Catalogue of Risks Natural, Technical, Social and Health Risks *Springer Science & Business Media* Since the German edition of this book, the topic of risk has experienced even greater attention, not only in the world of science but also in other fields, such as economics and politics. Therefore, many new publications have evolved. To keep with the idea of an encyclopedia for the topic of risk, this book has been completely reworked. Not only are many updated examples included in chapter "Risks and disasters" but also new chapters have been introduced, such as the chapter "Indetermination and risk". This new chapter was developed since the question "Is it possible for risks to be completely eliminated, and if not why?" has become a major point of concern. Therefore, especially in this chapter, the focus of the book has - tended from a simple mathematical or engineering point of view to include much broader concepts. Here, not only aspects of system theory have to be considered, but also some general philosophical questions start to influence the considerations of the topic of risk. The main goal of this edition, however, is not only the extension and revision of the book, but also the translation into the English language to allow more readers access to the ideas of the book. The author deeply hopes that the success the book made in the German edition continues and that readers experience a major gain from reading the book. **Price Setting and Price Regulation in Health Care** *OECD Publishing* The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre

for Health Development in Kobe (Japan). **The Law of the Future and the Future of Law Volume II** *Torkel Opsahl Academic EPublisher* Rights of robots, a closer collaboration between law and the health sector, the relation between justice and development - these are some of the topics covered in **The Law of the Future and the Future of Law: Volume II**. The central question is: how will law evolve in the coming years? This book gives you a rich array of visions on current legal trends. The readable think pieces offer indications of law's cutting edge. The book brings new material that is not available in the first volume of **The Law of the Future and the Future of Law**, published in June 2011. Among the authors in this volume are William Twining (Emeritus Quain Professor of Jurisprudence, University College London), David Eagleman (Director, Initiative on Neuroscience and Law), Hassane Cisse (Deputy General Counsel, The World Bank), Gabrielle Marceau (Counsellor, World Trade Organisation), Benjamin Odoki (Chief Justice, Republic of Uganda), Martijn W. Scheltema (Attorney at law, Pels Rijcken and Droogleever Fortuijn), Austin Onuoha (Founder, The Africa Centre for Corporate Responsibility), Lokke Moerel (Partner, De Brauw Blackstone Westbroek), S.I. Strong (Senior Fellow, Center for the Study of Dispute Resolution), Jan M. Smits (Chair of European Private Law, Maastricht University). **Accountability in Public Policy Partnerships** *Springer* A PDF version of this book is available for free in open access via the OAPEN Library platform, www.oapen.org. This book presents a new model of accountability which ensures that public-private partnerships don't erode public accountability. It defines concrete accountability standards for different types of partnerships. **The Länder and German federalism** *Manchester University Press* This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. An illuminating introduction to how the Lander (the sixteen states of Germany) function not only within the country itself but also within the wider context of European political affairs. Looks at the Lander in the constitutional order of the country, and the political and administrative system. Their organization and administration is fully covered, as is their financial administration. The role of parties and elections in the Lander is looked at, and the importance of their parliaments. The first work in the English language that considers the Lander in this depth. **A Taxonomic Revision of Lamium (Lamiaceae)** *Brill Archive* **Reliability Engineering** *John Wiley & Sons* **An Integrated Approach to Product Development Reliability Engineering** presents an integrated approach to the design, engineering, and management of reliability activities throughout the life cycle of a product, including concept, research and development, design, manufacturing, assembly, sales, and service. Containing illustrative guides that include worked problems, numerical examples, homework problems, a solutions manual, and class-tested materials, it demonstrates to product development and manufacturing professionals how to distribute key reliability practices throughout an organization. The authors explain how to integrate reliability methods and techniques in the Six Sigma process and Design for

