Pelvic Floor Dysfunction A Multidisciplinary Approach [Springer Science & Business Media](#) **All the characteristics and driving force of The Cleveland Clinic are to be found in this book on pelvic floor function. The Cleveland Clinic is a group**

practice founded in 1921 on the principles of cooperation, collaboration, and collegiality. Its founders believed that many physicians working together will discover better solutions to medical problems than physicians working in isolation. They believed that the combination of disciplines, with their inherent differences in philosophy and skills, will produce a better outcome than might have evolved singularly. The power of the collaborative approach is on full display in this book. The pelvic floor unites three separate organ systems. Before this time, each has been approached individually. Urologists, gynecologists, and colorectal surgeons are each trained in their own disciplines, and the pelvic floor is subsumed in these larger fields of study. When they combine their focus on the pelvic floor, they bring their unique perspectives and different approaches to a common goal: the relief of pelvic floor syndromes such as incontinence and pelvic organ prolapse.

MCQs and EMQs in Surgery: A Bailey & Love Companion Guide [CRC Press](#) With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.

Although rare, when diagnosed these tumors can cause anxiety and apprehension in patients, and it is necessary to find rapid solutions and medical rehabilitation protocols capable of dealing with these delicate cases. As such those working in this field need to constantly update their knowledge to ensure an appropriate approach to this particular pathology. This book is a useful consultation tool for physiotherapists, orthopedic oncology surgeons, rehabilitation specialists and everyone who works with bone tumors on a regular basis. **Breast Cancer: Diagnostic Imaging and Therapeutic Guidance** [Thieme](#) **Breast Cancer: Diagnostic Imaging and Therapeutic Guidance** provides a concise, practical, and practice-based source of up-to-date diagnostic and therapeutic information for the general radiologist. In the diagnostic phase of evaluating breast disorders, the overriding consideration in the examination and assessment is to reduce false diagnoses to the absolute minimum—a principle wholly in the interests of the patient. The particular diagnostic pathway chosen will depend on the highly variable individual presentations and the associated findings. A major focus of the book is the comparative value of the various diagnostic imaging modalities. As well as discussing conventional mammography and adjunct modalities such as breast ultrasound and galactography, the text also showcases the superior utility of contrast-enhanced magnetic resonance imaging in providing the highest rate of detection of cancers at any stage. As well as radiological diagnosis, sections written by top specialists cover the interventional procedures for obtaining biopsies and also the surgical and medical therapy of breast carcinoma. **Key Features:** Combined authors' experience of more than 100 years provides this work with great depth and expertise. Richly illustrated with almost 600 images, including full color histology, patient photographs, and hundreds of radiological studies. **BI-RADS** classification for mammography, breast ultrasound, and breast MRI. Adjunct topics covered include screening and staging; lymph nodes; breast reconstruction; chemotherapy, also with respect to endocrine-active tumors; radiation therapy; tumors of the male breast; logistics in the breast care center; and psychosocial care. **Breast Cancer: Diagnostic Imaging and Therapeutic Guidance** is certain to prove an invaluable tool for all general radiologists involved in the evaluation and treatment of patients with breast cancer. **Disorders of the Foot** [W B Saunders Company](#) **The Ethnic Cleansing of Palestine** [Simon and Schuster](#) The book that is providing a storm of controversy, from 'Israel's bravest historian' (John Pilger) Renowned Israeli historian, Ilan Pappé's groundbreaking book revisits the formation of the State of Israel. Between 1947 and 1949, over

