However, despite the fact that cross-border travel implies certain citizenship rights as well as the material capacity to travel, the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature. This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically-informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship, with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel. The text weaves its analysis of citizenship and travel in the context of addressing large-scale societal transformations engendered by globalization, neoliberalism and the geopolitical realignments between states, as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves. By doing so, it focuses on key themes including: tourism and social citizenship rights; race, culture and minority rights; states, markets and the freedom of movement; tourism, peace and geo-politics; consumerism and class; and, ethical tourism, global citizenship and cosmopolitanism. The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity. This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science. The royalties received from this book will be donated to the International Porter Protection Group. **Exploring Costa Rica** [The Tico Times](#) ... **Guide COVID-19: Paving the Way for a More Sustainable World** [Springer Nature](#) This book gathers and disseminates opinions, viewpoints, studies, forecasts, and practical projects which illustrate the various pathways sustainability research and practice may follow in the future, as the world recovers from the COVID-19 pandemic and prepares itself to the possibilities of having to cope with similar crisis, a product of the Inter-University Sustainable Development Research Programme (IUSDRP) <https://www.haw-hamburg.de/en/ftz-nk/programmes/iusdrp.html> and the European School of Sustainability Science and Research (ESSSR) <https://esssr.eu/>. The COVID-19 pandemic has led to severe human suffering, and to substantial damages to economies around the globe, affecting both rich countries and developing ones. The aftermath of the epidemic is also expected to be felt for sometime. This will also include a wide range of impacts in the ways sustainable development is perceived, and how the principles of sustainability are practised. There is now a pressing need to generate new literature on the connections between COVID-19 and sustainability. This is so for two main reasons. Firstly, the world crisis triggered by COVID-19 has severely damaged the world economy, worsening poverty, causing hardships, and endangering livelihoods. Together, these impacts may negatively influence the implementation of sustainable development as a whole, and of the UN Sustainable Development Goals in particular. These potential and expected impacts need to be better understood and quantified, hence providing a support basis for future recovery efforts. Secondly, the shutdown caused by COVID-19 has also been having a severe impact on teaching and research, especially -but not only - on matters related to sustainability. This may also open new opportunities (e.g. less travel, more Internet-based learning), which should be explored further, especially in the case of future pandemics, a scenario which cannot be excluded. The book meets these perceived needs. **Gayellow Pages USA #34 2012-2013** [Renaissance House](#) A directory of resources (business and organizational) for LGBTIQI USA, sold in gay-friendly bookstores since 1973 and available online (updated monthly) at no charge. At the heart of this book of compassionate and energetic sonnets are 'The Kids', her students, the teenagers she nurtured. But the poems go further, meeting her own child self as she comes of age in the riotous 80s and 90s, later bearing witness to her small son learning to negotiate contemporary London. Across these deeply felt poems, Lowe interrogates the acts of teaching and learning with empathy and humour. Social class, gender and race - and their fundamental intersection with education - are investigated with an ever critical and introspective eye. The sonnet is re-energised, becoming a classroom, a memory box and even a mind itself as 'The Kids' learn and negotiate their own unknown futures. These boisterous and musical poems explore and explode the universal experience of what it is to be taught, and to teach, ultimately reaching out and speaking to the child in all of us. The poems in the first section of the book draw on Hannah Lowe's experiences as a teacher in the 2000s, but the scenarios are largely fictitious, as are the names of the students. **The Kids** is a Poetry Book Society Choice. **Strength Through Peace How Demilitarization Led to Peace and Happiness in Costa Rica, and What the Rest of the World can Learn From a Tiny, Tropical Nation** [Oxford University Press](#) Costa Rica is the only full-fledged and totally independent country to be entirely demilitarized. Its military was abolished in 1948, with the keys to the armory handed to the Department of Education. Socially, Costa Rica is a success story. Although 94th in the world for GDP, it is in the top 10 on various measurements of health and well-being. Citizens enjoy high standards of living that include universal access to healthcare, education, and pensions. In addition, the country practices sustainable resource management, such as reforestation and the development of solar and wind power, and it expects to be carbon neutral by 2020. Hunting is illegal. 25% of the landmass is parks and reserves. The government supports universal health care, especially maternal and child health. Costa Rica even has a Blue Zone, an area where people live extraordinarily long, healthy lives. To some extent, Costa Rica is simply lucky: it was largely inaccessible, and it had virtually no precious minerals, therefore it was mostly spared the ravages of predatory colonialism. The Costa Rican people made very good social decisions, ranging from an avowed commitment to social democracy at the national level, to local land distribution to develop stable middle class farmers. But Costa Rica's neighbors have not enjoyed nearly as much peace and prosperity. It is unlikely that Costa Rica's demilitarization and its remarkable social success are coincidental; clearly, something special is going on. Through good luck, good leadership, and good decisions, Costa Rica has become arguably the sanest and most progressive country on earth. This book examines how and why Costa Rica is safe and independent without any military at all, and what the rest