Britain and Tibet 1765-1947

A Select Annotated Bibliography of British Relations with Tibet and the Himalayan States Including Nepal, Sikkim and Bhutan

Psychology Press This bibliography is a record of British relations with Tibet in the period 1765 to 1947. As such it also involves British relations with Russia and China, and with the Himalayan states of Ladakh, Lahul and Spiti, Kumaon and Garhwal, Nepal, Sikkim, Bhutan and Assam, in so far as British policy towards these states was affected by her desire to establish relations with Tibet. It also covers a subject of some importance in contemporary diplomacy. It was the legacy of unresolved problems concerning Tibet and its borders, bequeathed to India by Britain in 1947, which led to border disputes and ultimately to war between India and China in 1962. These borders are still in dispute today. It also provides background information to Tibet's claims to independence, an issue of current importance. The work is divided into a number of sections and subsections, based on chronology, geography and events. The introductions to each of the sections provide a condensed and informative history of the period and place the books and article in their historical context. Most entries are also annotated. This work is therefore both a history and a bibliography of the subject, and provides a rapid entry into a complex area for scholars in the fields of international relations and military history as well as Asian history.

The Politics of Belonging in the Himalayas

Local Attachments and Boundary Dynamics

SAGE Publishing India The Politics of Belonging in the Himalayas is an exploration of the various forms of bonds and attachments by which individuals are bounded to their collectivities and localities in the Himalayan regions of India and Nepal. To grasp these phenomena adequately, the book proposes a new analytical approach through the concept of belonging. The book is based on several case studies carried out by anthropologists, political science scholars, historians, and geographers who help bring together rich ethnographical data from different regions of the Himalayas. Organized in three parts, it describes the interactions between local forms of belonging and new forms of classification and governance imposed through national integration and transnational modes of politics. The book analyses different types of societal formations in various historical periods and captures the ongoing change in them. Fundamentally, this collaborative publication is an attempt to go beyond (and beneath) identity constructions and to call into question the idea of permanence implied by the term.

Forest Management in Kumaon Himalaya

Struggle of the Marginalised People

Report of the ... Meeting of the British Association for the Advancement of Science

A Forest History of India

SAGE Publishing India This collection of articles by noted environmental historian Richard P. Tucker is an attempt to trace Indian forest history from the colonial era to its post-Independence legacy. It is a study of the evolution of forest policy at the national level, in counterpoint with management at the provincial and local levels, primarily in the Himalayan districts. The book highlights the two main strains of conflict that characterize the evolution of professional forestry in India. First, the tension between the subsistence needs of the local population and the commercial needs of the colonial state, and second, the clash between the forest department, which sought to preserve and manage forests, and the revenue department, which was driven by the need to expand agriculture and industry. Written mostly in the 1980s and 1990s, these articles were among the first environmental history studies in India and contribute significantly to the understanding of the colonial legacy for post-Independence management of India's natural resources.

Mountain, Water, Rock, God

Understanding Kedarnath in the Twenty-First Century

University of California Press A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. In *Mountain, Water, Rock, God*, Luke Whitmore situates the disastrous flooding that fell on the Hindu Himalayan shrine of Kedarnath in 2013 within a broader religious and ecological context. Whitmore explores the longer story of this powerful realm of the Hindu god Shiva through a holistic theoretical perspective that integrates phenomenological and systems-based approaches to the study of religion, pilgrimage, place, and ecology. He argues that close attention to places of religious significance offers a model for thinking through connections between ritual, narrative, climate destabilization, tourism, development, and disaster, and he shows how these critical components of human life in the twenty-first century intersect in the human experience of place.