Six Sigma (DFSS). They also discuss relationships between warranty and reliability, as well as legal and liability issues. Other topics covered include: Reliability engineering in the 21st Century Probability life distributions for reliability analysis Process control and process capability Failure modes, mechanisms, and effects analysis Health monitoring and prognostics Reliability tests and reliability estimation Reliability Engineering provides a comprehensive list of references on the topics covered in each chapter. It is an invaluable resource for those interested in gaining fundamental knowledge of the practical aspects of reliability in design, manufacturing, and testing. In addition, it is useful for implementation and management of reliability programs. World Drug Report New Frontiers in Banking Services Emerging Needs and Tailored Products for Untapped Markets *Springer Science & Business Media* The book is devoted to a subject which deserves growing attention from policy makers, financial operators and academics. It is the issue of unbanking or underbanking in developed countries. With respect to this, the goal of the authors has been to devote more efforts to understanding the problem of financial exclusion in order to offer to low-moderate-income people new opportunities of accessing financial services (banking, credit and investment services). Digital Transformation and Global Society First International Conference, DTGS 2016, St. Petersburg, Russia, June 22-24, 2016, Revised Selected Papers *Springer* This book constitutes the refereed proceedings of the First International Conference on Digital Transformation and Global Society, DTGS 2016, held in St. Petersburg, Russia, in June 2016. The 43 revised full papers and 15 revised short papers, presented together with 3 poster papers and an invited paper were carefully reviewed and selected from 157 submissions. The papers are organized in topical sections on eSociety: New Social Media Studies; eSociety: eGovernment and eParticipation: Perspectives on ICTs in Public Administration and Democracy; eKnowledge: ICTs in Learning and Education Management; eCity: ICTs for Better Urban (Rural) Planning and Living; eHealth: ICTs in Healthcare; eScience: Big Data Complex Calculations. Maneuver and Firepower The Evolution of Divisions and Separate Brigades An Early Start Young Learners and Modern Languages in Europe and Beyond *Council of Europe* There is a growing interest in teaching languages to young children. This publication brings together papers from 18 countries. It gives a cross section of major achievements and problem areas as well as an insight into research issues. Landscape and Power in Geographical Space as a Social-Aesthetic Construct *Springer* This book examines the power definiteness of landscape from a social constructivist perspective with a particular focus on the importance of aesthetic concepts of landscape in development. It seeks to answer the question of how societal notions of landscape emerge, how they are individually updated and how these ideas affect the use and design of physical space. It also analyzes how physical manifestations of societal activity impact on understandings of individual and societal landscapes and addresses the

essential aspect of the social construction of landscape, cultural specificity, which in turn is discussed in the context of the expansion of a western landscape concept. The book offers an unprecedented, comprehensive and detailed examination of societal power relations in the context of landscape development. The numerous case studies from the physical manifestation of modern spatial planning in the United States, the power discourses concerning the design of model railway landscapes, and the medial production of stereotypical landscape notions shed light on the complex and multilayered interactions of collective and individual landscape references. It is a valuable resource for geographers, sociologists, landscape architects, landscape planners and philosophers.

Amphibian Evolution The Life of Early Land Vertebrates *John Wiley & Sons*

This book focuses on the first vertebrates to conquer land and their long journey to become fully independent from the water. It traces the origin of tetrapod features and tries to explain how and why they transformed into organs that permit life on land. Although the major frame of the topic lies in the past 370 million years and necessarily deals with many fossils, it is far from restricted to paleontology. The aim is to achieve a comprehensive picture of amphibian evolution. It focuses on major questions in current paleobiology: how diverse were the early tetrapods? In which environments did they live, and how did they come to be preserved? What do we know about the soft body of extinct amphibians, and what does that tell us about the evolution of crucial organs during the transition to land? How did early amphibians develop and grow, and which were the major factors of their evolution? The Topics in Paleobiology Series is published in collaboration with the Palaeontological Association, and is edited by Professor Mike Benton, University of Bristol. Books in the series provide a summary of the current state of knowledge, a trusted route into the primary literature, and will act as pointers for future directions for research. As well as volumes on individual groups, the series will also deal with topics that have a cross-cutting relevance, such as the evolution of significant ecosystems, particular key times and events in the history of life, climate change, and the application of a new techniques such as molecular palaeontology. The books are written by leading international experts and will be pitched at a level suitable for advanced undergraduates, postgraduates, and researchers in both the paleontological and biological sciences.

Expressions of Radicalization Global Politics, Processes and Practices *Springer*

This edited collection considers whether it is possible to discern how the level of ideology is affected by radicalization. In other words: what happens in the minds of people before they decide to use political violence as means to attain their goals? Also this book asks: what has to happen in the minds of people in order to preclude them from using political violence as a way of attaining their goals? This volume unites scholars from several disciplines and perspectives from a number of

