The Short Road to Great Presentations How to Reach Any Audience Through Focused Preparation, Inspired Delivery, and Smart Use of Technology *John Wiley & Sons* A practical, readable guide to delivering superior presentations Speakers bear the responsibility for communicating effectively with their audience: presenting a clear message, supporting it with well-structured explanations and examples, and delivering it with ease, grace, and good visuals. Unfortunately, this rarely happens, as anyone who has endured a substandard presentation knows only too well. The key for developing sound presentation skills need not, however, remain hidden. The Short Road to Great Presentations demystifies the art of public speaking as it shows you how to master the critical principles to make this skill an invaluable asset of your life and career. Drawing on twenty years of experience in helping engineers, scientists, and business people develop powerful communication skills, PERC Communications founders Peter and Cheryl Reimold present an easy-to-follow program for crafting winning presentations. They focus on two principles: 1) find a message that is clearly meaningful and accessible to your audience, and 2) connect strongly with your audience throughout your presentation. In applying these principles to a series of step-by-step preparations and on-stage actions, the authors help speakers focus on their most vital content, strengthen their structure and delivery, and—perhaps, most important—eliminate stress and aggravation. Chapter topics in this reader-friendly guide include: Structuring your message for maximum effect Preparing effective visuals Understanding and using body language and eye contact Handling tough questions and surprises Making smart use of slide shows and presentation software Conducting Web presentations and Web meetings Timeless speaking tips are combined with up-to-date primers on the latest technology throughout. The Short Road to Great Presentations is a one-stop resource for learning and practicing superior professional communication. Introduction to Flat Panel Displays *John Wiley & Sons* Flat Panel Displays (FPDs) are a frequent feature in our daily lives, used in mobile phones, laptop computers, desktop computer monitors and TVs. Several display technologies have been developed for FPDs, such as liquid crystal display (LCD), plasma display panel (PDP), light emitting diode (LED), organic light emitting device (OLED) and field emission display (FED). Introduction to Flat Panel Displays describes the fundamental sciences behind each display technology: LCD, PDP, LED, OLED and FED including carbon nanotubes. It contains a comparative analysis of the different display technologies in which detailed overviews of each technology are linked together so as to provide a comprehensive reference for students and display engineers, alike. Solved problems as well as homework problems are provided in each chapter to help consolidate students' reading, as well as solutions hosted on an accompanying website. Features include: the classifications and specifications of display technologies as guidelines for developing a display and judging their performances; principles for designing color displays with good color saturation and wide color gamut; basic operating principles of thin-film transistors (TFTs) and their applications to state-of-the-art TFT-LCD and TFT-OLED; an overview of FED fundamentals comprising the physics of field emission, as well as FED structure and display mechanism. Senior undergraduate and graduate students taking courses in engineering, physics and chemistry will benefit from the systematic approach used throughout the book, which will

help to prepare students for entry into a display profession. Display engineers, research scientists and technicians working on the development of flat panel display technology will also find this book an invaluable resource. Comparisons of the strengths and weaknesses of each of the display technologies will help professionals to decide which to use for their applications. The Society for Information Display (SID) is an international society, which has the aim of encouraging the development of all aspects of the field of information display.
