Critical Mineral Resources of the United States

Economic and Environmental Geology and Prospects for Future Supply

Geological Survey **As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities. Mineral commodities that have important uses and face potential supply disruption are critical to American economic and national security. However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may be critical today, and one considered critical today may not be so in the future. The U.S. Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security. For each mineral commodity covered, the authors provide a comprehensive look at (1) the commodity's use; (2) the geology and global distribution of the mineral deposit types that account for the present and possible future supply of the commodity; (3) the current status of production, reserves, and resources in the United States and globally; and (4) environmental considerations related to the commodity's production from different types of mineral deposits. The volume describes U.S. critical mineral resources in a global context, for no country can be self-sufficient for all its mineral commodity needs, and the United States will always rely on global mineral commodity supply chains. This volume provides the scientific understanding of critical mineral resources required for informed decisionmaking by those responsible for ensuring that the United States has a secure and sustainable supply of mineral commodities.**

Working Paper

Getting Textbooks to Every Child in Sub-Saharan Africa

Strategies for Addressing the High Cost and Low Availability Problem

World Bank Publications **Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit**

of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process †“ methods, copyright, length of print runs, effective procurement practices †“ rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

The Negotiator

From the bestselling author of The Day of the Jackal

Random House 'Thriller writing of the highest quality. A masterful blend of excitement and tension.' *Sunday Telegraph*
 The kidnapping of a young man on a country road in Oxfordshire is but the first brutal step in a ruthless plan to force the President of the United States out of office. If it succeeds, he will be psychologically and emotionally destroyed. Only one man can stop it - Quinn, the world's foremost Negotiator, who must bargain for the life of an innocent man, unaware that ransom was never the kidnapper's real objective . . . The Negotiator unfolds with the spellbinding excitement, unceasing surprise and riveting detail that are the hallmarks of Frederick Forsyth, the master storyteller.

Global Development Finance 2009, 1

Analysis and Outlook

World Bank Publications "Over the past two years, the world has seen turmoil in a relatively small segment of the U.S. credit markets morph into a severe global economic and financial crisis. Although aggressive monetary policy, fiscal stimulus, and guarantee programs to shore up the banking industry have begun to stabilize financial markets and slow the pace of economic contraction, policy makers face an extended battle to revive the global economy. Going forward, national and international policy makers must support emerging signs of recovery with persistent, robust efforts to restore confidence in the financial system and transform the adverse feedback loop between the financial sector and the real economy into a positive one. With analysis and data extending from short-term bank lending to long-term bond issuance in both local and foreign currency, *Global Development Finance 2009: Charting a Global Recovery* is unique in its breadth of coverage of the trends and issues of fundamental importance to the financing of the developing world, including coverage of capital originating from developing countries themselves. The report is an indispensable resource for governments, economists, investors, financial consultants, academics, bankers, and the entire development community.

Towards a Sustainable Management of Mine Wastes

Reprocessing, Reuse, Revalorization and Repository

MDPI The need for efficient and sustainable management methods of mine waste is continuously growing all around the world. These waste products often present serious management problems due to their more or less significant amounts and possible environmental threats. This Special Issue highlights the recent and new trends in sustainable mine waste management techniques. Currently, it is essential to sustainably manage mine waste, considering social, economic, environmental and technical aspects. In this Special Issue, insights related to the following issues are highlighted: the problems around mine waste, the fine characterization of mine waste, the latest available technical and environmental solutions to efficiently manage mine waste, including treatment and processing before disposal and high value element recovery, with the view of moving towards defining effective, low-cost and ecofriendly methods, the recycling of mine waste products as alternative resources in different sectors, and finally laboratory, pilot and/or industrial-scale studies related to these topics of research. Scientists and industry and governance stakeholders have to face these new challenges to find the best management practices for the future.