different geographical, social and cultural contexts with the overarching aim to refine our understanding of what 'radicalization' actually implies. In *Defense of Lost Causes Verso* A high-energy philosophical manifesto on the concept and virtues of universal values addresses such topics as Heidegger's engagement with the Third Reich, the role of class struggles in global capitalism, and the legacy of Christianity against New Age spiritualism. Original. *Improving Drug Safety - a Joint Responsibility Simulation For The Social Scientist McGraw-Hill Education (UK)* Social sciences -- Simulation methods. Social interaction -- Computer simulation. Social sciences -- Mathematical models. (publisher) *Engineers' Guide to Pressure Equipment The Pocket Reference Wiley* The Engineers' Guide to Pressure Equipment incorporates both the technical and administrative aspects of vessel manufacture and use, introducing the basic principles of pressure equipment design, manufacture, quality assurance/inspection and operation during its working life. Engineering data from a wide range of sources is included. The author guides the reader through the most commonly used current and recent pressure vessel codes and standards. The Engineers' Guide to Pressure Equipment is an invaluable reference for engineers, technicians and students with activities in the pressure equipment business. **COMPLETE CONTENTS:** Websites: Quick reference Pressure equipment types and components Basic design Applications of pressure vessel codes Manufacture, QA, inspection and testing Flanges, nozzles, valves and fittings Boilers and HRSGs Materials of construction Welding and NDT Failure Pressure Equipment Directives and legislation In-service inspection References and Information Sources. *Life Cycle Assessment (LCA) A Guide to Best Practice John Wiley & Sons* This first hands-on guide to ISO-compliant Life Cycle Assessment (LCA) makes this powerful tool immediately accessible to both professionals and students. Following a general introduction on the philosophy and purpose of LCA, the reader is taken through all the stages of a complete LCA analysis, with each step exemplified by real-life data from a major LCA project on beverage packaging. Measures as carbon and water footprint, based on the most recent international standards and definitions, are addressed. Written by two pioneers of LCA, this practical volume is targeted at first-time LCA users but equally makes a much-valued reference for more experienced practitioners. From the content: * Goal and Scope Definition * Life Cycle Inventory Analysis * Life Cycle Impact Assessment * Interpretation, Reporting and Critical Review * From LCA to Sustainability Assessment and more. *Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units DIANE Publishing* *Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units* is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of *On Point: The United States Army in Operation IRAQI FREEDOM*. Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign

and suggested an assessment ought to be made about their continuing utility and means of employment. This revision contains some important additional information the author received after this book was originally published Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

Power System Engineering Planning, Design, and Operation of Power Systems and Equipment *John Wiley & Sons*

This edition provides a systematic presentation of the main concepts referring to the electrical systems planning and operation, with the particularly interesting inclusion of many practical data, frequent reference to the IEC standards, and a detached view on the main approaches used in practice. The selection of the material makes it possible for the operator to retrieve in the book both concepts and indications on the applications, without needing to take a look at many manufacturer's data or huge handbooks. Describing in detail how electrical power systems are planned and designed, this book illustrates the required structures of systems, substations and equipment using international standards and latest computer methods. This book discusses both the advantages and disadvantages of the different arrangements within switchyards and of the topologies of the power systems, describing methods to determine the main design parameters of cables, overhead lines, and transformers needed to realize the supply task, as well as the influence of environmental conditions on the design and the permissible loading of the equipment. Additionally, general requirements for protection schemes and the main schemes related to the various protection tasks are given.

Igneous Rocks: A Classification and Glossary of Terms Recommendations of the International Union of Geological Sciences Subcommittee on the Systematics of Igneous Rocks *Cambridge University Press*

Decades of field and microscope studies, and more recent quantitative geochemical analyses have resulted in a vast, and sometimes overwhelming, array of nomenclature and terminology associated with igneous rocks. This book presents a complete classification of igneous rocks based on all the recommendations of the International Union of Geological Sciences (IUGS) Subcommittee on the Systematics of Igneous Rocks. The glossary of igneous terms has been fully updated since the first edition and now

includes 1637 entries, of which 316 are recommended by the Subcommittee. Incorporating a comprehensive bibliography of source references for all the terms included in the glossary, this book is an indispensable reference guide for all geologists studying igneous rocks, either in the field or the laboratory. It presents a standardised and widely accepted naming scheme that will allow geologists to interpret terminology in the primary literature and provide formal names for rock samples based on petrographic analyses. It is also supported by a website with downloadable code for chemical classifications.

Paths of Integration Migrants in Western Europe (1880-2004) *Amsterdam University Press* Why do some migrants integrate quickly, while others become long-term minorities? What is the role of the state in the settlement process? To what extent are experiences in the past different from the present? Are the recent migrants really integrating in another way than those in the past? Is Islam indeed an obstacle to integration? These are some of the burning questions, which dominate the current politicized debate on immigration in Western Europe. In this book, leading historians and social scientists analyze and compare a variety of settlement processes in past and present migration to Western Europe. Identifying general factors in the process of adaptation of new immigrants, the contributors trace social changes effected by recent European immigration, and the parallels with the great American migration of the 1880s-1920s. The history of migration to Western Europe and the way these migrants found their place in the receiving societies, is not only essential to understand the way nations deal with newcomers in the present, but also constitutes a highly interesting laboratory for different paths of integration now and then. By analyzing and comparing a wealth of settlement processes both in the past and in the present this book is both a bold interdisciplinary endeavor, and at the same time the first attempt to identify general factors underlying the way migrants adapt to their new surroundings, as well as how societies change under the influence of immigration. The chapters in the book both look at specific groups in various periods, but also analyses the structure of the state, churches unions and other important organized actors in Western European nation states. Moreover, the results are embedded in the more theoretical American literature on the comparison of old and new migrants. All chapters have an explicit comparative perspective, either by comparing different groups or different periods, whereas the general conclusion ties together the various outcomes in a systematic way, highlighting the main answers to the central questions about the various outcomes of settlement processes.

