More Than a Hobby How a \$600 Startup Became America's Home and Craft Superstore [Thomas Nelson](#) *The retail industry has undergone enormous changes during the last thirty years. But there is one retailer that not only has remained consistent in the fluctuating?even tenuous?market, but also has grown in the process. More Than a Hobby takes you inside the story of David Green, the man who built the phenomenal success of Hobby Lobby. Green went beyond surviving in a competitive retail market to thriving, ultimately expanding his \$600 start-up company into a \$1.3 billion per-year enterprise. Green's incredible accomplishments were based not on business-school theory but on his grassroots experiences as a store manager and his creative application of cutting edge ideas, including: Allow managers to spend no more than thirty minutes per day on paperwork Instead of paying a middleman, assemble as much of the product as possible in-house Give buyers the freedom to purchase without restraint—but within the realm of common sense Keep God and family first More Than a Hobby is a practical field manual, filled with revolutionary ideas for all those who dream of success in the world of retail business.* **School, Family, and Community Partnerships Your Handbook for Action** [Corwin Press](#) *Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations* **Watching the English The Hidden Rules of English Behaviour** [Hachette UK](#) *In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ...Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.* **Speak of the Devil How the Satanic Temple Is Changing the Way We Talk about Religion** [Oxford University Press, USA](#) *In this book-length study of The Satanic Temple, Joseph Laycock, a scholar of new religious movements, contends that the emergence of "political Satanism" marks a significant moment in American religious history that will have a lasting impact on how Americans frame debates about religious freedom. Though the group gained attention for its strategic deployment of outrage, it claims to have developed beyond politics into a religious movement. Equal parts history and ethnography, Speak of the Devil demonstrates why religious Satanism is significant to larger conversations about the definition of religion, religious freedom, and religious tolerance.* **God's Library The Archaeology of the Earliest Christian Manuscripts** [Yale University Press](#) *A provocative book from a highly original scholar, challenging much of what we know about early Christian manuscripts In this bold and groundbreaking book, Brent Nongbri provides an up-to-date introduction to the major collections of early Christian manuscripts and demonstrates that much of what we thought we knew about these books and fragments is mistaken. While biblical scholars have expended much effort in their study of the texts contained within our earliest Christian manuscripts, there has been a surprising lack of interest in thinking about these books as material objects with individual, unique histories. We have too often ignored the ways that the antiquities market obscures our knowledge of the origins of these manuscripts. Through painstaking archival research and detailed studies of our most important collections of early Christian manuscripts, Nongbri vividly shows how the earliest Christian books are more than just carriers of texts or samples of handwriting. They are three-dimensional archaeological artifacts with fascinating stories to tell, if we're willing to listen.* **Idea Man A Memoir by the Co-founder of Microsoft** [Penguin UK](#) *By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this long-awaited memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.* **Schools of Thought How the Politics of Literacy Shape Thinking in the Classroom** [Jossey-Bass](#) *As a*