PISA Take the Test Sample Questions from OECD's PISA Assessments

Sample Questions from OECD's PISA Assessments

OECD Publishing This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

The Puppet Masters

How the Corrupt Use Legal Structures to Hide Stolen Assets and What to Do About It

World Bank Publications This report examines the use of these entities in nearly all cases of corruption. It builds upon case law, interviews with investigators, corporate registries and financial institutions and a 'mystery shopping' exercise to provide evidence of this criminal practice.

Play = Learning

How Play Motivates and Enhances Children's Cognitive and Social-Emotional Growth

Oxford University Press In *Play=Learning*, top experts in child development and learning contend that in over-emphasizing academic achievement, our culture has forgotten about the importance of play for children's development.

Ethical Trade in African Horticulture

Gender, Rights and Participation

Codes of conduct covering employment conditions of southern producers have gained popularity over the past decade. In African horticulture employers now face a plethora of codes coming from supermarkets, importers, exporters and trade associations. Women constitute the majority of workers in African export horticulture. However, men are often in permanent employment, whereas women tend to work in temporary and insecure jobs. This report provides an in-depth assessment of gender and ethical trade in South African fruit, Kenyan flowers and Zambian flowers and vegetables. It examines the gendered needs and rights of workers, as articulated by workers themselves, and how these could best be addressed by codes of conduct. The research paid particular attention to vulnerable groups such as women and seasonal, casual and migrant workers, who typically face a different set of constraints and opportunities in employment.

Mining for Change

Natural Resources and Industry in Africa

Oxford University Press For a growing number of countries in Africa the discovery and exploitation of natural resources is a great opportunity, but one accompanied by considerable risks. This book presents research on how to better manage the revenues and opportunities associated with natural resources.

To Read Or Not to Read: A Question of National Consequence

Executive Summary

DIANE Publishing Executive Summary for a report which gathers & collates the best national data available to provide a reliable & comprehensive overview of American reading today. This report relies on large, nat. studies conducted on a regular basis by U.S. fed. agencies, supplemented by academic, foundation, & business surveys. Although there has been measurable progress in recent years in reading ability at the elementary school level, all progress appears to halt as children enter their teenage years. There is a general decline in reading among teenage & adult Americans. Both reading ability & the habit of regular reading have greatly declined among college grad. The declines have demonstrable social, economic, cultural, & civic implications. Charts & tables.

Equity and Quality in Education Supporting Disadvantaged Students and Schools

Supporting Disadvantaged Students and Schools

OECD Publishing Across OECD countries, almost one in every five students does not reach a basic minimum level of skills. This book presents a series of policy recommendations for education systems to help all children succeed.

The Laws of the Republic of Zambia

Jesus the Healer

Whitaker House For years, this book has challenged and inspired readers to step out in faith and receive the healing that Christ purchased for us. Many people have been healed while reading these pages! Legendary Bible teacher Dr. E. W. Kenyon has a rare gift for presenting the deep and profound truths of God's Word in a simple and easily understood way. His teachings on expressing "positive confessions of faith" formed much of the foundation for Word of Faith Pentecostalism. In *Jesus the Healer*, Dr. Kenyon fully explores the powerful gift of healing that Jesus demonstrated throughout His ministry. Sickness and disease are not God's will for believers. So Kenyon unpacks God's methods of healing and how to live the abundant life that Jesus promised. God's healing promises are no good unless you act on them. Believing is acting on God's Word. Faith is the result of acting on God's Word. Healing miracles are available today for those who believe and step out in faith!

World Migration Report 2020

United Nations Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

A Guide to Gender-analysis Frameworks

Oxfam This is a single-volume guide to all the main analytical frameworks for gender-sensitive research and planning. It draws on the experience of trainers and practitioners, and includes step-by-step instructions for using the frameworks.

