ATTRIBUTE-BASED CREDENTIALS FOR TRUST

IDENTITY IN THE INFORMATION SOCIETY

Springer The need for information privacy and security continues to grow and gets increasingly recognized. In this regard, Privacy-preserving Attribute-based Credentials (Privacy-ABCs) are elegant techniques to provide secure yet privacy-respecting access control. This book addresses the federation and interchangeability of Privacy-ABC technologies. It defines a common, unified architecture for Privacy-ABC systems that allows their respective features to be compared and combined. Further, this book presents open reference implementations of selected Privacy-ABC systems and explains how to deploy them in actual production pilots, allowing provably accredited members of restricted communities to provide anonymous feedback on their community or its members. To date, credentials such as digitally signed pieces of personal information or other information used to authenticate or identify a user have not been designed to respect the users' privacy. They inevitably reveal the identity of the holder even though the application at hand often needs much less information, e.g. only the confirmation that the holder is a teenager or is eligible for social benefits. In contrast, Privacy-ABCs allow their holders to reveal only their minimal information required by the applications, without giving away their full identity information. Privacy-ABCs thus facilitate the implementation of a trustworthy and at the same time privacy-respecting digital society. The ABC4Trust project as a multidisciplinary and European project, gives a technological response to questions linked to data protection. INTERNATIONAL TAX ASPECTS OF SOVEREIGN WEALTH INVESTORS

A SOURCE STATE PERSPECTIVE

Kluwer Law International B.V. An increasing number of States have entered the market looking to invest resources in foreign assets. This emergence of States acting as investors, managing the wealth of a nation and competing in the marketplace with private investors, has attracted growing and wide attention. This book is the first in-depth analysis of the international tax aspects of sovereign wealth investors, and serves as a comprehensive guide to designing tax policy, from a source State perspective, toward inbound sovereign wealth investment. Drawing on a wide range of relevant sources, including international instruments, domestic tax legislation, administrative practice, (international) case law and the writings of highly qualified publicists, the author fully addresses the following aspects of the subject: - the definition, functions, legal form, governance, home State tax status, etc. of sovereign wealth investors; - tax policy considerations and objectives (i.e., neutrality, equity and international attractiveness) from a source State perspective vis-à-vis foreign sovereign wealth investors; and - the potential impact of the sovereign immunity principle, bilateral tax treaties and European (Union) law on source States' ability to achieve these tax policy objectives in relation to foreign sovereign wealth investors. The conceptual framework developed by the author will greatly assist source States in introducing new tax policy or in evaluating or reconsidering their existing tax policy vis-à-vis foreign sovereign wealth investors. In addition, practitioners, academics and (home States of) sovereign wealth investors will welcome this first authoritative analysis of an important but insufficiently understood subject in international tax.

CONTESTED TRANSFORMATION

RACE, GENDER, AND POLITICAL LEADERSHIP IN 21ST CENTURY AMERICA

Cambridge University Press *Contested Transformation* constitutes the first comprehensive study of racial and ethnic minorities holding elective office in the United States at the beginning of the twenty-first century. Building on data from the Gender and Multicultural Leadership (GMCL) National Database and Survey, it provides a baseline portrait of Black, Latino, Asian American, and American Indian elected officials - the women and men holding public office at national, state, and local levels of government. Analysis reveals commonalities and differences across race and gender groups on their backgrounds, paths to public office, leadership roles, and policy positions. Challenging mainstream political science theories in their applicability to elected officials of color, the book offers new understandings of the experiences of those holding public office today. Gains in political leadership and influence by people of color are transforming the American political landscape, but they have occurred within a contested political context, one where struggles for racial and gender equality continue.