result of his visits to classrooms across the nation, Brown has compiled an engaging, thought-provoking collection of classroom vignettes which show the ways in which national, state, and local school politics translate into changed classroom practices. "Captures the breadth, depth, and urgency of education reform".--Bill Clinton. **The Brain That Changes Itself Stories of Personal Triumph from the Frontiers of Brain Science** [Penguin UK](#) An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure. **Opting Out Conscience and Cooperation in a Pluralistic Society** [London School of Economics and Political Science](#) Should people with deeply held objections to certain practices be allowed to opt out of involvement with them? Should a Christian baker who objects to homosexuality be allowed to deny service to a customer seeking a cake for a gay wedding? Should a Catholic nurse be able to refuse to contribute to the provision of abortions without losing her job? The law increasingly answers no to such questions. But David Oderberg argues that this is a mistake. He contends that in such cases, opting out should be understood as part of a right of dissociation - and that this right needs better legal protection than it now enjoys. **Humble Pi A Comedy of Maths Errors** [Penguin UK](#) We would all be better off if everyone saw mathematics as a practical ally. Sadly, most of us fear maths and seek to avoid it. This is because mathematics doesn't have good 'people skills' - it never hesitates to bluntly point out when we are wrong. But it is only trying to help! Mathematics is a friend which can fill the gaps in what our brains can do naturally. Luckily, even though we don't like sharing our own mistakes, we love to read about what happens when maths errors make the everyday go horribly wrong. Matt Parker explores and explains near misses and mishaps with planes, bridges, the internet and big data as a way of showing us not only how important maths is, but how we can use it to our advantage. This comedy of errors is a brilliantly told series of disaster stories with a happy ending. **Pre-Incident Indicators of Terrorist Incidents The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct** [DIANE Publishing](#) This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Rebelling against his pressure-cooker of a life, Ken determined to drop out of high school to follow his own path. To obtain his father's approval, he invoked the biography of the famous Indian mathematical prodigy Srinivasa Ramanujan, whom his father revered, who had twice flunked out of college because of his single-minded devotion to mathematics. Ono describes his rocky path through college and graduate school, interweaving Ramanujan's story with his own and telling how at key moments, he was inspired by Ramanujan and guided by mentors who encouraged him to pursue his interest in exploring Ramanujan's mathematical legacy. Picking up where others left off, beginning with the great English mathematician G.H. Hardy, who brought Ramanujan to Cambridge in 1914, Ono has devoted his mathematical career to understanding how in his short life, Ramanujan was able to discover so many deep mathematical truths, which Ramanujan believed had been sent to him as visions from a Hindu goddess. And it was Ramanujan who was ultimately the source of reconciliation between Ono and his parents. Ono's search for Ramanujan ranges over three continents and crosses paths with mathematicians whose lives span the globe and the entire twentieth century and beyond. Along the way, Ken made many fascinating discoveries. The most important and surprising one of all was his own humanity." **Teaching Children to Care Classroom Management for Ethical and Academic Growth, K-8** [Northeast Foundation for Ch](#) "Ruth Charney gives teachers help on things that really matter. She wants children to learn how to care for themselves, their fellow students, their environment, and their work. Her book is loaded with practical wisdom. Using Charney's positive approach to classroom management will make the whole school day go better." - Nel Noddings, Professor Emeritus, Stanford University, and author of *Caring* This definitive work about classroom management will show teachers how to turn their vision of respectful, friendly, academically rigorous classrooms into reality. The new edition includes: More information on teaching middle-school students Additional strategies for helping children with challenging behavior Updated stories and examples from real classrooms. "Teaching Children to Care offers educators a practical guide to one of the most effective social and emotional learning programs I know of. The Responsive Classroom approach creates an ideal environment for learning—a pioneering program every teacher should know about." - Daniel Goleman, Author of *Emotional Intelligence* "I spent one whole summer reading *Teaching Children to Care*. It was like a rebirth for me. This book helped direct my professional development. After reading it, I had a path to follow. I now look forward to rereading this book each August to refresh and reinforce my ability to effectively manage a social curriculum in my classroom." - Gail Zimmerman, second-grade teacher, Jackson Mann Elementary School, Boston, MA **Born to Run The hidden tribe, the ultra-runners, and the greatest race the world has never seen** [Profile Books](#) At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark. **Sprint How to Solve Big Problems and Test New Ideas in Just Five Days** [Simon and Schuster](#) From three design partners at Google Ventures, a unique five-day process--called the sprint--for solving tough problems using design, prototyping, and testing ideas with customers. **Mindset The New Psychology of Success** [Random House Digital, Inc.](#) Reveals how established attitudes affect all aspects of one's life, explains the differences between fixed and growth mindsets, and stresses the need to be open to change in order to achieve fulfillment and success. **Fascinating Mathematical People Interviews and**