The Early Years Matter

Education, Care, and the Well-Being of Children Birth to 8

Teachers College Press This accessible and engaging work introduces current and future teachers, child care providers, and others interested in early childhood education to the importance for the early years in children's well-being and success. It summarizes their research on the value of high-quality services for young children, families, and society, showing why early education matters both today and into the future. Emphasizing the need to understand and respect young children's strengths and unique characteristics, the authors offer inspiration for working in the field, as well as addressing the realistic challenges of implementing developmentally appropriate care and education.

Encyclopedia of Christianity in the United States

Rowman & Littlefield From the Founding Fathers through the present, Christianity has exercised powerful influence in America—from its role in shaping politics and social institutions to its hand in art and culture. The Encyclopedia of Christianity in the United States outlines the myriad roles Christianity has played and continues to play. This masterful multi-volume reference includes biographies of major figures in the Christian church in the United States, documents and Supreme Court decisions, and information on theology and theologians, denominations, faith-based organizations, immigration, art—from decorative arts and film to music and literature—evangelism and crusades, women's issues, racial issues, civil religion, and more.

Civic Education & Culture

Intercollegiate Studies Inst What do we teach our citizens? This great Platonic question is as crucial today as it has ever been. America and the West come to terms with this question in the context of their richly diverse, technologically sophisticated, fundamentally individualistic societies. Virtually all would agree that such diversity, sophistication, and freedom are positive political and cultural goods, but many would also argue that they militate against the coherence that all regimes and civilizations must, in some way, demand. The nature, extent, and coherence of civic education are perhaps the greatest determinants of a regime's politics and culture, and the regime can in turn do much to foster the right kind of civic education. This book presents the insights of renowned scholars and writers, including Stephen H. Balch, Timothy Fuller, and Roger Kimball, who have thought broadly and deeply about the role that education at all levels plays in promoting, maintaining, or undermining our politics, culture, and society.

The Funding of School Education

Connecting Resources and Learning

OECD This report on the funding of school education constitutes the first in a series of thematic comparative reports bringing together findings from the OECD School Resources Review. School systems have limited financial resources with which to pursue their objectives and the design of school funding policies plays a key role in ensuring that resources are directed to where they can make the most difference. As OECD school systems have become more complex and characterised by multi-level governance, a growing set of actors are increasingly involved in financial decision-making. This requires designing funding allocation models that are aligned to a school system's governance structures, linking budget planning procedures at different levels to shared educational goals and evaluating the use of school funding to hold decision makers accountable and ensure that resources are used effectively and equitably. This report was co-funded by the European Commission. .

The Impact of School Infrastructure on Learning

A Synthesis of the Evidence

World Bank Publications 'The Impact of School Infrastructure on Learning: A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning, particularly the aspiration for "accessible, well-built, child-centered, synergetic and fully realized learning environments.†? Written in a style which is both clear and accessible, it is a practical reference for senior government officials and professionals involved in the planning and design of educational facilities, as well as for educators and school leaders. --Yuri Belfali, Head of Division, Early Childhood and Schools, OECD Directorate for Education and Skills This is an important and welcome addition to the surprisingly small, evidence base on the impacts of school infrastructure given the capital investment involved. It will provide policy makers, practitioners, and those who are about to commission a new build with an important and comprehensive point of reference. The emphasis on safe and healthy spaces for teaching and

learning is particularly welcome. --Harry Daniels, Professor of Education, Department of Education, Oxford University, UK This report offers a useful library of recent research to support the, connection between facility quality and student outcomes. At the same time, it also points to the unmet need for research to provide verifiable and reliable information on this connection. With such evidence, decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple competing dimensions of school policy, including the construction and maintenance of the school facility. --David Lever, K-12 Facility Planner, Former Executive Director of the Interagency Committee on School Construction, Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided. The authors have finally brought that body of evidence together in this well-structured report. The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come. We should all join this conversation to further the process of globally enhancing learning-environment quality! --David Schrader, AIA, Educational Facility Planner and Designer, Former Chairman of the Board of Directors, Association for Learning Environments (A4LE)

