It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In Strange Country, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other. **Crap CVs Penguin UK** Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, In Battle for Peace frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, In Battle for Peace remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history. **Fire Control Technician (FT). The three ships of the Littorio class were typical of Italian design, being fast and elegant, but also boasting a revolutionary protective scheme—which was tested to the limits, as all three were to be heavily damaged in the hard-fought naval war in the Mediterranean; Roma had the unfortunate distinction of being the first capital ship sunk by guided missile. These important ships have never been covered in depth in English-language publications, but the need is now satisfied in this comprehensive and convincing study by two of Italy's leading naval historians. The book combines a detailed analysis of the design with an operational history, evaluating how the ships stood up to combat. It is illustrated with an amazing collection of photographs, many fine-line plans, and colored artwork of camouflage schemes, adding up to as complete a monograph on a single class ever published. Among warship enthusiasts, battleships enjoy a unique status. As the great success of Seaforth's recent book on French battleships proves, that interest transcends national boundaries, and this superbly executed study is certain to become another classic in the field. "A very impressive piece of work."—History of War "An essential book for all naval history enthusiasts."—Firetrench **Foundations of Paul Samuelson's Revealed Preference Theory A study by the method of rational reconstruction Routledge** Originally published over two decades ago, this classic text within the philosophy of economics is a tour de force against revealed preference. It critically examines the research programme carried out by the Nobel Prize winner Paul Samuelson on the revealed preference approach to the theory of consumer behaviour. This text contains a new preface by Wong, in which he provides a detailed insight into the origins of his pioneering text, and a new introduction from Philip Mirowski, analyzing the impact The Foundation of Paul Samuelson's Revealed Preference Theory has had on the discipline of economics as well as explaining why it remains core reading for economists today. The defining statement of economic method, this book will be of interest to economists everywhere. **Day 9 at Wooreen Kidnapped with Nine Children... a True Account of the Crime That Shocked Australia** Day 9 at Wooreen paints a vivid picture of the Wooreen State School kidnapping of 1977.
