Surviving Your Dissertation

A Comprehensive Guide to Content and Process

SAGE Publications, Incorporated This book offers a user-friendly guide to preparing a perfect dissertation. Rather than focusing only on how to draft the report itself, the authors provide readers with material on generating a researchable question, as well as methods for assessing blind spots and learning styles that may get in the way of completing a dissertation. Using examples from a wide variety of disciplines, the authors demonstrate how to write up results, develop appropriate writing skills, and ways to construct tables and figures. In addition, the book includes information on writing up qualitative research, using computer technology effectively to assist in the dissertation process and following ethical guidelines in conducting research.

Handbook of Writing for the Mathematical Sciences, Third Edition

SIAM Handbook of Writing for the Mathematical Sciences provides advice on all aspects of scientific writing, with a particular focus on writing mathematics. Its readable style and handy format, coupled with an extensive bibliography and comprehensive index, make it useful for everyone from undergraduates to seasoned professionals. This third edition revises, updates, and expands the best-selling second edition to reflect modern writing and publishing practices and builds on the author's extensive experience in writing and speaking about mathematics. Some of its key features include coverage of fundamentals of writing, including English usage, revising a draft, and writing when your first language is not English; thorough treatment of mathematical writing, including how to choose notation, how to choose between words and symbols, and how to format equations; and many tips for exploiting LaTeX and BibTeX. Higham also provides advice on how to write and publish a paper, covering the entire publication process, and includes anecdotes, quotes, and unusual facts that enliven the presentation. The new edition has been reorganized to make the book easier to use for reference; treats modern developments in publishing such as open access, DOIs, and ORCID; and contains more on poster design, including e-posters and the poster blitz. The new edition also includes five new chapters on the following topics: · workflow covering text editors, markup languages, version control, and much more; · the principles of indexing and how to prepare an index in LaTeX; · reviewing a paper, book proposal, or book; · writing a book, including advice on choosing a publisher and LaTeX tips particular to books; and · writing a blog post.

The Engineering Design Challenge

Springer Nature The Engineering Design Challenge addresses teaching engineering design and presents design projects for first-year students and interdisciplinary design ventures. A short philosophy and background of engineering design is discussed. The organization of the University of Wyoming first-year Introduction to Engineering program is presented with an emphasis on the first-year design challenges. These challenges are presented in a format readily incorporated in other first-year programs. The interdisciplinary design courses address the institutional constraints and present organizational approaches that resolve these issues. Student results are summarized and briefly assessed. A series of short intellectual problems are included to initiate discussion and understanding of design issues. Sample syllabi, research paper requirements, and oral presentation evaluation sheets are included.

Prevent strategy

The Stationery Office The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

Electronic Government and Electronic Participation

Joint Proceedings of Ongoing Research, PhD Papers, Posters and Workshops of IFIP EGOV and EPart 2016

IOS Press ICT, e-government and electronic participation have become increasingly important in the public sector and the social sphere in recent years. This book presents 53 of the papers accepted for the dual IFIP EGOV-ePart conference 2016, which took place in Guimarães, Portugal, in September 2016. This conference, which consisted of five partially intersecting tracks, presented advances in the socio technological domain of the public sphere demonstrating cutting edge concepts, methods, and styles of investigation by multiple disciplines. The conference has been a premier academic forum for over 15 years and has a worldwide reputation as one of the top two conferences in the research domains of electronic, open and smart government, policy and electronic participation. The papers in this joint proceedings of the 2016 IFIP EGOV-ePart conference comprise accepted submissions from all categories and all tracks (with the exception of some 38 papers which are published separately). The book is divided into 9 sections: eParticipation, e-Government Evaluation, Open Data and Open Government, Governance, Smart Cities, e-Government Implementation and Adoption, Ph.D. Colloquium Papers, Posters, and Workshops. Offering a comprehensive overview of research and practice on electronic government and electronic participation, this book will be of interest to all those involved in the socio-technological domain of the public sphere.