of us can learn from its success. **Sustainable Ecotourism in Central America Comparative Advantage in a Globalized World** [Lexington Books](#) This book examines the intersection of ecotourism development, foreign direct investment, globalization, and neoliberalism in Central America. After consideration of the Costa Rican example, the book assesses the probability of economic growth based on ecotourism development in Nicaragua, Panama, and Belize. **Just Immigration in the Americas A Feminist Account** [Rowman & Littlefield Publishers](#) This book proposes a pioneering, interdisciplinary, feminist approach to immigration justice, which defines immigration justice as being about identifying and resisting global oppression in immigration structures, policies, practices, and norms. In contrast to most philosophical work on immigration (which begins with abstract ideas and philosophical debates and then makes claims based on them), this book begins with concrete cases and immigration policies from throughout the United States, Mexico, Central America, and Colombia to assess the nature of immigration injustice and set us up to address it. Every chapter of the book begins with specific immigration policies, practices or sets of immigrant experiences in the U.S. and Latin America and then explores them through the lens of global oppression to better identify what makes it unjust and to put us in a better position to respond to that

injustice and improve immigrants' lives. It is one of the first sustained studies of immigration justice that focuses on Central and South America in addition to the U.S. and Mexico. States, the Law and Access to Refugee Protection Fortresses and Fairness [Bloomsbury Publishing](#) This timely volume seeks to examine two of the most pertinent current challenges faced by asylum seekers in gaining access to international refugee protection: first, the obstacles to physical access to territory and, second, the barriers to accessing a quality asylum procedure - which the editors have termed 'access to justice'. To address these aims, the book brings together leading commentators from a range of backgrounds, including law, sociology and political science. It also includes contributions from NGO practitioners. This allows the collection to offer interdisciplinary analysis and to incorporate both theoretical and practical perspectives on questions of immense contemporary significance. While the examination offers a strong focus on European legal and policy developments, the book also addresses the issues in different regions (Europe, North America, the Middle East, Africa and Australia). Given the currency of the questions under debate, this book will be essential reading for all scholars in the field of asylum law. [Meteorology PediaPress](#) [OECD Development Pathways Multi-dimensional Review of the Western Balkans Assessing Opportunities and Constraints](#) [OECD Publishing](#) The Western Balkans region has come a long way over the last two decades in achieving economic and social progress. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development. [World Investment Report 2020 International Production Beyond the Pandemic United Nations](#) The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action. [Corporate Sustainability and Responsibility in Tourism A Transformative Concept Springer](#) This book offers essential insights into how the world's second largest industry, tourism, is responding to challenges involved in expanding the corporate social responsibility (CSR) concept to corporate sustainability and responsibility, referred to as CSR 2.0. It analyzes the typical setup of tourism with various types of commercial agents: corporations, small and medium sized enterprises, public-private partnerships, social enterprises and local cooperatives. In addition, the book examines a broad range of voluntary initiatives, the effectiveness of these efforts, and how contextual and wider policy features shape these relationships. The book is divided into three parts, the first of which elaborates on strategic drivers and rationales for CSR. In turn, the second part introduces readers to design approaches for CSR programs and envisaged impacts, while part three focuses on implementation, certification, reporting, and possible outcomes. Each part offers a mixture of theoretical perspectives, synthesis analyses and case studies. The respective chapters tackle a broad spectrum of tourism sub-sectors, e.g. the cruise industry, aviation, gastronomy, nature-based tourism, and urban destinations. [Eradicating Human Trafficking: Culture, Law and Policy BRILL](#) With over 40 million people still enslaved around the world, this book takes a closer look at the role of culture in society and how certain practices, beliefs or behaviors are fueling human trafficking beyond what the law can curtail. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection. **World Social Report 2020 Inequality in a Rapidly Changing World** [United Nations](#) This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation. **International Volunteer Tourism Integrating Travellers and Communities** [CABI](#) **Summary:** This book revisits and further develops the topics and themes covered in **Volunteer Tourism: Experiences That Make a Difference**, written over 10 years ago. Concentrating on the experience of the volunteer tourist and the host community, this new edition builds on the view of volunteer tourism as a positive and sustainable form of tourism to examine a broader spectrum of behaviours and experiences and consider critically where the volunteer tourist experience both compliments and collides with host communities, using multiple case studies. The book has nine chapters and a subject index. **Tourism and Development Concepts and Issues** [Channel View Publications](#) This book explores and challenges the relationship between tourism and development and establishes a conceptual link between the discrete yet interconnected disciplines of tourism studies and development studies. Anne and Mike Poe, an American couple in their mid-fifties, journeyed for six months from Bali, Indonesia through Java, Sumatra, Malaysia, Thailand, Vietnam and China until finally reaching Hong Kong. Experience the Poes' unique adventure as they sojourn on their own with no guides to show them the way, no organized tours to fix all the problems and no translators to read the menus. Their stories tell the truth about what it really feels like to travel