REVA EV

INDIA'S GREEN GIFT TO THE WORLD

REVA EV

INDIA'S GREEN GIFT TO THE WORLD

[Random House India](#) To counter seas of cars, rising petrol prices, and snarling traffic—Reva Electric Vehicle is India's offering to the world in the shape of a zero emission, green mobility option. Dr Maini recounts the story of Reva—India's first commercial electric vehicle—from the inception, ideation, designing the car to taking it to the world. It is a story coloured with hope, determination, disappointment, success, and jubilation—it is the passion for making green commuting a viable possibility come alive in these pages from Reva's journey. It is the story of a team that believed in its products against all odds. A story of many firsts, this book is an immortal account of India soundly on the forefront of electric vehicle movement with this unique car.

THE ORDER OF THE CREST

TRACING THE ALUMNI OF BISHOP COTTON BOYS' SCHOOL, BANGALORE (1865-2015)

[Penguin UK](#) Bishop Cotton Boys' School, Bangalore, which completes 150 years in 2015, was founded in the memory of Bishop George Edward Lynch Cotton (a master at Rugby). The school has transitioned from a Victorian school conceived in Tom Brown's School Days to one that has sought to keep the public school relevant in modern India. The book encompasses profiles of the people and the times, right from the 1860s, covering spheres as varied as the armed forces, public service, police, education, academia, law, medicine, the arts and the offbeat. Peppered with extracts from old letters, oral history and archives, the narrative features an eclectic range of prominent personalities, such as Lieutenant William 'Leefe' Robinson (the first Victoria Cross in an air operation), General K.S. Thimayya, Admiral V.S. Shekhawat, Dr Raja Ramanna, Lord Colin Cowdrey, Leslie Claudius, Lucky Ali, Sam Balsara, Feroz Khan, Nandan Nilekani, and several others. With chapters dedicated to those martyred in the World Wars as well as linking the journey of the school with the city of Bangalore, The Order of the Crest traces the alumni of Bishop Cotton over this period, profiling those old boys who have accomplished eminence or otherwise remained unsung, but not without touching others' lives.

ENGLISH MECHANIC AND WORLD OF SCIENCE

DISRUPT AND CONQUER

HOW TTK PRESTIGE BECAME A BILLION-DOLLAR BUSINESS

[Penguin Random House India Private Limited](#) The TTK Group was founded in 1928 in Chennai (then Madras) by T.T. Krishnamachari, who later became a Union minister and held the portfolios of finance, industry and commerce for close to fifteen years. In this book, the current chairman T.T. Jagannathan, along with Sandhya Mendonca, takes us through the journey of this extraordinary company which fought off bankruptcy and rose like a phoenix to become a highly profitable, successful entity. What makes this story all the more startling is that T.T. Jagannathan is an accidental and reluctant businessman. He came into the profession very unexpectedly, and without any preparation, with neither an MBA nor having ever worked in the family business before having its very survival entrusted to him. Like a phoenix, the Group and its constituent companies, have risen from the ashes, many times over, to stand tall and proud. This is the story of a journey that began with early success and experienced catastrophic disasters, and set about turning its fortunes around in stunning comebacks, time and again. With invaluable business lessons, decades of experience and innovation distilled in these pages, Disrupt and Conquer is a must-read for aspiring entrepreneurs, executives and business leaders.

BUSINESS WORLD

TURMERIC

THE GENUS CURCUMA

[CRC Press](#) For the last 6000 years turmeric has been used in Ayurvedic medicine to alleviate pain, balance digestion, purify body and mind, clear skin diseases, expel phlegm, and invigorate the blood. Nowadays, this plant has acquired great importance with its anti-aging, anti-cancer, anti-Alzheimer, antioxidant, and a variety of other medicinal properties. The need of the hour is to verify and validate the traditional uses by subjecting them to proper experimental studies. To do this effectively there needs to be a single comprehensive source of the knowledge to date. Turmeric: the genus Curcuma is the first comprehensive monographic treatment on turmeric. It covers all aspects of turmeric including botany, genetic resources, crop improvement, processing, biotechnology, pharmacology, medicinal and traditional uses, and its use as a spice and flavoring. Bringing together the premier experts in the field from India, Japan, UK, and USA, this book offers the most thorough examination of the cultivation, market trends, processing, and products as well as pharmacokinetic and medicinal properties of this highly regarded spice. While Ayurveda has known for millennia that turmeric cleanses the body, modern science has now discovered that it produces glutathione-S-transferase that detoxifies the body and therefore strengthens the liver, heart, and immune system. By comparing traditional uses with modern scientific discoveries, the text provides a complete view of the medicinal value and health benefits of turmeric. Heavily referenced with an exhaustive bibliography at the end of each chapter, the book collects and collates the currently available data on turmeric. Covering everything from cultivation to medicine, Turmeric: the Genus Curcuma serves as an invaluable reference for those involved with agriculture, marketing, processing or product development, and may function as a catalyst for future research into the health benefits and applications of turmeric.