The Road to Results

Designing and Conducting Effective Development Evaluations

World Bank Publications 'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results,' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

Strengthening Forensic Science in the United States

A Path Forward

[National Academies Press](#) Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Peer Review, Peer Education, and Modeling in the Practice of Clinical Ethics

Consultation: The Zadeh Project

[Springer](#) This open access book about the Zadeh Project demonstrates and explores a core question in clinical ethics: how can ethics consultants be accountable in the face of a robust plurality of ethical standpoints, especially those that underwrite practices and methods for doing ethics consultation as well as those viewpoints and values encountered in daily clinical ethics practice? Underscoring this question is the recognition that the field of clinical ethics consultation has arrived at a crucial point in its maturation. Many efforts are underway to more formally “professionalize” the field, with most aimed toward stabilizing a specific set of institutional considerations. Stretched between these institutional and practical initiatives resides a crucial set of ethical considerations, chief among them the meaning and scope of responsibility for clinical ethics consultants. Developed around a long-form case scenario, the Zadeh Project provides a multi-layered series of “peer-reviews”: critique of the actions of the case scenario’s ethics consultant; reflection on clinical ethics method; examination of the many ways that commitments to method and practice can, and do, intersect, overlap, and alter one another. The design and format of this book thus models a key element for clinical ethics practice: the need and ability to provide careful and thoughtful explanation of core moral considerations that emerge among diverse standpoints. Specifically designed for those studying to become and those who are ethics consultants, this book, with its innovative and multi-layered approach, allows readers to share a peer-review-like experience that shows accountability to be what it is, an ethical, not merely procedural or administrative, undertaking.

Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era

[IGI Global](#) With the introduction of policies to combat COVID-19, far greater numbers of employees across the globe—including those with limited job autonomy—have moved to undertake their entire job at home. Although challenging in the current climate, embracing these flexible modes of work such as working at home, including relevant investment in technology to enable this, will not only deliver potential organizational benefits but also increase the adaptability of the labor market in the short and longer terms. Although perhaps not the central concern of many in the current climate, “good” home-based work is achievable and perhaps even a solution to the current work-based dilemma created by COVID-19 and should be a common goal for individuals, organizations, and society. Research also has shifted to focus on the routines of workers, organizational performance, and well-being of companies and their employees along with reflections on the ways in which these developments may influence and alter the nature of paid work into the post-COVID-19 era. The Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era focuses on the rapid expansion of remote working in response to the global COVID-19 pandemic and the impacts it has had on both employees and businesses. The content of the book progresses understanding and raises awareness of the benefits and challenges faced by large-scale movements to remote working, considering the wide array of different ways in which the large-scale movement to remote working is impacting working lives and the economy. This book covers how different fields of work are responding and implementing remote work along with providing a presentation of how work occurs in digital spaces and the impacts on different topics such as gender dynamics and virtual togetherness. It is an ideal reference book for HR professionals, business managers, executives, entrepreneurs, policymakers, researchers, students, practitioners, academicians, and business professionals interested in the latest research on remote working and its impacts.

The Palgrave Handbook of Co-Production of Public Services and Outcomes

[Springer Nature](#) This Handbook provides a comprehensive and authoritative account of the movement towards co-production of public services and outcomes, a topic which has recently become one of the most intensely debated in public management and administration, both in practice and in the academic literature. It explores in depth the processes of co-commissioning, co-design, co-delivery and co-assessment as major approaches to co-production through citizen voice and citizen action and as key mechanisms in the co-creation of public value. The key debates in the field are fully explored in chapters from over 50 eminent authors in the field, who examine the roots of co-production in the social sciences, the growth of co-production in policy and practice, its implementation and management in the public domain, and its governance, including its negative aspects (the ‘dark side’ of co-production). A final section discusses different aspects of the future research agenda for co-production.

To Kill A Mockingbird

[Random House](#) THE ORIGINAL TEXT 'Shoot all the Bluejays you want, if you can hit 'em, but remember it's a sin to kill a Mockingbird.' Atticus Finch gives this advice to his children as he defends the real mockingbird of this classic novel - a black man charged with attacking a white girl. Through the eyes of Scout and Jem Finch, Lee explores the issues of race and class in the Deep South of the 1930s with compassion and humour. She also creates one of the great heroes of literature in their father, whose lone struggle for justice pricks the conscience of a town steeped in prejudice and hypocrisy.