PATENT SETTLEMENTS IN THE PHARMACEUTICAL INDUSTRY UNDER US ANTITRUST AND EU COMPETITION LAW

Kluwer Law International B.V. Reverse payment settlements or “pay-for-delay agreements” between originators and generic drug manufacturers create heated debates regarding the balance between competition and intellectual property law. These settlements touch upon sensitive issues such as timely generic entry and access to affordable pharmaceuticals and also the need to preserve innovation incentives for originators and to strengthen the pipeline of life-saving pharmaceuticals. This book is one of the first to critically and comparatively analyse how such patent settlements and various other strategies employed by the pharmaceutical industry are scrutinised by both United States (US) and European courts and enforcement authorities, and to discuss the applicable legal tests and the main criteria used for their assessment. The book's ultimate objective is to provide guidance to the pharmaceutical industry regarding the types of patent settlements, strategies and conduct which may be problematic from US antitrust and European Union (EU) competition law perspectives and to assist practitioners in structuring settlements which are both efficient and compliant. To this end, an exhaustive legal analysis of some of the most controversial issues regarding pharmaceutical patent settlements is provided, including: – the lengthy split among US Circuit Courts on the issue of pay-for-delay settlements, its resolution by the US Supreme Court in *FTC v. Actavis* and subsequent jurisprudence; – the decision of *Lundbeck v. Commission* by the European General Court and the *Servier* decision of the European Commission; – the *Roche/Novartis* decision of the European Court of Justice and the most important decisions by National Competition Authorities on pharma patent settlements in the EU; – an overview of other types of strategies such as product-hopping and product reformulations, no-authorised generic commitments, problematic side-deals, mechanisms affecting generic substitution; – the rejection of the “scope of the patent” test in both the US and the EU and the balancing of patent law and antitrust law considerations in the prevailing applicable tests; – the benefits of settlements and the main criteria for assessing their legitimacy under US antitrust and EU competition law. The analysis provides concrete examples of both illegitimate and legitimate settlements and strategies, emphasising on conduct that falls within a grey zone and on the circumstances and criteria under which such conduct could be deemed problematic from an antitrust perspective. This book will serve as a valuable guide for pharmaceutical companies wishing to minimise the risk of engaging in conduct that could potentially infringe US antitrust and EU competition law. It further aims to save courts and enforcement agencies and also practitioners and academics considerable time and resources by providing an exhaustive analysis of the relevant caselaw, with the ultimate goal to increase legal certainty on the most controversial aspects of patent settlements in the pharmaceutical industry.

GENDERED LABOUR, EVERYDAY SECURITY AND MIGRATION

AN EXAMINATION OF DOMESTIC WORK AND DOMESTIC WORKERS' EXPERIENCES IN SINGAPORE AND HONG KONG

Taylor & Francis Drawing on original empirical research from Singapore and Hong Kong, *Gendered Labour, Everyday Security and Migration* interrogates women migrant domestic workers' experiences of work and workplace exploitation. It examines the ways in which these women negotiate everyday security and safe work against the backdrop of affective employment relations and institutional structures of labour and migration law. It challenges the current emphasis on the language of exploitation and legal approaches to identifying, understanding and rectifying poor employment conditions for women migrant domestic workers. This book addresses the limited research literature that examines the extent to which regulatory or criminal justice responses are relevant to, and utilised by, women migrant domestic workers in their everyday negotiation of safe work and offers a unique contribution to the field. An accessible and compelling read, it will be of interest to researchers from across the fields of criminology, sociology, labour migration studies and women's studies.

THE OXFORD HANDBOOK OF U.S. EDUCATION LAW

Oxford University Press During the mid-to-late 20th Century, education law emerged as a distinct area of practice and scholarship in the United States. Attorneys began to develop specialties representing school districts, students, parents, and teachers, while law schools and colleges of education started to offer courses about the legal regulation of K-12 public schools. The statutory and common law governing schools grew rapidly, and developed in a manner that often treated public schools differently from other governmental entities. Now, law schools and colleges of education regularly offer an education law course. Many states' school administrator certificates require some familiarity with education law. The scholarly field of education law is rich and deep. Attorneys play a key role in education policy, as do state and federal legislatures and regulatory agencies. The issues range from school funding to supporting English learners; from racial equality to teachers' labor laws; from student privacy to school choice. Addressing those issues and more, *The Oxford Handbook of U.S. Education Law* provides a comprehensive overview of the current state of K-12 education law in the United States. A number of foundational chapters present a synthesis of general areas of law for those who seek an introduction. Dozens of other chapters build on those foundations, diving into various topics in a nuanced, yet accessible, way, creating value for those who seek to deepen or reframe their knowledge about a specific issue. Throughout the volume and especially in the last section, the authors also look to the future and thus help shape the direction of the field.