DISRUPT AND CONQUER

HOW TTK PRESTIGE BECAME A BILLION DOLLAR COMPANY

[Portfolio](#) The TTK Group was founded in 1928 in Chennai (then Madras) by T.T. Krishnamachari, who later became a Union minister and held the portfolios of finance, industry and commerce for close to fifteen years. In this book, the current chairman T.T. Jagannathan, along with Sandhya Mendonca, takes us through the journey of this extraordinary company which fought off bankruptcy and rose like a phoenix to become a highly profitable, successful entity. Like a phoenix, the group and its constituent companies, have risen from the ashes, many times over, to stand tall and proud. THE MAKING AND MEANING OF RELATIONSHIPS IN SRI LANKA

AN ETHNOGRAPHY ON UNIVERSITY STUDENTS IN COLOMBO

[Springer](#) This book proposes that romantic relationships—filtered through various socio-cultural sieves—can lead to the development of affective kin bonds, which underlie our sense of personhood and belonging. Sirisena argues that the process resembles an attempt to make strangers into kin, and that sort of affective relating is a form of self-conscious relationality, in which the inhabitants reflect on their individual and collective needs, as well as their expectations and dreams in the future of their relationships. University students' romantic relationships, which they gloss as 'serious,' appear to be processual and non-linear, and are considered to be stabilising forces which are pitched against the inherent uncertainty in young people's lives.

THE SPIRIT OF GREEN

THE ECONOMICS OF COLLISIONS AND CONTAGIONS IN A CROWDED WORLD

[Princeton University Press](#) From a Nobel Prize-winning pioneer in environmental economics, an innovative account of how and why "green thinking" could cure many of the world's most serious problems—from global warming to pandemics Solving the world's biggest problems—from climate catastrophe and pandemics to wildfires and corporate malfeasance—requires, more than anything else, coming up with new ways to manage the powerful interactions that surround us. For carbon emissions and other environmental damage, this means ensuring that those responsible pay their full costs rather than continuing to pass them along to others, including future generations. In The Spirit of Green, Nobel Prize-winning economist William Nordhaus describes a new way of green thinking that would help us overcome our biggest challenges without sacrificing economic prosperity, in large part by accounting for the spillover costs of economic collisions. In a discussion that ranges from the history of the environmental movement to the Green New Deal, Nordhaus explains how the spirit of green thinking provides a compelling and hopeful new perspective on modern life. At the heart of green thinking is a recognition that the globalized world is shaped not by isolated individuals but rather by innumerable interactions inside and outside the economy. He shows how rethinking economic efficiency, sustainability, politics, profits, taxes, individual ethics, corporate social responsibility, finance, and more would improve the effectiveness and equity of our society. And he offers specific solutions—on how to price carbon, how to pursue low-carbon technologies, how to design an efficient tax system, and how to foster international cooperation through climate clubs. The result is a groundbreaking new vision of how we can have our environment and our economy too.

THE WORD FOR WORLD IS FOREST

Hachette UK When the inhabitants of a peaceful world are conquered by the bloodthirsty yumens, their existence is irrevocably altered. Forced into servitude, the Athsheans find themselves at the mercy of their brutal masters. Desperation causes the Athsheans, led by Selver, to retaliate against their captors, abandoning their strictures against violence. But in defending their lives, they have endangered the very foundations of their society. For every blow against the invaders is a blow to the humanity of the Athsheans. And once the killing starts, there is no turning back.

EATING NATURE IN MODERN GERMANY

Cambridge University Press A study of vegetarianism, raw food diets, organic farming, and other 'natural' ways to eat and farm in Germany since 1850.