Maternal Child Nursing Care in Canada - E-Book

[Elsevier Health Sciences](#) Featuring the most accurate, current, and clinically relevant information available, Perry’s Maternal Child Nursing Care in Canada combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when

providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

Introduction to the English Legal System 2018-19

[Oxford University Press](#) Introduction to the English Legal System is the ideal foundation for those coming new to the study of law. Writing in a highly engaging and accessible style, Martin Partington introduces the purposes and functions of English law, the law-making process, and the machinery of justice, while also challenging assumptions and exploring current debates. Consolidating over 40 years' experience in the law, Martin Partington examines beliefs about the English legal system, and encourages students to question how far it meets the growing demands placed on it. Incorporating all the latest developments, this concise introduction brings law and the legal system to life. Online resources: This book is accompanied by online resources, including: questions for reflection and discussion; multiple choice questions; a glossary; further reading materials; web links; and a link to Martin Partington's blog, which covers his views on key developments in the English justice system.

Disputes and Dilemmas in Health Law

[Federation Press](#) This book replaces the successful *Controversies in Health Law*. Under the same editorship and much the same authorship, it is substantially larger (30 chapters instead of 18) and correspondingly more comprehensive. It retains the lively analysis and the focus on controversial and cutting-edge problems. The chapters are broken up into parts covering Litigation and Liability; Reproductive Technologies; The Sequelae of the End of Life; Public Health; Ethical Frameworks and Dilemmas; Regulation; Human Rights and Therapeutic Jurisprudence; Research and Vulnerability and Information, Privacy and Confidentiality. They consider issues raised by new technologies, changing legislation and altering community expectations; by new regulatory processes for medicine and all of the health professions; by the fundamental changes to civil liability for medical negligence; by the fierce debate over the role of coroners. *Disputes and Dilemmas in Health Law* covers questions on property in human tissue and on the ethical and legal aspects of the genetics revolution; provides a modern take on "old" issues such as reproductive law; takes account of changes relating to expert evidence; and discusses how difficult cases in relation to psychiatric injury and wrongful life are pushing compensability to its edges.

How to Write a Good Scientific Paper

Pm286

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Towards an International Code of Conduct for Private Security Providers

A View from Inside a Multistakeholder Process

[Ubiquity Press](#) The use of private security companies (PSCs) to provide security services has been on the rise since the end of the Cold War, with PSCs operating in a number of contexts, including armed conflict and areas where the rule of law has been compromised. The use of private actors to perform services that are traditionally associated with the state is not limited to PSCs, but is emblematic of a growing trend by governments to outsource functions with a view to improving efficiency and cutting budgets. Privatization of public functions can, however, present a number of challenges to existing national and international regulatory and oversight frameworks. In the private security sector these challenges were brought to international attention after high-profile incidents in which PSCs injured civilians revealed difficulties in effectively holding international PSCs accountable. This paper argues that crafting a multistakeholder regulatory approach in which key stakeholders work together to develop standards that are appropriately adapted for the private sector, as well as to create governance and oversight mechanisms to hold these private actors to effective account, helps to fill some of the governance gaps found in traditional regulatory approaches. It recounts the developments leading to the International Code of Conduct for Private Security Service Providers (ICOC) and its governance and oversight mechanism, the ICOC Association, offering an example of the development of an initiative which sets new international standards and elaborates a multistakeholder framework and approach to governance for the private security sector. A recent trend of state and non-state clients requiring compliance with the ICOC initiative in their contracts with PSCs offers a new take on binding international regulation of private actors.

Transcultural Blended Learning and Teaching in Postsecondary Education

IGI Global Schedule constraints and other complicating factors can make face-to-face educational methods inadequate to the needs of learners. Thus, blended learning has emerged as a compromise that reconciles the need for high-tech and high-touch learning and teaching interactions. **Transcultural Blended Learning and Teaching in Postsecondary Education** educates readers across nations and cultures and strengthens their understanding of theories, models, research, applications, best practices, and emerging issues related to blended learning and teaching through a holistic and transcultural perspective. This research volume serves as a valued resource for faculty, administrators, and leaders in postsecondary institutions to plan, develop, implement, and evaluate blended learning programs and courses. It also provides researchers with the latest research in transcultural blended learning and teaching theories, findings, best practices, and emerging trends.