400 Palestinian villages were deliberately destroyed, civilians were massacred and around a million men, women, and children were expelled from their homes at gunpoint. Denied for almost six decades, had it happened today it could only have been called "ethnic cleansing". Decisively debunking the myth that the Palestinian population left of their own accord in the course of this war, Ilan Pappé offers impressive archival evidence to demonstrate that, from its very inception, a central plank in Israel's founding ideology was the forcible removal of the indigenous population. Indispensable for anyone interested in the current crisis in the Middle East. **Minimally Invasive Cancer Management** [Springer Science & Business Media](#) As minimal access approaches to cancer diagnosis, staging, and therapy become more widely used, it is vital for general surgeons, along with laparoscopists, surgical oncologists and medical oncologists, to stay up to date. The editors, a team consisting of a renowned surgical oncologist and a laparoscopic specialist, aim to provide a resource for the practicing general surgeon using basic minimally invasive techniques. The book discusses diagnosis including biopsy with microinstrumentation, staging, and palliative and curative resection. Specific tumor sites are addressed, including esophagus, stomach, spleen, small bowel, pancreatobiliary, hepatic resection, and colo-rectal resection. Minimally invasive approaches to the thoracic and retroperitoneal areas are included. The book provides a thorough overview of basic cancer biology, instrumentation, and ultrasound. Additionally, Greene and Heniford explore controversial issues such as port-site recurrence and the effect of pneumoperitoneum on the spread of cancer cells in the abdomen. Many photographs and line drawings, including 16 in full color, illustrate the principles discussed in the text. A must-have for every practicing general surgeon, laparoscopic fellow, and general surgery resident. **The Other Muslims Moderate and Secular** [Springer](#) This book is a unique collection of alternative Muslim voices, predominantly from Europe, who come from a variety of backgrounds - academia, theology, acting, activism - and who make a transformational contribution to the debate of the future of Islam and Muslims in the West. **Vascular Malformations of the Central Nervous System Flash Floods in Egypt** [Springer Nature](#) This book presents the latest findings and information on flash floods in Egypt and presents case studies from various regions throughout the country. The quantitative and qualitative dimensions of these flash floods are discussed on the basis of statistical analysis and field observations. The book covers a broad and diverse range of topics, including evaluation of drainage basins, early warning systems, flash flood investigations, hydrologic simulation, GIS and flash floods, environmental flash floods, hazard management, flash flood monitoring, assessment of flood risks, flash flood vulnerability and mitigation, management of flash floods, prediction and mitigation, and rainfall harvesting and utilization. The book offers a unique source of information on virtually all dimensions of flash floods in Egypt and their environmental impacts, and combines analysis, observations, and experts'

hands-on field experience. It also supports the assessment and management of flash floods in Egypt, a country currently facing many challenges in implementing sustainable development plans, mainly because of the severe water scarcity the arid country facing. **Surgery PreTest Self-Assessment and Review, Fourteenth Edition** [McGraw Hill Professional](#) A perfect and portable way to succeed on your surgery rotation and the shelf exam **Surgery: PreTest Self-Assessment & Review** is a targeted way to prepare for the surgery clerkship. You'll find hundreds of questions that cover the content you'll encounter on the actual shelf exam. The range of question topics covers the clerkship's core competencies and each question includes high yield explanations of both correct and incorrect answers. All questions have been reviewed by students who successfully completed their clerkship to ensure that topics and questions align with directly with today's surgery clerkships. • Hundreds of questions just like you'll see on the shelf exam • High yield explanations for right and wrong answers • Targets what you really need to know for clerkship success • Updated to include all relevant advances in the surgery field • Student tested and reviewed **Keto for Cancer Ketogenic Metabolic Therapy as a Targeted Nutritional Strategy** [Chelsea Green Publishing](#) A Comprehensive Guide for Patients and Practitioners Although evidence supporting the benefits of ketogenic diet therapies continues to mount, there is little to guide those who wish to adopt this diet as a metabolic therapy for cancer. **Keto for Cancer** fills this need. Inspired by the work of Dr. Thomas N. Seyfried, PhD, nutritionist Miriam Kalamian has written the first book to lay out comprehensive guidelines that specifically address the many challenges associated with cancer, and particularly the deep nutritional overhaul involved with the ketogenic diet. Kalamian, a leading voice in the keto movement, is driven by passion from her own experience in using the ketogenic diet for her young son. Her book addresses the nuts and bolts of adopting the diet, from deciding whether keto is the right choice to developing a personal plan for smoothly navigating the keto lifestyle. It is invaluable for both beginners and seasoned users of the ketogenic diet, as well as for health-care professionals who need a toolkit to implement this targeted metabolic therapy. The book guides readers to a deeper understanding of the therapeutic potential of the ketogenic diet--which extends well beyond simply starving cancer--emphasizing the powerful impact the diet has on the metabolism of cancer cells. Nutritional nuances are explored in sections such as "Fasting Protocols" and "Know What's in the Foods You Eat" while meal templates and tracking tools are provided in "Preparing Keto Meals." Kalamian also discusses important issues such as self-advocacy. Readers of **Keto for Cancer** are empowered to "get off the bench and get in the game." To that end, Kalamian offers tips on how to critically examine cancer-care options then incorporate what resonates into a truly personalized treatment plan. **Applying Partial Least Squares in Tourism and Hospitality Research** [Emerald Group Publishing](#) Ten chapters discuss key aspects of advanced PLS analysis and its practical applications,