Memoirs [Princeton University Press](#) *Fascinating Mathematical People* is a collection of informal interviews and memoirs of sixteen prominent members of the mathematical community of the twentieth century, many still active. The candid portraits collected here demonstrate that while these men and women vary widely in terms of their backgrounds, life stories, and worldviews, they all share a deep and abiding sense of wonder about mathematics. Featured here--in their own words--are major research mathematicians whose cutting-edge discoveries have advanced the frontiers of the field, such as Lars Ahlfors, Mary Cartwright, Dusa McDuff, and Atle Selberg. Others are leading mathematicians who have also been highly influential as teachers and mentors, like Tom Apostol and Jean Taylor. Fern Hunt describes what it was like to be among the first black women to earn a PhD in mathematics. Harold Bacon made trips to Alcatraz to help a prisoner learn calculus. Thomas Banchoff, who first became interested in the fourth dimension while reading a Captain Marvel comic, relates his fascinating friendship with Salvador Dalí and their shared passion for art, mathematics, and the profound connection between the two. Other mathematical people found here are Leon Bankoff, who was also a Beverly Hills dentist; Arthur Benjamin, a part-time professional magician; and Joseph Gallian, a legendary mentor of future mathematicians, but also a world-renowned expert on the Beatles. This beautifully illustrated collection includes many photographs never before published, concise introductions by the editors to each person, and a foreword by Philip J. Davis. **Reminiscences of a Stock Operator** [Strelbytskyy Multimedia Publishing](#) "Reminiscences of a Stock Operator" is the most widely read, highly recommended investment book ever. Generations of readers have found that it has more to teach them about markets and people than years of experience. This is a timeless tale that will enrich your life - and your portfolio. Well known investor: Benjamin Graham, Warren Buffett, Philip Arthur Fisher, John Burr Williams, Charlie Munger, George Soros **The Circle** [Penguin UK](#) NOW A MAJOR MOTION PICTURE starring Tom Hanks, Emma Watson and John Boyega A thrilling and compulsively addictive novel about our obsession with the internet When Mae is hired to work for the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. Run out of a sprawling California campus, the Circle links users' personal emails, social media, and finances with their universal operating system, resulting in one online identity and a new age of transparency. Mae can't believe her great fortune to work for them - even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public ... 'Tremendous. Inventive, big hearted and very funny. Prepare to be addicted' Daily Mail 'Prescient, important and enjoyable . . . a deft modern synthesis of Swiftian wit with Orwellian prognostication' Guardian 'A gripping and highly unsettling read' Sunday Times **Steal This Book** [CreateSpace](#) Steal this book **How Change Happens** [Oxford University Press](#) Society is full of would-be 'change agents'-campaigners, government officials, enlightened business people, engaged intellectuals-set on improving public services, reforming laws and regulations, guaranteeing human rights, achieving a fairer deal for those on the sharp end, and greater recognition for any number of issues. Drawing on many first-hand examples and numerous new case studies and interviews with grassroots activists and organizations around the world, as well as Oxfam's unrivalled global experience, this important book answers the question: how does change happen and how can we-governments, organizations, businesses, leaders, campaigners, employees, and ordinary citizens-make a difference? **Get the Message?** **A Decade of Art for Social Change** [Plume](#) This collection of twenty essays reflects the ethical and political questions facing artists and ranges from scholarly reporting to comic strips **Introduction to Academic Writing** [Longman Publishing Group](#) This book helps "students to master the standard organizational patterns of the paragraph and the basic concepts of essay writing. The text's time-proven approach integrates the study of rhetorical patterns and the writing process with extensive practice in sentence structure and mechanics." - product description. **Lobbying 3e The art of political persuasion** [Harriman House Limited](#) Fully revised, updated and expanded third edition Lobbying is a global industry which thrives wherever democracy is established. This third edition of Lobbying by Lionel Zetter straddles the globe, from the USA to Japan. It covers the Westminster and Scottish Parliaments, and the Welsh, Northern Ireland and London Assemblies. It examines the lobbying scenes in the USA and Brussels. Finally, the book also deals with Asia, the Gulf and the Middle East. The acknowledged industry bible, this book explains all aspects of lobbying in an expert yet accessible manner. Areas covered include: - the historical background to lobbying, and the ethical and regulatory frameworks - advice on how to break into lobbying - the mechanics of lobbying, and the techniques employed by lobbyists around the world - the various types of lobbying and public affairs campaigns - how to use the media and third-party advocates in support of a campaign - a step-by-step guide to planning and implementing a lobbying campaign. The author is an acknowledged expert in his field, and this book represents a distillation of his decades of experience. There are also 'top tips' from some of the most senior lobbyists in the world, as well as contributions from elected politicians. **A Little Life Shortlisted for the Man Booker Prize 2015** [Pan Macmillan](#) CELEBRATING 50 YEARS OF PICADOR BOOKS Shortlisted for the Booker Prize 2015 Shortlisted for the Baileys Prize for Women's Fiction 2016 Winner of Fiction of the Year at the British Book Awards 2016 Finalist for the National Book Awards 2015 The million-copy bestseller, *A Little Life* by Hanya Yanagihara is an immensely powerful and heartbreaking novel of brotherly love and the limits of human endurance. When four graduates from a small Massachusetts college move to New York to make their way, they're broke, adrift, and buoyed only by their friendship and ambition. There is kind, handsome Willem, an aspiring actor; JB, a quick-witted, sometimes cruel Brooklyn-born painter seeking entry to the art world; Malcolm, a frustrated architect at a prominent firm; and withdrawn, brilliant, enigmatic Jude, who serves as their centre of gravity. Over the decades, their relationships deepen and darken, tinged by addiction, success, and pride. Yet their greatest challenge, each comes to realize, is Jude himself, by midlife a terrifyingly talented litigator yet an increasingly broken man, his mind and body scarred by an unspeakable childhood, and haunted by what he fears is a degree of trauma that he'll not only be unable to overcome - but that will define his life for ever. Part of the Picador Collection, a new series showcasing the best of modern literature. **Free Culture** [Lulu Press, Inc](#) Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine. **Behavioral Finance: The Second Generation** [CFA Institute Research Foundation](#) Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation,

starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

The Man who Loved Only Numbers The Story of Paul Erdős and the Search for Mathematical Truth [Fourth Estate \(GB\)](#) The biography of a mathematical genius. Paul Erdos was the most prolific pure mathematician in history and, arguably, the strangest too. 'A mathematical genius of the first order, Paul Erdos was totally obsessed with his subject -- he thought and wrote mathematics for nineteen hours a day until he died. He travelled constantly, living out of a plastic bag and had no interest in food, sex, companionship, art -- all that is usually indispensable to a human life. Paul Hoffman, in this marvellous biography, gives us a vivid and strangely moving portrait of this singular creature, one that brings out not only Erdos's genius and his oddness, but his warmth and sense of fun, the joyfulness of his strange life.' Oliver Sacks For six decades Erdos had no job, no hobbies, no wife, no home; he never learnt to cook, do laundry, drive a car and died a virgin. Instead he travelled the world with his mother in tow, arriving at the doorstep of esteemed mathematicians declaring 'My brain is open'. He travelled until his death at 83, racing across four continents to prove as many theorems as possible, fuelled by a diet of espresso and amphetamines. With more than 1,500 papers written or co-written,

Outliers The Story of Success [Penguin UK](#) A brilliant new book from the bestselling author of *The Tipping Point* and *Blink* Why are people successful? For centuries, humankind has grappled with this question, searching for the secret to accomplishing great things. In this stunning new book, Malcolm Gladwell takes us on an invigorating intellectual journey to show us what makes an extreme overachiever. He reveals that we pay far too much attention to what successful people are like, and too little attention to where successful people are from: their culture, their family, and their generation. Gladwell examines how the careers of Bill Gates and the performance of world-class football players are alike; what top fighter pilots and The Beatles have in common; why so many top lawyers are Jewish; why Asians are good at maths; and why it is correct to say that the mathematician who solved Fermat's Theorem is not a genius. Just as he did in *Blink*, Gladwell overturns many of our conventional notions and creates an entirely new model for seeing the world. Brilliant and entertaining, this is a landmark work that will simultaneously delight and illuminate.

Conquest of the Useless Reflections from the Making of Fitzcarraldo [Ecco](#) An account drawn from a diary kept by the revered filmmaker during the 1982 production of "Fitzcarraldo" describes the unique difficulties he faced in creating the film, from cast member clashes to the challenges of moving a 320-ton steamship over a hill.

Creativity in the Classroom Schools of Curious Delight [Taylor & Francis](#) The fourth edition of this well-known text continues the mission of its predecessors "to help teachers link creativity research and theory to the everyday activities of classroom teaching. Part I (chs 1-5) includes information on models and theories of creativity, characteristics of creative people, and talent development. Part II (chapters 6-10) includes strategies explicitly designed to teach creative thinking, to weave creative thinking into content area instruction, and to organize basic classroom activities (grouping, lesson planning, assessment, motivation and classroom organization) in ways that support students' creativity. Changes in this Edition: Improved Organization -- This edition has been reorganized from 8 to 10 chapters allowing the presentation of theoretical material in clearer, more manageable chunks. New Material " In addition to general updating, there are more examples involving middle and secondary school teaching, more examples linking creativity to technology, new information on the misdiagnosis of creative students as ADHD, and more material on cross-cultural concepts of creativity, collaborative creativity, and linking creativity to state standards. Pedagogy & Design " Chapter-opening vignettes, within-chapter reflection questions and activities, sample lesson ideas from real teachers, and end-of-chapter journaling activities help readers adapt content to their own teaching situations. Also, a larger trim makes the layout more open and appealing and a single end-of-book reference section makes referencing easier. Targeted specifically to educators (but useful to others), this book is suitable for any course that deals wholly or partly with creativity in teaching, teaching the gifted and talented, or teaching thinking and problem solving. Such courses are variously found in departments of special education, early childhood education, curriculum and instruction, or educational psychology.