Routledge Handbook of Highland Asia

Taylor & Francis The Routledge Handbook of Highland Asia is the first comprehensive and critical overview of the ethnographic and anthropological work in Highland Asia over the past half a century. Opening up a grand new space for critical engagement, the handbook presents Highland Asia as a world-region that cuts across the traditional divides inherited from colonial and Cold War area divisions - the Indian Subcontinent/South Asia, Southeast Asia, China/East Asia, and Central Asia. Thirty-two chapters assess the history of research, identify ethnographic trends, and evaluate a range of analytical themes that developed in particular settings of Highland Asia. They cover varied landscapes and communities, from Kyrgyzstan to India, from Bhutan to Vietnam and bring local voices and narratives relating trade and tribute, ritual and resistance, pilgrimage and prophecy, modernity and marginalization, capital and cosmos to the fore. The handbook shows that for millennia, Highland Asians have connected far-flung regions through movements of peoples, goods and ideas, and at all times have been the enactors, repositories, and mediators of world-historical processes. Taken together, the contributors and chapters subvert dominant lowland narratives by privileging primarily highland vantages that reveal Highland Asia as an ecumene and prism that refracts and generates global history, social theory, and human imagination. In the currently unfolding Asian Century, this compels us to reorient and re-envision Highland Asia, in ethnography, in theory, and in the connections between this world-region, made of hills, highlands and mountains, and a planetary context. The handbook reveals both regional commonalities and diversities, generalities and specificities, and a broad orientation to key themes in the region. An indispensable reference work, this handbook fills a significant gap in the literature and will be of interest to academics, researchers and students interested in Highland Asia, Zomia Studies, Anthropology, Comparative Politics, Conceptual History and Sociology, Southeast Asian Studies, Central Asian Studies and South Asian Studies as well as Asian Studies in general.

The Human Landscape

Orient Blackswan This Book Is Located Within The Contemporary Discourse Of Human Geography, Ecology ,And The Cultural Landscape. These Essays Amend Earlier Anthropocentric Perspectives On The Conquest Of Nature, By Placing People In Symbiosis With Their Environment. And, In Doing So, They Seek To Ensure A Secure Common Future For Both.

The Modern Anthropology of India

Ethnography, Themes and Theory

Routledge The Modern Anthropology of India is an accessible textbook providing a critical overview of the ethnographic work done in India since 1947. It assesses the history of research in each region and serves as a practical and comprehensive guide to the main themes dealt with by ethnographers. It highlights key analytical concepts and paradigms that came to be of relevance in particular regions in the recent history of research in India, and which possibly gained a pan-Indian or even trans-Indian significance. Structured according to the states of the Indian union, contributors raise several key questions, including: What themes were ethnographers interested in? What are the significant ethnographic contributions? How are peoples, communities and cultural areas represented? How has the ethnographic research in the area developed? Filling a significant gap in the literature, the book is an invaluable resource to students and researchers in the field of Indian anthropology/ethnography, regional anthropology and postcolonial studies. It is also of interest to students of South Asian studies in general as it provides an extensive and critical overview of regionally based ethnographic activity undertaken in India.

Daemons Are Forever

Contacts and Exchanges in the Eurasian Pandemonium

University of Chicago Press A richly illustrated tapestry of interwoven studies spanning some six thousand years of history, *Dæmons Are Forever* is at once a record of archaic contacts and transactions between humans and protean spirit beings—dæmons—and an account of exchanges, among human populations, of the science of spirit beings: dæmonology. Since the time of the Indo-European migrations, and especially following the opening of the Silk Road, a common dæmonological vernacular has been shared among populations ranging from East and South Asia to Northern Europe. In this virtuoso work of historical sleuthing, David Gordon White recovers the trajectories of both the “inner demons” cohabiting the bodies of their human hosts and the “outer dæmons” that those same humans recognized each time they encountered them in their enchanted haunts: sylvan pools, sites of geothermal eruptions, and dark forest groves. Along the way, he invites his readers to reconsider the potential and promise of the historical method in religious studies, suggesting that a “connected histories” approach to Eurasian dæmonology may serve as a model for restoring history to its proper place at the heart of the discipline of the history of religions.