covering new guidelines and improvements in the use of PLS-PM as well as various individual topics. **Trends and Innovations in Information Systems and Technologies Volume 1** [Springer Nature](#) This book gathers selected papers presented at the 2020 World Conference on Information Systems and Technologies (WorldCIST'20), held in Budva, Montenegro, from April 7 to 10, 2020. WorldCIST provides a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences with and challenges regarding various aspects of modern information systems and technologies. The main topics covered are A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.

Nixon, Kissinger, and the Shah The United States and Iran in the Cold War [Oxford University Press](#) Nixon, Kissinger, and the Shah offers a detailed account of three key historical episodes in the Nixon-Kissinger-Pahlavi partnership that shaped the global Cold War far beyond Iran's borders. It examines the emergence of Iranian primacy in the Persian Gulf as the Nixon administration looked to the shah to fill the vacuum created by the British withdrawal from the region in 1971. It then turns to the peak of the partnership after Nixon and Kissinger's historic 1972 visit to Iran, when the shah succeeded in drawing the United States into his covert war against Iraq in Kurdistan. Finally, it focuses on the decline of the partnership under Nixon's successor, Gerald Ford, through a history of the failed negotiations from 1974 to 1976 for an agreement on U.S. nuclear exports to Iran. Taken together, these episodes map the rise and fall of Iran's Cold War partnership with the United States during the decade of superpower détente, Vietnam, and Watergate.

Protocols in General Surgery Laparoscopic Colorectal Surgery [Wiley-Liss](#) The authors review the results of various laparoscopic colorectal procedures and identify the range of complications associated with this surgery. Providing a unique global perspective on colorectal results, the book is divided into four sections: basic principles, pathology and procedure, adjuncts to laparoscopy, and world views on the surgery. Discussions of management during surgery are also included.

Quinazolinone and Quinazoline Derivatives [BoD - Books on Demand](#) One of the problems with modern public health is target searching for new highly effective medicinal preparations. Among those medicinal preparations are the natural and synthetic origins of quinazolinone-4 derivatives. Quinazolinone derivatives are reported to be physiologically and pharmacologically active. They also exhibit a wide range of activities such as anticonvulsant, antiinflammatory, antifungal, antimalarial, and sedative properties. Some of these

compounds are identified as drugs used as diuretics, vasodilators, and antihypertensive agents. Moreover, sulfonamide derivatives have been widely used as bacteriostatic agents. Prompted by the above-mentioned facts and in conjunction with our ongoing program on the utility of readily obtainable starting material for the synthesis of heterocyclic systems of biological interest, we have decided to synthesize a series of quinazolinone derivatives having sulfonamide moiety with a potentially wide spectrum of biological responses.

Gingival Diseases Their Aetiology, Prevention and Treatment [BoD - Books on Demand](#) Gingival diseases are a family of distinct pathological entities that involve the gingival tissues. These signs and symptoms of these diseases are so prevalent in populations around the world that they are often considered to be "normal" features. The diseases are now classified into two main groups namely: Plaque-Induced and Non-Plaque Induced Gingival Diseases. This book provides dentists, dental hygienists, dental therapists and students with a comprehensive review of gingival diseases, their aetiology and treatment.

Supplementary Cementitious Materials in Concrete Cairo A City in Transition [Green Analytical Chemistry Past, Present and Perspectives](#) [Springer](#) The book explains the principles and fundamentals of Green Analytical Chemistry (GAC) and highlights the current developments and future potential of the analytical green chemistry-oriented applications of various solutions. The book consists of sixteen chapters, including the history and milestones of GAC; issues related to teaching of green analytical chemistry and greening the university laboratories; evaluation of impact of analytical activities on the environmental and human health, direct techniques of detection, identification and determination of trace constituents; new achievements in the field of extraction of trace analytes from samples characterized by complex composition of the matrix; "green" nature of the derivatization process in analytical chemistry; passive techniques of sampling of analytes; green sorption materials used in analytical procedures; new types of solvents in the field of analytical chemistry. In addition green chromatography and related techniques, fast tests for assessment of the wide spectrum of pollutants in the different types of the medium, remote monitoring of environmental pollutants, qualitative and comparative evaluation, quantitative assessment, and future trends and perspectives are discussed. This book appeals to a wide readership of the academic and industrial researchers. In addition, it can be used in the classroom for undergraduate and graduate Ph.D. students focusing on elaboration of new analytical procedures for organic and inorganic compounds determination in different kinds of samples characterized by complex matrices composition.

