Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.

Electric-Shock Weapons, Tasers and Policing

Myths and Realities

Routledge Building on five years of research, and drawing on criminology, science and technology studies (STS), socio-legal studies and social psychology, this book is the first non-medical book written on electric-shock weapons, of which the best well known is the TASER brand. The police's ability to use force is one of their most crucial powers, yet one that has been relatively neglected by criminology. This book challenges some of the myths surrounding the use of these weapons and considers their human rights implications and impact on members of the public and officers alike. Drawing on STS, it also considers the role and impact of electric-shock technologies, examines the extent to which technologies and non-human agency may also play a role in shaping officer decision making and discretion, and contributes to long standing debates about police accountability. This is essential reading for policing scholars around the world, particularly those engaged with use of force, culture and accountability, as well as those engaged with Science and Technology studies.

Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Game Feel

A Game Designer's Guide to Virtual Sensation

CRC Press "Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

Policing of the G20 Protests

eighth report of session 2008-09, report, together with formal minutes, oral and written evidence

The Stationery Office The policing of the G20 Protests in April 2009 was a remarkably successful operation; more than 35,000 protesters demonstrated in the centre of London with a police presence of several thousand, yet there was a minimum of disruption. Aside from a few high-profile incidents, the policing of the G20 Protests passed without drama. However, these incidents and the tactics that led to them caused considerable adverse comment and have the potential to damage the public's faith in the police. The use of containment (detaining people in a confined area for a sustained period of time), and distraction tactics (the controlled use of force against those who appear hostile) while legitimate according to the police rule-book, shocked the public. Whether they should continue to be used must form the basis of a wide-ranging discussion on the future policing of public protests. Police communications with the media and the protesters must also improve. This would require the police, media and protesters to engage better with one another both before and during the protest. There are no circumstances in which it is acceptable for officers not to wear identification numbers and urgent action must be taken to ensure that officers have the resources to display identification at all times; those officers found to be consciously removing their identification numbers must face the strongest possible disciplinary measures. While the vast majority of officers on duty performed very well, the Committee is concerned that untrained and inexperienced officers were placed in such a highly combustible atmosphere. It cannot condone the use of untrained, inexperienced officers on the front-line of a public protest and feel that an element of luck must be attributed to the success of the operation.

The Trayvon Generation

Grand Central Publishing From a Pulitzer Prize finalist and New York Times bestselling author and poet comes a galvanizing meditation on the power of art and culture to illuminate America's unresolved problem with race. *Named a Most Anticipated Title of 2022 by TIME magazine, New York Times, Bustle, and more* In the midst of civil unrest in the summer of 2020 and following the murders of George Floyd, Breonna Taylor, and Ahmaud Arbery, Elizabeth Alexander—one of the great literary voices of our time—turned a mother's eye to her sons' and students' generation and wrote a celebrated and moving reflection on the challenges facing young Black America. Originally published in the New Yorker, the essay incisively and lovingly observed the experiences, attitudes, and cultural expressions of what she referred to as the Trayvon Generation, who even as children could not be shielded from the brutality that has affected the lives of so many Black people. The Trayvon Generation expands the viral essay that spoke so resonantly to the persistence of race as an ongoing issue at the center of the American experience. Alexander looks both to our past and our future with profound insight, brilliant analysis, and mighty heart, interweaving her voice with groundbreaking works of art by some of our most extraordinary artists. At this crucial time in American history when we reckon with who we are as a nation and how we move forward, Alexander's lyrical prose gives us perspective informed by historical understanding, her lifelong devotion to education, and an intimate grasp of the visioning power of art. This breathtaking book is essential reading and an expression of both the tragedies and hopes for the young people of this era that is sure to be embraced by those who are leading the movement for change and anyone rising to meet the moment.

Delusion in Death

Hachette UK 'What would cause someone to want so many people, surely many of them strangers, to slaughter each other?' The downtown bar is strewn with bodies - office workers who have been sliced, bludgeoned or hacked to death with the nearest weapon available, turning on each other in a desperate blinding rage. As Eve and her husband Roarke - who owns the bar among his many properties - investigate the city, they link the attacks back to the Urban Wars and the chemical warfare used all those years ago. With another slaughter imminent, Eve must turn to unexpected sources to stop a killer pursuing revenge by creating mass carnage . . .