ORIENTALISM

WESTERN CONCEPTIONS OF THE ORIENT

Penguin UK 'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

OUR TIME HAS COME

HOW INDIA IS MAKING ITS PLACE IN THE WORLD

Oxford University Press Over the last 25 years, India's explosive economic growth has vaulted it into the ranks of the world's emerging major powers. India's middle class has grown by leaps and bounds, and the country's sheer scale—possessing what will very soon be the world's largest population and an economy of more than \$2 trillion—means its actions will have a major global impact. While it is clearly on the path to becoming a great power, India has not abandoned all of its past policies: its economy remains relatively protectionist, and it still struggles with the legacy of its longstanding foreign policy doctrine of non-alignment. India's vibrant democracy encompasses a vast array of parties who champion dizzyingly disparate policies. And India isn't easily swayed by foreign influence; the country carefully guards its autonomy, in part because of its colonial past. For all of these reasons, India tends to move cautiously and deliberately in the international sphere. In *Our Time Has Come*, Alyssa Ayres looks at how the tension between India's past and its ongoing integration into the global economy will shape its trajectory. By focusing on how India's unique perspective shapes its approach to global affairs, this new, updated paperback edition of *Our Time Has Come* helps the world make sense of India's rise.

THE FUTURE OF CIVIL LITIGATION

ACCESS TO COURTS AND COURT-ANNEXED MEDIATION IN THE NORDIC COUNTRIES

Springer This book offers an analysis of the current trends and developments in Nordic civil litigation and is divided into four main parts. In the first part a picture of the current civil litigation landscape is provided by focusing on whether there is a truly Nordic form of civil litigation, the current state of Nordic civil litigation, the recent major reforms of civil procedure legislation and the effects of Europeanization. In the second part, the way rules on court-connected mediation have been implemented and practiced in the Nordic countries is discussed. The authors offer their insights on why court-connected mediation has not been fully embraced by Nordic lawyers and the Nordic approach to this type of mediation is contrasted with the Austrian and German approaches. In the third part, recent developments affecting access to justice in the Nordic countries are discussed. Among the topics are changes in legal aid schemes, the impact of recent civil procedure law reforms, hindrances for larger companies to use litigation as a method of dispute resolution and differences in costs and delays. Additionally, Alternative Dispute Resolution and Class or Group Actions are explored as methods to enhance access to justice. The potential adverse effects of Alternative Dispute Resolution and Group Actions are also examined, both in a Nordic and European context. In the final part, conclusions are drawn from both historical and future-oriented perspectives.

THE RIGHT TO SEX

SHORTLISTED FOR THE ORWELL PRIZE 2022

Bloomsbury Publishing A SUNDAY TIMES BESTSELLER BLACKWELL'S BOOK OF THE YEAR 2021 SHORTLISTED FOR THE ORWELL PRIZE 2022 Essential lessons on the world we live in, from one of our greatest young thinkers – a guide to what everybody is talking about today 'Unparalleled and extraordinary . . . A bracing revivification of a crucial lineage in feminist writing' JIA TOLENTINO 'I believe Amia Srinivasan's work will change the world' KATHERINE RUNDELL 'Rigorously researched, but written with such spark and verve. The best non-fiction book I have read this year' PANDORA SYKES ---
----- How should we talk about sex? It is a thing we have and also a thing we do; a supposedly private act laden with public meaning; a personal preference shaped by outside forces; a place where pleasure and ethics can pull wildly apart. Since #MeToo many have fixed on consent as the key framework for achieving sexual justice. Yet consent is a blunt tool. To grasp sex in all its complexity – its deep ambivalences, its relationship to gender, class, race and power – we need to move beyond 'yes and no', wanted and unwanted. We need to interrogate the fraught relationships between discrimination and preference, pornography and freedom, rape and racial injustice, punishment and accountability, pleasure and power, capitalism and liberation. We need to rethink sex as a political phenomenon. Searching, trenchant and extraordinarily original, *The Right to Sex* is a landmark examination of the politics and ethics of sex in this world, animated by the hope of a different one.

THE JUDICIAL PROCESS

LAW, COURTS, AND JUDICIAL POLITICS

CQ Press *The Judicial Process: Law, Courts, and Judicial Politics* is an all-new, concise yet comprehensive core text that introduces students to the nature and significance of the judicial process in the United States and across the globe. Authors Christopher P. Banks and David M. O'Brien do not shy away from the politics of the judicial process, and offer unique insight into cutting-edge and highly relevant issues. In its distinctive boxes, "Contemporary Controversies over Courts" and "In Comparative Perspective," the text examines topics such as the dispute pyramid, the law and morality of same-sex marriages, the "hardball politics" of judicial selection, plea bargaining trends, the right to counsel and "pay as you go" justice, judicial decisions limiting the availability of class actions, constitutional courts in Europe, the judicial role in creating major social change, and the role lawyers, juries and alternative dispute resolution techniques play in the U.S. and throughout the world. Photos, cartoons, charts, and graphs are used throughout the text to facilitate student learning and highlight key aspects of the judicial process.