Skin in the Game Hidden Asymmetries in Daily Life [Penguin UK](#) From the bestselling author of *The Black Swan*, a bold book that challenges many of our long-held beliefs about risk and reward, politics and religion, finance and personal responsibility 'Skin in the game means that you do not pay attention to what people say, only to what they do, and how much of their neck they are putting on the line' Citizens, artisans, police, fishermen, political activists and entrepreneurs all have skin in the game. Policy wonks, corporate executives, many academics, bankers and most journalists don't. It's all about having something to lose and sharing risks with others. In his most provocative and practical book yet, Nassim Nicholas Taleb shows that skin in the game, often seen as the foundation of risk management, in fact applies to all aspects of our lives. In his inimitable style, Taleb draws on everything from Antaeus the Giant to Hammurabi to Donald Trump, from ethics to used car salesmen, to create a jaw-dropping framework for understanding this idea. Among his insights: For social justice, focus on symmetry and risk sharing. Minorities, not majorities, run the world. You can be an intellectual yet still be an idiot. Beware of complicated solutions (that someone was paid to find). Just as *The Black Swan* did during the 2007 financial crisis, *Skin in the Game* comes at precisely the right moment to challenge our long-held beliefs about risk, reward, politics, religion and business - and make us rethink everything we thought we knew.

Pattern Recognition [Penguin UK](#) It's only called paranoia if you can't prove it. Cayce is in London to work. Her pathological sensitivity to brands makes her the perfect divining rod for an ad agency that wants to east a new logo. But when she is co-opted into the search for the creator of a strangely addictive on-line film, Cayce wonders if she has done the right - or indeed, safe - thing. And that's before violence, Japanese computer crazies and Russian Mafia men are in the mix. But she wants to discover the source of the film too, and the truth of her father's disappearance in New York, two years ago. And from the way people are trying to stop her, it looks like she's getting close . . .

Mindset - Updated Edition Changing The Way You think To Fulfil Your Potential [Hachette UK](#) World-renowned Stanford University psychologist Carol Dweck, in

decades of research on achievement and success, has discovered a truly groundbreaking idea—the power of our mindset. Dweck explains why it's not just our abilities and talent that bring us success—but whether we approach them with a fixed or growth mindset. She makes clear why praising intelligence and ability doesn't foster self-esteem and lead to accomplishment, but may actually jeopardize success. With the right mindset, we can motivate our kids and help them to raise their grades, as well as reach our own goals—personal and professional. Dweck reveals what all great parents, teachers, CEOs, and athletes already know: how a simple idea about the brain can create a love of learning and a resilience that is the basis of great accomplishment in every area. **In defence of the school. A public issue** [TStorme](#) **Business Ethics Nurtureshock Why Everything We Thought About Children is Wrong** [Random House](#) What if we told you... that dishonesty in children is a positive trait that arguing in front of your kids can make you a good role model and that if you praise your children you risk making them fail ...and it was all true? Using a cutting-edge combination of behavioural psychology and neuroscience, award-winning journalists Po Bronson and Ashley Merryman have produced an innovative, counter-intuitive read that will change the way we interact with our children forever. They demonstrate that for years our best intentions with children have been our worst ideas, using break-through scientific studies to prove that our instincts and received wisdom are all wrong. **Nurtureshock** is the Freakonomics of childhood and adolescence, exploring logic-defying insights into child development that have far-reaching relevance for us all. **The Giver Quartet Son** [Houghton Mifflin Harcourt](#) Unlike the other Birthmothers in her utopian community, teenaged Claire forms an attachment to her baby, feeling a great loss when he is taken to the Nurturing Center to be adopted by a family unit. **The Signal and the Noise The Art and Science of Prediction** [Penguin UK](#) Every time we choose a route to work, decide whether to go on a second date, or set aside money for a rainy day, we are making a prediction about the future. Yet from the global financial crisis to 9/11 to the Fukushima disaster, we often fail to foresee hugely significant events. In *The Signal and the Noise*, the New York Times' political forecaster and statistics guru Nate Silver explores the art of prediction, revealing how we can all build a better crystal ball. In his quest to distinguish the true signal from a universe of noisy data, Silver visits hundreds of expert forecasters, in fields ranging from the stock market to the poker table, from earthquakes to terrorism. What lies behind their success? And why do so many predictions still fail? By analysing the rare prescient forecasts, and applying a more quantitative lens to everyday life, Silver distils the essential lessons of prediction. We live in an increasingly data-driven world, but it is harder than ever to detect the true patterns amid the noise of information. In this dazzling insider's tour of the world of forecasting, Silver reveals how we can all develop better foresight in our everyday lives. **Cover Letter Magic Trade Secrets of Professional Resumé Writers** [Jist Works](#) Professional resume and cover letter writers reveal their inside secrets for creating phenomenal cover letters that get attention and land interviews. Features more than 150 sample cover letters written for all types of job seekers, including the Before-and-After transformations that can make boring letters fabulous.
