550 ka) human evolution, and the process of speciation. The combination of ancient and modern human DNA has contributed to discoveries of new taxa, as well as the suggestion of "ghost" taxa whose fossil records still remain to be discovered. Considering the contributions of related sciences such as paleoclimatology, geochronology, systematics, genetics, and developmental biology, Wood explores our latest understandings of our own evolution. THE VICTORIA CLIMBIE INQUIRY

Stationery Office/Tso This is the official report of the independent inquiry into the events leading up to the death of Victoria Climbiâ, an eight year old child who died in hospital in February 2000 of injuries sustained after months of abuse. The report by Lord Laming finds that the death represents a gross failure of the system of public agencies involved to protect vulnerable children from deliberate harm, and this failure is primarily due to 'widespread organisational malaise'. The agencies involved were under-funded, inadequately staffed and often showed a lack of even basic good practice. However, the key issue is one of lack of leadership and accountability shown by senior level management of the agencies involved, rather than just a structural or staffing problem. The legislative framework for child protection is judged to be basically sound; the problem lies more with its implementation. The report contains 108 recommendations for fundamental changes to the way social care, healthcare and police child protection services are organised and managed at national and local level in England, in order to establish a clear line of accountability in the provision of services for vulnerable children and the support of families. These include: i) the creation of a Children and Families Board within the government, to be chaired by a minister of Cabinet rank; ii) the creation of a National Agency for Children and Families with responsibility to advise the Board on policies that affect the well-being of children and families, and the discretion to conduct serious case reviews; and iii) the creation of a Management Board and a Committee at local authority level, involving senior management representatives. Other recommendations relate to improvements in the exchange of information within and between agencies; the feasibility of a national children's database to record any contact a child has with any key protection service; service funding issues; staff training and supervision.

THE POLITICS OF EVIDENCE-BASED POLICY MAKING

Springer The Politics of Evidence Based Policymaking identifies how to work with policymakers to maximize the use of scientific evidence. Policymakers cannot consider all evidence relevant to policy problems. They use two shortcuts: 'rational' ways to gather enough evidence, and 'irrational' decision-making, drawing on emotions, beliefs, and habits. Most scientific studies focus on the former. They identify uncertainty when policymakers have incomplete evidence, and try to solve it by improving the supply of information. They do not respond to ambiguity, or the potential for policymakers to understand problems in very different ways. A good strategy requires advocates to be persuasive: forming coalitions with like-minded actors, and accompanying evidence with simple stories to exploit the emotional or ideological biases of policymakers.

FOREIGN POLICY

THEORIES, ACTORS, CASES

Oxford University Press This ground breaking text provides the ideal introduction to the ever-changing field of foreign policy. With a unique combination of theories, actors and cases in a single volume, the expert contributors provide students with a valuable and accessible introduction to what foreign policy is and how it is conducted. ARCHITECTURE: A VERY SHORT INTRODUCTION

OUP Oxford This highly original and sophisticated look at architecture helps us to understand the cultural significance of the buildings that surround us. It avoids the traditional style-spotting approach in favour of giving an idea of what it is about buildings that moves us, and what it is that makes them important artistically and culturally. The book begins by looking at how architecture acquires meaning through tradition, and concludes with the exoticism of the recent avant garde. Illustrations of particular buildings help to anchor the general points with specific examples, from ancient Egypt to the present day.