GUIDE TO THE IMPLEMENTATION OF DIRECTIVES BASED ON THE NEW APPROACH AND THE GLOBAL APPROACH

WHO CONSOLIDATED GUIDELINES ON TUBERCULOSIS. MODULE 3

DIAGNOSIS - RAPID DIAGNOSTICS FOR TUBERCULOSIS DETECTION

World Health Organization The political declaration of the first United Nations (UN) high-level meeting on tuberculosis (TB) calls countries to diagnose and treat 40 million people with TB globally between 2018 and 2022. Traditionally, in most countries, TB diagnosis has been performed using sputum-smear microscopy, a method developed more than 100 years ago, with suboptimal sensitivity. In recent years new technologies have emerged based on the detection of mycobacterial DNA or mycobacterial antigens. Over the past decade the World Health Organization (WHO) has published a number of guidelines developed by WHO-convened Guideline Development Groups (GDGs), using the Grading of Recommendations Assessment, Development and Evaluation (GRADE) approach to summarize the evidence and to formulate policy recommendations and accompanying remarks. The present document "WHO consolidated guidelines on tuberculosis. Module 3: Diagnosis - Rapid diagnostics for tuberculosis detection" consolidates five guidelines developed by WHO between 2016 and 2020. Earlier guidelines on diagnostics that were not developed according to the GRADE approach have not been included in this document. The WHO Consolidated Guidelines on Tuberculosis will group all TB recommendations in one document and will be complemented by matching modules of an operational handbook. The handbook will provide practical advice on how to put in place the recommendations at the scale needed to achieve national and global impact. A range of new diagnostic technologies have been endorsed by WHO during the past decade. These are listed below: - real-time polymerase chain reaction (PCR) assays - for example, Xpert MTB/RIF(r) (Ultra) (cartridge-based) and TruenatTM (chip-based);- line probe assays (LPAs) - for example, GenoType(r) MTBDRplus v1 and v2, GenoscholarTM NTM+MDRTB II and GenoType(r) MTBDRsl;- loop-mediated isothermal amplification (LAMP) - for example, TB-LAMP; and- antigen detection in a lateral flow format (biomarker-based detection) - for example, Alere DetermineTM TB LAM Ag. The present "WHO consolidated guidelines on tuberculosis. Module 3: Diagnosis - Rapid diagnostics for tuberculosis detection" provides background, justification and recommendations on these technologies. The document includes new recommendations on molecular assays intended as initial tests for the diagnosis of pulmonary and extrapulmonary TB and rifampicin resistance in adults and children.

COMMUNITIES IN ACTION

PATHWAYS TO HEALTH EQUITY

National Academies Press In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

THE ALTERNATIVE INVESTMENT FUND MANAGERS DIRECTIVE

Kluwer Law International B.V. Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

REIMAGINING SCHOOL COUNSELING TO ADVANCE STUDENT SUCCESS

Harvard Education Press Savitz-Romer offers a strategic approach to school counseling that enables educational leaders to draw on existing staff to create supportive contexts and programs for students. In this model of the "academic home," counselors serve as the first point of contact for student support, connecting and coordinating services much like primary care physicians coordinate patient care in medical settings. They serve as the hub of a network of supports to prevent students from falling between the cracks. By highlighting promising practices in schools, districts, and states, and the efforts of individual school counselors and leaders, Fulfilling the Promise presents a conceptualization of school counseling that is relevant for all educators, as well as policy makers and funders. In order to create the conditions for school counselors to be most effective, however, systemic barriers must be addressed. This book brings together research, practical experience, and policy recommendations to envision a focused and practical role for school counselors in the twenty-first century.

MENTAL CAPACITY ACT 2005 CODE OF PRACTICE

[LARGE PRINT 2007 FINAL EDITION]

The Stationery Office The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

MATERNITY AND PATERNITY AT WORK

LAW AND PRACTICE ACROSS THE WORLD

This report provides a picture of where we stand and what we have learned so far about maternity and paternity rights across the world. It offers a rich international comparative analysis of law and practice relating to maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and implementation. This report shows that a majority of countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able to benefit from these essential labour rights.
