West Academic Publishing **A solid, basic textbook for law students.**

ESSENTIAL PRINCIPLES OF CONTRACT AND SALES LAW IN THE NORTHERN PACIFIC

FEDERATED STATES OF MICRONESIA, THE REPUBLICS OF PALAU AND THE MARSHALL ISLANDS, AND THE UNITED STATES TERRITORIES

iUniverse Taking an anthropological approach, **Essential Principles of Contract and Sales Law in the Northern Pacific** highlights how regional customary and traditional law interact with Anglo-American concepts of contract and sales law to produce a unique amalgam of substantive law in this Pacific region. Author and law professor Daniel P. Ryan compiles and discusses the current contract and sales law applicable in the Pacific region, including the Republics of Palau and the Marshall Islands, Hawaii, Guam, Northern Mariana Islands, American Samoa, and the Federated States of Micronesia. Ryan compares and contrasts this regional law to international standards, including the UN Sale of Goods Convention, the UNIDROIT Principles of Contract Law, UNCITRAL Model Law for E-Commerce, the Uniform Commercial Code, the Revised Uniform Commercial Code, and the Restatement (Second) of Contracts. **Essential Principles of Contract and Sales Law in the Northern Pacific** is essential reading for members of the judiciary, academics, practitioners, students, and businesses within the region and their major trade partners.

AN INTRODUCTION TO CONTRACT DRAFTING

West Academic Publishing This concise book introduces students to basic contract drafting principles. It is designed specifically for instructors who want to add a short (two to six class hours) contract drafting unit to their legal writing, contracts or other courses. It explains the standard provisions contained in most commercial contracts and includes numerous examples excerpted from real contracts. The narrative portion of the book is followed by multiple practical exercises requiring students to apply and expand on the covered concepts. The second edition includes new and revised exercises and a new section on "efforts" modifiers.

CONTRACT AND RELATED OBLIGATION: THEORY, DOCTRINE, AND PRACTICE

West Academic Publishing This casebook focuses on the rules and principles of contract law, as well as the lawyer's role in planning and drafting contracts. Chapter One traces a contract case from the agreement stage, to a breakdown in the parties' relationship, to a lawsuit, to a decision in the trial court, and finally to the appellate court's opinion. It includes supporting material, including the parties' agreement, a correspondence from the lawyer to the client, the complaint, a motion to dismiss, the answer, the trial judge's charge to the jury, the special verdict form, the trial judge's decision on motions after the verdict, and the appellate court opinion. These materials help students understand where cases come from and lawyers' various roles, including planning, negotiating, counseling, drafting, as well as litigating. Following the introduction, this casebook presents extensive material on the theory and practice of transactional planning and drafting, as well as additional materials from lawyers involved in the cases. The Eighth Edition offers comprehensive coverage of contract law theories of obligation, including bargain, promissory estoppel, unjust enrichment, and tort arising in the contract setting. This edition

includes new cases and secondary sources on developing issues of contract law. In particular, the casebook introduces several new readings on electronic contracts, algorithmic contracting, and the relationship of contracting to public health. Many of the secondary readings have been condensed and summarized, and the overall book has been streamlined. The casebook retains its strength in traditional subjects such as good faith, parol evidence, gap filling, conditional obligation, and breach, but the Eighth Edition contains fewer pages (and one less chapter) than earlier editions and is suitable for a 4, 5 or 6 hour course.

AMERICAN LEGAL EDUCATION ABROAD

CRITICAL HISTORIES

NYU Press A critical history of the Americanization of legal education in fourteen countries The second half of the twentieth century witnessed the export of American power—both hard and soft—throughout the world. What role did US cultural and economic imperialism play in legal education? American Legal Education Abroad offers an unprecedented and surprising picture of the history of legal education in fourteen countries beyond the United States. Each study in this book represents a critical history of the Americanization of legal education, reexamining prevailing narratives of exportation, transplantation, and imperialism. Collectively, these studies challenge the conventional wisdom that American ideas and practices have dominated globally. Editors Susan Bartie and David Sandomierski and their contributors suggest that to understand legal education and to respond thoughtfully to the mounting present-day challenges, it is essential to look beyond a particular region and consider not only the ideas behind legal education but also the broader historical, political, and cultural factors that have shaped them. American Legal Education Abroad begins with an important foundational history by leading Harvard Law School historian Bruce Kimball, who explains the factors that created a transportable American legal model, and the book concludes with reflections from two prominent American law professors, Susan Carle and Bob Gordon, whose observations on recent disruptions within US law schools suggest that their influence within the global order of legal education may soon fall into further decline. This book should be considered an invaluable resource for anyone in the field of law.

Edward Elgar Publishing **Critical theory, characteristically linked with the politics of theoretical engagement, covers the manifold of the connections between theory and praxis. This thought-provoking Research Handbook captures the broad range of those connections as far as legal thought is concerned and retains an emphasis both on the politics of theory, and on the notion of theoretical engagement. The first part examines the question of definition and tracks the origins and development of critical legal theory along its European and North American trajectories. The second part looks at the thematic connections between the development of legal theory and other currents of critical thought such as; Feminism, Marxism, Critical Race Theory, varieties of post-modernism, as well as the various 'turns' (ethical, aesthetic, political) of critical legal theory. The third and final part explores particular fields of law, addressing the question how the field has been shaped by critical legal theory, or what critical approaches reveal about the field, with the clear focus on opportunities for social transformation.**

CONTRACT LAW

Cambridge University Press **Contract Law: Cases and Materials** presents a selection of well-chosen cases and illuminating commentary ideal for introducing students to the study of contract law in Australia. Developed to accompany Stewart, Swain and Fairweather's *Contract Law: Principles and Context*, this casebook maintains the accessibility of the principles text while providing the depth and analysis of topics required to learn contract law. Following the structure of the principles text, this text explores areas not traditionally covered in other casebooks, such as resolving disputes, preparing to make a contract, preliminary agreements, and interpreting contracts. Each chapter also briefly explores contracts in international contexts. Containing well-chosen, carefully curated cases and extracts, *Contract Law: Cases and Materials* takes a practical approach to student learning and

integrates rich pedagogy to build critical thinking and analysis skills, making it an invaluable resource for contract law students.