Jacek Namieśnik was a Professor at the Department of Analytical Chemistry, Gdańsk University of Technology, Poland. Justyna Płotka-Wasyłka is a teacher and researcher at the same department.

Intelligence Powder [New York, N.Y.] : [Ubu Repertory Theater Publications](#) **The Nile River Basin Water, Agriculture, Governance and Livelihoods** [Routledge](#) The Nile provides freshwater not only for domestic and industrial use, but

also for irrigated agriculture, hydropower dams and the vast fisheries resource of the lakes of Central Africa. The Nile River Basin covers the whole Nile Basin and is based on the results of three major research projects supported by the Challenge Program on Water and Food (CPWF). It provides unique and up-to-date insights on agriculture, water resources, governance, poverty, productivity, upstream-downstream linkages, innovations, future plans and their implications. Specifically, the book elaborates the history and the major current and future challenges and opportunities of the Nile river basin. It analyzes the basin characteristics using statistical data and modern tools such as remote sensing and geographic information systems. Population distribution, poverty and vulnerability linked to production system and water access are assessed at the international basin scale, and the hydrology of the region is also analysed. This text provides in-depth scientific model adaptation results for hydrology, sediments, benefit sharing, and payment for environmental services based on detailed scientific and experimental work of the Blue Nile Basin. Production systems as they relate to crops, livestock, fisheries and wetlands are analyzed for the whole Blue and White Nile basin including their constraints. Policy, institutional and technological interventions that increase productivity of agriculture and use of water are also assessed. Water demand modeling, scenario analysis, and tradeoffs that inform future plans and opportunities are included to provide a unique, comprehensive coverage of the subject.

Culture and Imperialism [Random House](#) Following his profoundly influential study, *Orientalism*, Edward Said now examines western culture. From Jane Austen to Salman Rushdie, from Yeats to media coverage of the Gulf War, *Culture and Imperialism* is a broad, fierce and wonderfully readable account of the roots of imperialism in European culture.

Judging Research The 2019 MDPI Writing Prize The 2019 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of "how research should be evaluated and how researchers should be rewarded". Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis.

Taking Power On the Origins of Third World Revolutions [Cambridge University Press](#) *Taking Power* analyzes the causes behind some three dozen revolutions in the Third World between 1910 and the present. It advances a theory that seeks to integrate the political, economic, and cultural factors that brought these revolutions about, and links structural theorizing with original ideas on culture and agency. It attempts to explain why so few revolutions have succeeded, while so many have failed. The book is divided into chapters that treat particular sets of revolutions including the great social revolutions of Mexico 1910, China 1949, Cuba 1959, Iran 1979, and Nicaragua 1979, the anticolonial revolutions in Algeria, Vietnam, Angola, Mozambique, and Zimbabwe from the 1940s to the 1970s, and the failed

revolutionary attempts in El Salvador, Peru, and elsewhere. It closes with speculation about the future of revolutions in an age of globalization, with special attention to Chiapas, the post-September 11 world, and the global justice movement.

Obesity, Bariatric and Metabolic Surgery A Practical Guide Springer Written by leading experts from all across the globe, this comprehensive yet concise textbook offers up-to-date summary in the field of Obesity and its Surgical Management for a wide range of healthcare professionals involved within a Bariatric Multidisciplinary Team including Surgeons, Dieticians, Metabolic Physicians, Anaesthesiologists, Psychologists, Psychiatrists, Radiologists and Nursing staff. The book also serves as a reference manual for General Physicians, General Surgeons & General Practitioners.

