THE NARAYANPUR INCIDENT

Penguin UK 8 August 1942. As Gandiji and prominent leaders are put in jail, Babu and Manju suddenly find themselves a part of the larger protests--their schools close down and their father is put behind bars. Their daring brother Mohan goes underground and the rest of the family moves to Narayanpur, a sleepy little village seemingly untouched by the turbulence in the country. But Narayanpur is seething within and it all comes to a head when a group of children dare to confront the police.

LEARNER-CENTRED EDUCATION IN INTERNATIONAL PERSPECTIVE

WHOSE PEDAGOGY FOR WHOSE DEVELOPMENT?

Routledge Is learner-centred education appropriate for all societies and classrooms? Learner-centred education (LCE) is a travelling policy, widely promoted by international agencies and national governments. Arguments in favour of this pedagogical tradition refer to theories and evidence from cognitive psychology, claiming that all learners can benefit equally from its judicious use. Beyond the benefits to the individual however, lie a set of assumptions about learner-centred education as a foundation for the building of democratic citizens and societies, suitable for economies of the future. These promises have been questioned by critics who doubt that it is appropriate in all cultural and resource contexts, and there is considerable evidence in the global South of perennial problems of implementation. In the light of these debates, is LCE still a good development 'bet'? This book provides an authoritative and balanced investigation of these issues, exploring the contextual factors from global movements to local resourcing realities which have fuelled it as a discourse and affected its practice. In the light of the theoretical underpinnings and research evidence, the book addresses pressing questions: to what extent is learner-centred education a sound choice for policy and practice in developing countries? And if it is a sound choice, under which conditions is it a viable one? The book is divided into three key parts: - Learner-centred Education as a Global Phenomenon - Learner-centred Education in Lower and Middle-income Countries - Lessons and Resolutions This book provides a much-needed fresh analysis of the concept and practice of LCE. It will be valuable reading for academics and post-graduates with a focus on comparative and international education, along with policy-makers in developing countries and development agencies.

LAST YEARS SOLVED PAPERS (SSC SEMI-ENGLISH MEDIUM): MAHARASHTRA BOARD CLASS 10 FOR 2022 EXAMINATION

Oswal Publishers

EDUCATION POLICY IN DEVELOPING COUNTRIES

University of Chicago Press Almost any economist will agree that education plays a key role in determining a country's economic growth and standard of living, but what we know about education policy in developing countries is remarkably incomplete and scattered over decades and across publications. Education Policy in Developing Countries rights this wrong, taking stock of twenty years of research to assess what we actually know—and what we still need to learn—about effective education policy in the places that need it the most. Surveying many aspects of education—from administrative structures to the availability of health care to parent and student incentives—the contributors synthesize an impressive diversity of data, paying special attention to the gross imbalances in educational achievement that still exist between developed and developing countries. They draw out clear implications for governmental policy at a variety of levels, conscious of economic realities such as budget constraints, and point to crucial areas where future research is

needed. Offering a wealth of insights into one of the best investments a nation can make, Education Policy in Developing Countries is an essential contribution to this most urgent field.