Food Crop Production by Smallholder Farmers in Southern Africa

Challenges and Opportunities for Improvement

Academic Press **Food Crop Production by Smallholder Farmers in Southern Africa: Challenges and Opportunities for Improvement** evaluates traditional cultivation practices used by smallholder farmers, providing a synthesis of the latest information on increasing crop yield through adoption of research innovations. The book catalogs smallholder cultivation practices and recommends innovative strategies for improving the agriculture sector including: management practices that reduce net carbon emissions; technologies that improve soil structures and conserve the natural resources base; means of empowering female resources along value chains; and government commitment to adopt policies that enhance agriculture productivity by encouraging farmers to use environmentally sound cultivation technologies. Traditional farming techniques often produce negative impacts on the environment and ecosystem resulting in outbreaks of diseases and pests. In addition to the region's recurrent droughts, these outbreaks of numerous diseases and pests, weeds and other invasive plants put thousands at risk of poverty and hunger, as well as malnutrition. This book presents enhanced agricultural production technologies for ensuring adequate food production, safety and nutritional quality for the population of Southern Africa and forms the basis for an increased SADC regional effort in food production through which financial and trade institutions can improve stakeholder capacities, encourage micro-enterprise development and enhance employment and regional trade. Provides a critical synthesis of data and information for increasing crop yield through adoption of research innovations Evaluates traditional and scientific interventions that address food security issues of the poor farmers in the region Presents agro-ecologies of countries in the region and how they relate to various cultivation practices Catalogs smallholder cultivation practices and recommends innovative strategies for improving the agriculture sector

The Case of Honey in Zambia

CIFOR

World Social Report 2020

Inequality in a Rapidly Changing World

United Nations This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Postcolonial Theory and the Specter of Capital

Verso Books Postcolonial theory has become enormously influential as a framework for understanding the Global South. It is also a school of thought popular because of its rejection of the supposedly universalizing categories of the Enlightenment. In this devastating critique, mounted on behalf of the radical Enlightenment tradition, Vivek Chibber offers the most comprehensive response yet to postcolonial theory. Focusing on the hugely popular Subaltern Studies

project, Chibber shows that its foundational arguments are based on a series of analytical and historical misapprehensions. He demonstrates that it is possible to affirm a universalizing theory without succumbing to Eurocentrism or reductionism. Postcolonial Theory and the Specter of Capital promises to be a historical milestone in contemporary social theory.

Pathfinders

Imperial War Museums Over the course of one night in 1942, the crew members of Wellington bomber 'P for Pathfinder' each reflect on the paths of their own lives, as they embark on a fateful mission deep into the heart of Nazi Germany.

Millennium Development Goals Report 2015

This report presents the yearly assessment of global progress towards the Millennium Development Goals (MDGs), determining the areas where progress has been made, and those that are lagging behind. The report is based on a master set of data compiled by the Inter-Agency and Expert group on MDG indicators led by the Statistics Division of the Department of Economic and Social Affairs.

Global Development Finance 2009

Charting a Global Recovery

Global Development Finance 'Global Development Finance' - the World Bank's annual report on the external financing of developing countries - provides monitoring and analysis of development finance, identifying key emerging trends and policy challenges in international financial flows that are likely to affect the growth prospects of developing countries. As major financial institutions currently recognize losses from the U.S. subprime mortgage market crisis and rebuild their balance sheets through a more conservative approach to lending and risk management, the central theme of this year's report will be the market for international bank credit to developing countries. It is an indispensable resource for governments, economists, investors, financial consultants, academics, bankers, and the entire development community. 'Vol I: Analysis and Outlook' reviews recent trends in financial flows to developing countries. 'Vol II. Summary and Country Tables'* includes comprehensive data for 138 countries, as well as summary data for regions and income groups. Also available on CD-ROM, with more than 200 historical time series from 1970 to 2007, and country group estimates for 2008.* 'Vol II. Summary and Country Tables' not sold separately.