Information Economy Report 2015 Unlocking the Potential of E-commerce for Developing Countries United Nations Electronic commerce (e-commerce) is rapidly transforming the way in which enterprises are interacting among each other as well as with consumers and governments. Despite important potential benefits, businesses and consumers in developing countries were for a long time slow to exploit e-commerce. As a result of changes in the evolving landscape for information and communications technologies (ICTs), this pattern is now changing, and e-commerce is growing rapidly in emerging markets and developing economies. Against this background, this publication revisits the potential opportunities and risks of e-commerce and examines how countries can benefit the most from the phenomenon in today's Information Society. Using official statistics and private sector data, it provides an up-to-date review of global and regional trends related to e-commerce in view of changes in the ICT landscape, focusing on developing countries while drawing lessons from developed countries.

Scattered Finds Archaeology, Egyptology and Museums UCL Press Between the 1880s and 1980s, British excavations at locations across Egypt resulted in the discovery of hundreds of thousands of ancient objects that were subsequently sent to some 350 institutions worldwide. These finds included unique discoveries at iconic sites such as the tombs of ancient Egypt's first rulers at Abydos, Akhenaten and Nefertiti's city of Tell el-Amarna and rich Roman Era burials in the Fayum. Scattered Finds explores the politics, personalities and social histories that linked fieldwork in Egypt with the varied organizations around the world that received finds. Case studies range from Victorian municipal museums and women's suffrage campaigns in the UK, to the development of some of the USA's largest institutions, and from university museums in Japan to new institutions in post-independence Ghana. By juxtaposing a diversity of sites for the reception of Egyptian cultural heritage over the period of a century, Alice Stevenson presents new ideas about the development of archaeology, museums and the construction of Egyptian heritage. She also addresses the legacy of these practices, raises questions about the nature of the authority over such heritage today, and argues for a stronger ethical commitment to its stewardship. Praise for Scattered Finds 'Scattered Finds is a remarkable achievement. In charting

how British excavations in Egypt dispersed artefacts around the globe, at an unprecedented scale, Alice Stevenson shows us how ancient objects created knowledge about the past while firmly anchored in the present. No one who reads this timely book will be able to look at an Egyptian antiquity in the same way again.' The events and stories presented increase the understanding of present debates on, and notions of, Islam and Muslims in Europe. This book shows that in the course of thirteen centuries the Muslim as well as Islam have undergone many metamorphoses. The Muslim has entered the European stage as a conqueror, antichrist, scholar, benign ruler, corsair, tradesman and fellow citizen. The image of Islam has meandered accordingly, as a religion that was feared as an enemy or embraced as a partner against heretical Christians, despised as an abomination or admired as a civilization, and studied for missionary, academic, colonial or security purpose. **Sekem A Sustainable Community in the Egyptian Desert** [Floris Books](#) The Egyptian desert can be a hostile place. Yet in 1977, Dr Ibrahim Abouleish founded a new agricultural and social settlement on seventy hectares of desert land in Belbes, 60 km north east of Cairo. The Sekem initiative was born. Dr Abouleish's goals were to build a new type of community. His vision was for a farm which grew biodynamic crops and plants out of the harsh desert sand. Where the workers and residents were given holistic primary health care. Where their children were well-educated in the sciences. A place which could sell its wares and be self-sufficient and self-sustaining. A place where Islamic religion and Western technology could come together in harmony. Nearly thirty years later and Sekem has gone from strength to strength. In 1981 it shipped its first medicinal herbs to the USA; by 2004, it oversaw a network of over 800 farms across Egypt and the Sudan, producing high quality organic crops, herbs, fruits and vegetables. Its mobile health units work with local rural populations and it has brought about real social change. This is the story of Sekem -- the original vision, the challenges and hard work, and the eventual successes -- in Ibrahim Abouleish's own words. **Stunningly illustrated with colour photographs throughout.** **European Surgical Orthopaedics and Traumatology The EFORT Textbook** [Springer](#) This important reference textbook covers the surgical management of all major orthopaedic and traumatological conditions. The book will act as the major source of education and guidance in surgical practice for surgeons and trainees, especially those preparing for higher surgical examinations and the Board of Orthopaedics and Traumatology

examinations within and beyond Europe. The emphasis throughout is on the application of current knowledge and research to technical problems, how to avoid operative problems, and how to salvage complications if they occur. The didactic text is complemented by abundant illustrations that highlight the essentials of each clinical scenario. The authors are all recognized international authorities active at congresses and workshops as well as in universities and hospitals across the world.