into the lives of the local populations. Meet head on the rising aspirations of a Third World continent banging at the door of change yet still very much imprisoned by the infrastructure and philosophical viewpoints of its past. It is, without doubt, a prime region for provocative travel experiences. A lifelong passion for adventure travel gave rise to the exotic idea. The time was right; go before the East became too like the West and while they were still young and eager. They went with their two Specialized Rock Hopper mountain bikes, two T-shirts, two pairs of riding shorts, one long pant for modesty, a 35 mm camera, 100 rolls of film, and six Lonely Planet phrase books (one for each strange language they would have to learn to communicate). They would flourish, flounder, and challenge their physical and emotional stamina as they intermingled in the daily lives of the local populations. **On Our Own** tells the tales in stinging and hilarious reality of Anne's and Mike's reactions to and interactions with the varied people and the intriguing cultures they encountered along the way: spirit worshipping Balinese who wore their culture proudly through the streets; hard working Javanese pressured into a meager life by over-population and competition; over-zealous Sumatrans screaming

hello, chasing Anne and Mike and pulling them off their bikes; reserved Thais always ready with a helping hand; gracious Vietnamese plodding against heavy odds into a brighter future; enigmatic Chinese, pushing the western concept of honesty to the brink of extinction. Anne conveys with astonishing truth what it takes to cope with events from day to day when totally immersed in an unfamiliar world. On Our Own's stories rise out of everyday ordinary experiences made extraordinary by place, culture, custom and language. Their remarkable journey reveals a world so many know so little about. **Human Trafficking A Global Perspective** [Cambridge University Press](#) This book examines all forms of human trafficking globally, revealing the operations of the trafficking business and the nature of the traffickers themselves. Using a historical and comparative perspective, it demonstrates that there is more than one business model of human trafficking and that there are enormous variations in human trafficking in different regions of the world. Drawing on a wide body of academic research - actual prosecuted cases, diverse reports and field work and interviews conducted by the author over the last sixteen years in Asia, Latin America, Africa, Europe and the former socialist countries - Louise Shelley concludes that human trafficking will grow in the twenty-first century as a result of economic and demographic inequalities in the world, the rise of conflicts and possibly global climate change. Coordinated efforts of government, civil society, the business community, multilateral organizations and the media are needed to stem its growth. **Retirement Migration from the U.S. to Latin American Colonial Cities** [Springer Nature](#) This book provides a comprehensive overview of a growing phenomenon in migration: retired Americans moving to Latin America. Through in-depth profiles of two of the most popular destinations - Cuenca, Ecuador and San Miguel de Allende, Mexico, the book provides a unique commentary on the social forces shaping this new diaspora and its impact on the settings to which retirees relocate. Sections of the book address the lives and activities of retirees themselves; their impact on real estate, business development, and gentrification within historic cities; the availability and access to medical and long-term care services; and the role of governmental policies in attracting immigrant retirees and shaping their societal impact. Concluding sections provide guidance for potential retirees and for cities and countries interested in attracting these new immigrants while minimizing adverse impact on local culture and quality of life. Carefully researched and extensively illustrated with photographs, maps, figures, and tables, the book serves as an important new resource for scientists and policy makers, as well as for baby boomers who have retired abroad or are considering doing so. **Latin American Political Culture Public Opinion and Democracy** [CQ Press](#) Latin American Political Culture: Public Opinion and Democracy presents a genuinely pan-Latin American examination of the region's contemporary political culture. This is the only book to extensively investigate the attitudes and behaviors of Latin Americans based on the Latin American Public Opinion Project's (LAPOP) AmericasBarometer surveys. The findings reveal a complex Latin America with distinct political culture. Authors John Booth and Patricia Bayer Richard join rigorous analysis with clear graphic presentation and extensive examples, and readers learn about public opinion research, engage with further questions for analysis, and have access to data, an expansive bibliography, and links to appendices. **The Back Door Guide to Short-term Job Adventures Internships, Extraordinary Experiences, Seasonal Jobs, Volunteering, Work Abroad Indigenous Ecotourism Sustainable Development and Management** [CABI](#) "This volume reviews indigenous ecotourism as a special type of nature-based tourism and examines the key principles of conservation and community benefits from indigenous-owned and operated ecotourism businesses or joint ventures. environment is increasingly intense, interactions between human and wildlife are becoming more and more complex. Some species pose problems for human activities while many others need to be helped in order to continue to exist. This book follows the first volume called 'Problematic Wildlife', edited by F.M. Angelici and published by Springer in 2016, which has had considerable success with readers and critics. The volume includes 21 chapters divided into 7 parts devoted specific topics which are approached in a multidisciplinary way. There are both review chapters and specific cases, always bearing in mind the interest for an international audience. The book is useful both for scientists, wildlife specialists, conservationists, zoologists, ecologists, university students, nature managers, and for those who live in contact with wildlife and its problems, such as farmers, shepherds, hunters, urban planners, and staff of parks and nature reserves. Its ultimate goal is to offer scientific and pragmatic approaches to manage each categories of problematic species.