Veterinary Medicine - E-BOOK

A textbook of the diseases of cattle, horses, sheep, pigs and goats

Elsevier Health Sciences Treat the diseases affecting large animals! **Veterinary Medicine, 11th Edition** provides up-to-date information on the diseases of horses, cattle, sheep, goats, and pigs. Comprehensive coverage includes the principles of clinical examination and making a diagnosis, along with specific therapy recommendations. For easier use, this edition has been divided into two volumes and restructured into a logical, anatomically based approach to disease. From internationally known veterinary experts Peter Constable, Kenneth Hinchcliff, Stanley Done, and Walter Grünberg, this book is the definitive, one-stop reference for farm animal and equine care. Comprehensive coverage includes information essential to any large-animal veterinarian, especially those working with horses, cattle, sheep, goats, or pigs. Coverage of diseases addresses major large-animal diseases of all countries, including foreign animal and emerging diseases. User-friendly format makes it easier to quickly absorb key information. Quick review/synopsis sections make important information on complex diseases easy to find. **NEW!** Convenient, easy-access format is organized by organ systems, and divides the content into two compact volumes with the same authoritative coverage. Nearly 200 new color photographs and line drawings are included in this edition. **NEW** full-color design improves navigation, clarifies subject headings, and includes more boxes, tables, and charts for faster reference. **New Diseases Primarily Affecting the Reproductive System** chapter is added. Updated and expanded chapter on pharmacotherapy lists therapeutic interventions and offers treatment boxes and principles of antibiotic use. Expanded sections on herd health include biosecurity and infection control, and valuable Strength of Evidence boxes. **NEW** or extensively revised sections include topics such as the Schmallenberg and Bluetongue viral epidemics of ruminants in Europe, Wesselbron disease in cattle, hypokalemia in adult cattle, equine multinodular pulmonary fibrosis, Hendra virus infection, porcine reproductive and respiratory syndrome, torque teno virus, and numerous recently identified congenital and inherited disorders of large animals. Additional content is provided on lameness in cattle and the diseases of cervids.

Education at a Glance

OECD Indicators, 1997

The OECD education indicators enable countries to see themselves in light of other countries performance. They reflect on both the human and financial resources invested in education and on the returns of these investments.

The Fourth Industrial Revolution

Penguin UK The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Improving Science Education

International Perspectives

National Society For The Study Of Ed Specialists from Australia, Canada, Europe, the United Kingdom, and the United States present a broad range of perspectives for improving science education in primary and secondary schools. This volume offers educators and researchers a glimpse at what peers from around the world have done to help science students achieve high levels of success. The introduction is a concise account of worldwide reform movements, from modernizations in the 1950s that dramatically improved the teaching of chemistry and physics to such changes in the 1980s as the emphasis on the learning-to-learn approach and the trend toward using social issues as a vehicle for teaching science. The nine essays survey topics that include teaching inquiry skills and other techniques to foster a joy of science; creating an understanding of real-world applications of science; managing course instruction with computers; encouraging teachers to adopt new styles of teaching; cross-national comparisons of science achievement; and the differences between boys and girls in attitude, learning, and degree of participation.

Language in Zambia

Routledge Originally published in 1978, this volume is divided into 3 parts. Part 1 presents an overview of the linguistic situation in Zambia: who speaks which languages, where they are spoken, what these languages are like. Special emphasis is given to the extensive survey of the languages of the Kafue basin, where extensive changes and relocations have taken place. Part 2 is on language use: patterns of competence and of extension for certain languages in urban settings, configurations of comprehension across language boundaries, how selected groups of multilinguals employ each of their languages and for what purposes, what languages are used in radio and television broadcasting and how decisions to use or not use a language are made. Part 3 involves language and formal education: what languages, Zambian and foreign, are used at various levels in the schools, which are taught, with what curricula, methods, how teachers are trained, how issues such as adult literacy are approached and with what success.

Zambia Education Curriculum Framework 2013