THE ATHENAEUM**JOURNAL OF LITERATURE, SCIENCE, THE FINE ARTS, MUSIC AND THE DRAMA****LEAN LOGIC****A DICTIONARY FOR THE FUTURE AND HOW TO SURVIVE IT**

Chelsea Green Publishing Lean Logic is David Fleming's masterpiece, the product of more than thirty years' work and a testament to the creative brilliance of one of Britain's most important intellectuals. A dictionary unlike any other, it leads readers through Fleming's stimulating exploration of fields as diverse as culture, history, science, art, logic, ethics, myth, economics, and anthropology, being made up of four hundred and four engaging essay-entries covering topics such as Boredom, Community, Debt, Growth, Harmless Lunatics, Land, Lean Thinking, Nanotechnology, Play, Religion, Spirit, Trust, and Utopia. The threads running through every entry are Fleming's deft and original analysis of how our present market-based economy is destroying the very foundations--ecological, economic, and cultural--on which it depends, and his core focus: a compelling, grounded vision for a cohesive society that might weather the consequences. A society that provides a satisfying, culturally-rich context for lives well lived, in an economy not reliant on the impossible promise of eternal economic growth. A society worth living in. Worth fighting for. Worth contributing to. The beauty of the dictionary format is that it allows Fleming to draw connections without detracting from his in-depth exploration of each topic. Each entry carries intriguing links to other entries, inviting the enchanted reader to break free of the imposed order of a conventional book, starting where she will and following the links in the order of her choosing. In combination with Fleming's refreshing writing style and good-natured humor, it also creates a book perfectly suited to dipping in and out. The decades Fleming spent honing his life's work are evident in the lightness and mastery with which Lean Logic draws on an incredible wealth of cultural and historical learning--from Whitman to Whitefield, Dickens to Daly, Kropotkin to Kafka, Keats to Kuhn, Oakeshott to Ostrom, Jung to Jensen, Machiavelli to Mumford, Mauss to Mandelbrot, Leopold to Lakatos, Polanyi to Putnam, Nietzsche to Næss, Keynes to Kumar, Scruton to Shiva, Thoreau to Toynbee, Rabelais to Rogers, Shakespeare to Schumacher, Locke to Lovelock, Homer to Homer-Dixon--in demonstrating that many of the principles it commends have a track-record of success long pre-dating our current society. Fleming acknowledges, with honesty, the challenges ahead, but rather than inducing despair, Lean Logic is rare in its ability to inspire optimism in the creativity and intelligence of humans to nurse our ecology back to health; to rediscover the importance of place and play, of reciprocity and resilience, and of community and culture. ----- Recognizing that Lean Logic's sheer size and unusual structure could be daunting, Fleming's long-time collaborator Shaun Chamberlin has also selected and edited one of the potential pathways through the dictionary to create a second, stand-alone volume, *Surviving the Future: Culture, Carnival and Capital in the Aftermath of the Market Economy*. The content, rare insights, and uniquely enjoyable writing style remain Fleming's, but presented at a more accessible paperback-length and in conventional read-it-front-to-back format.

Simon and Schuster "Tells a story that could inspire everyday behavior change for all of us. Small steps, leading to one big milestone: a planet free of plastic pollution." —Daniella Dimitrova Russo, CEO and founder of Think Beyond Plastic™ Like many people, Beth Terry didn't think an individual could have much impact on the environment. But while laid up after surgery, she read an article about the staggering amount of plastic polluting the oceans, and decided then and there to kick her plastic habit. In *Plastic-Free*, she shows you how you can too, providing personal anecdotes, stats about the environmental and health problems related to plastic, and individual solutions and tips on how to limit your plastic footprint. Presenting both beginner and advanced steps, Terry includes handy checklists and tables for easy reference, ways to get involved in larger community actions, and profiles of individuals—*Plastic-Free Heroes*—who have gone beyond personal solutions to create change on a larger scale. Fully updated, *Plastic-Free* also includes sections on letting go of eco-guilt, strategies for coping with overwhelming problems, and ways to relate to other people who aren't as far along on the plastic-free path. Both a practical guide and the story of a personal journey from helplessness to empowerment, *Plastic-Free* is a must-read for those concerned about the ongoing health and happiness of themselves, their children, and the planet. "This is the tool that we've all been waiting for to ease the transition to going plastic-free. Time to wake up. Peace." —Rosanna Arquette, actor, Plastic Pollution Coalition member "Practical and hopeful, with a kind of cheerleading charm." —The Washington Post

PARENTING MATTERS

SUPPORTING PARENTS OF CHILDREN AGES 0-8

National Academies Press *Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children’s well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child’s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents’ lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents’ use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.*

THE WORLD IS FLAT [FURTHER UPDATED AND EXPANDED; RELEASE 3.0]

A BRIEF HISTORY OF THE TWENTY-FIRST CENTURY

Macmillan *This new edition of Friedman’s landmark book explains the flattening of the world better than ever- and takes a new measure of the effects of this change on each of us.*