--Publisher. **Artistry in Bronze The Greeks and Their Legacy XIXth International Congress on Ancient Bronzes** *Getty Publications* The papers in this volume derive from the proceedings of the nineteenth International Bronze Congress, held at the Getty Center and Villa in October 2015 in connection with the exhibition **Power and Pathos: Bronze Sculpture of the Hellenistic World**. The study of large-scale ancient bronzes has long focused on aspects of technology and production.

Analytical work of materials, processes, and techniques has significantly enriched our understanding of the medium. Most recently, the restoration history of bronzes has established itself as a distinct area of investigation. How does this scholarship bear on the understanding of bronzes within the wider history of ancient art? How do these technical data relate to our ideas of styles and development? How has the material itself affected ancient and modern perceptions of form, value, and status of works of art? www.getty.edu/publications/artistryinbronze

Humans at the End of the Ice Age The Archaeology of the Pleistocene—Holocene Transition *Springer Science & Business Media* **Humans at the End of the Ice Age** chronicles and explores the significance of the variety of cultural responses to the global environmental changes at the last glacial-interglacial boundary. Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch—detailing the nature, speed, and magnitude of the human adaptations that culminated in the development of food production in many parts of the world. The text is aided by vital maps, chronological tables, and charts.

Environmental Concerns Into Power Sector Decisionmaking A Case Study of Sri Lanka *World Bank Publications* **World Bank Environment Paper 6**. Here is a holistic approach to analyzing the environmental impact of various power systems. Unlike standard impact studies that begin at the project level, this method calls for environmental assessments that start a **Energy Efficiency in Motor Driven Systems** *Springer Science & Business Media* This book reports the state of the art of energy-efficient electrical motor driven system technologies, which can be used now and in the near future to achieve significant and cost-effective energy savings. It includes the recent developments in advanced electrical motor end-use devices (pumps, fans and compressors) by some of the largest manufacturers. Policies and programs to promote the large scale penetration of energy-efficient technologies and the market transformation are featured in the book, describing the experiences carried out in different parts of the world. This extensive coverage includes contributions from relevant institutions in the Europe, North America, Latin America, Africa, Asia, Australia and New Zealand.

Positive Learning in the Age of Information A Blessing or a Curse? *Springer* While information and communication technology has a vast influence on our lives, little is understood about its effects on the way we learn. In the Age of Information, students - consciously or not - are learning in diverse formal and informal environments from a broad variety of sources, with scientific knowledge competing against unfounded assertions, and misinformation and biased data spreading through social and mass media.

The Positive Learning in the Age of Information (PLATO) program

illustrated by the contributions in this book unites outstanding and highly innovative expertise on the fundamentals of information processing and human learning to investigate a new paradigm of positive learning as a vital, morally and ethically oriented approach, which is of existential importance to maintaining the civilization standards of a modern society in the digital age.

Socialism and Legal History *The Histories and Historians of Law in Socialist East Central Europe* *Routledge* This book focuses on the way in which legal historians and legal scientists used the past to legitimize, challenge, explain and familiarize the socialist legal orders, which were backed by dictatorial governments. It will be valuable for those working in areas of Legal History, Jurisprudence and Philosophy of Law and European Studies.

Global Energy Perspectives *Cambridge University Press* Global energy needs are expanding substantially as populations grow and economies develop around the world. There is clear evidence that continued use of fossil fuels as the world's dominant energy supply is damaging the environment and causing changes in global climate patterns. People want higher levels of more efficient, cleaner, and less obtrusive energy services. *Global Energy Perspectives* presents six long-term energy futures that lay out the alternatives among future fuels, technologies, efficiency gains, conservation patterns, and pollution levels, and pinpoints the key choices that are most likely to characterize the twenty-first century. The primary audience will include researchers, educators, policy makers in private and public sectors and other workers in the energy, technology, economics and environmental areas.