THE NATIONAL FREEMASON

ANNALS OF THE FORMER WORLD

Farrar, Straus and Giroux *The Pulitzer Prize-winning view of the continent, across the fortieth parallel and down through 4.6 billion years Twenty years ago, when John McPhee began his journeys back and forth across the United States, he planned to describe a cross section of North America at about the fortieth parallel and, in the process, come to an understanding not only of the science but of the style of the geologists he traveled with. The structure of the book never changed, but its breadth caused him to complete it in stages, under the overall title Annals of the Former World. Like the terrain it covers, Annals of the Former World tells a multilayered tale, and the reader may choose one of many paths through it. As clearly and succinctly written as it is profoundly informed, this is our finest popular survey of geology and a masterpiece of modern nonfiction. Annals of the Former World is the winner of the 1999 Pulitzer Prize for Nonfiction.*

SPEED & SCALE

A GLOBAL ACTION PLAN FOR SOLVING OUR CLIMATE CRISIS NOW

Penguin UK #1 bestselling author and acclaimed venture capitalist John Doerr reveals a sweeping action plan to conquer humanity’s greatest challenge: climate change. In 2006, John Doerr was moved by Al Gore’s *An Inconvenient Truth* and a challenge from his teenage daughter: “Dad, your generation created this problem. You better fix it.” Since then, Doerr has searched for solutions to this existential problem—as an investor, an advocate and a philanthropist. Fifteen years later, despite breakthroughs in batteries, electric vehicles, plant-based proteins and solar and wind power, global warming continues to get worse. Its impact is all around us: droughts, floods, wildfires, the melting of the polar ice caps. Our world is squarely in a climate crisis and on the brink of a climate disaster. Yet despite our state of emergency, climate change has yet to be tackled with the urgency and ambition it demands. More than ever, we need a clear course of action. Fueled by a powerful tool called Objectives and Key Results (OKRs), *SPEED & SCALE* offers an unprecedented global plan to cut greenhouse gas emissions before it’s too late. Used by Google, Bono’s ONE foundation and thousands of startups the world over, OKRs have scaled ideas into achievements that changed the world. With clear-eyed realism and an engineer’s precision, Doerr identifies the measurable OKRs we need to reduce emissions across the board and to arrive by 2050 at net zero—the point where we are no longer adding to the heat-trapping carbon in the atmosphere. By turns pragmatic and inspiring, *SPEED & SCALE* intersperses Doerr’s wide-ranging analysis with firsthand accounts from Jeff Bezos, Christiana Figueres, Al Gore, Mary Barra, Bill Gates, and other intrepid policy leaders, entrepreneurs, scientists and activists. This book is a launchpad for leaders of all kind, for anyone anywhere who can move others to act with them. With a definitive action plan, the latest science and a rising climate movement on our side, we can still reach net zero before it is too late. But as Doerr reminds us, there is no more time to waste. _____ ‘A critical blueprint for anyone looking to take concrete steps to reach net-zero emissions.’ Al Gore, former U.S. Vice President ‘A practical guide for both public and private sector participation in decarbonizing the global economy, a task as challenging as it is urgent.’ Christiana Figueres, former executive secretary of the UN Climate Change Convention ‘A comprehensive plan to tackle one of the most vexing challenges in human history.’ Jim Collins, author of *Good to Great* and *Built to Last*

QUARTERLY BULLETIN OF RECENT ACCESSIONS

Vols. 1-7, 11-15 include the library’s Annual report for 1919/20-1924/25, 1926/27-1930/31, 1934/35, 1936/37-

LITHIUM

THE GLOBAL RACE FOR BATTERY DOMINANCE AND THE NEW ENERGY REVOLUTION

Hurst Publishers *A global energy revolution is unfolding before our eyes: ever-growing numbers of electric vehicles on our roads, laptops that last all day on a single charge and solar panels on our roofs, all reliant on lithium-ion batteries. This revolution is happening at breath-taking speed, with the potential to completely transform key industries and the way we live. For the first time in history, we can now actually store this green energy we talk so much about. Often referred to as ‘the new oil’, lithium allows large amounts of energy to be squeezed into a very small space. Demand is soaring, and the lithium business is full of drama: bitter rivalries, shady deals and exceptionally talented visionaries such as Elon Musk, who is building lithium battery giga-factories across the world. This book travels from the salt lakes of the Tibetan plateau, where Chinese government-linked companies extract lithium, to Argentina, Chile and Bolivia, which hold the world’s biggest resources of the mineral. It reveals superpowers’ struggle to secure strategic supplies, and the astonishing efforts of lone-wolf inventors and entrepreneurs. Lithium also explores the environmental impact of lithium extraction, the limits to battery electrification, and lithium battery recycling as the way forward.*
